RE: Site Survey of Wireless Communications Facility in Harlan County
PSC Case Number: 2009-00256

Dear Mr. Richards:

I am in receipt of a copy of your letter addressed to the Executive Director of the Kentucky Public Service Commission dated August 11, 2009 regarding Case Number 2009-00256. I represent the applicant, New Cingular Wireless PCS, LLC, and will be working with you to address any of your concerns regarding such.

Enclosed with this letter is a copy of the survey completed by a Licensed Professional Land Surveyor for your review. I have spoken with said surveyor regarding your inquiry/questions and can assure you that the proposed tower site is not located on any portion of your property. The "survey pins" in question are possibly those existing pins, located during the survey, that mark the property line between your property and the adjoining property. The four set #5 rebar with cap stamped J. Charles #3152 mark the proposed lease area and do not encroach upon your property.

Please feel free to contact me if you need further clarification or have any questions.

Sincerely,

Todd R. Briggs
Counsel for New Cingular Wireless PCS, LLC.
