Re: Case No. 2009-00333

Dear Mr. Derouen:

Enclosed please find being sent by overnight mail an original and twelve copies each of the *Duke Energy Kentucky Inc.'s Reply to Complainant's Response* to be filed in the above captioned case.

Please date-stamp the extra two copies of this letter and the filing and return to me in the enclosed envelope.

Sincerely,

Dianne B. Kuhnell
Senior Paralegal

Case No. 2009-00333

DUKE ENERGY KENTUCKY, INC.'S REPLY TO COMPLAINANT'S RESPONSE

I. Introduction:

Now Comes Duke Energy Kentucky, Inc. (Duke Energy Kentucky or the Company) and hereby respectfully submits its Reply to Complainant Teresa L. Cunningham's (Complainant) Response to Defendant's Motion to Dismiss in the above-styled proceeding. Duke Energy Kentucky denies that it has overcharged Complainant. In fact, in all instances, Duke Energy Kentucky has charged Complainant in accordance with all relevant statutes and regulations.

The origin of the credits Complainant received is simple and explained in Complainant's monthly bills. Complainant's allegations stem from what appears to be two bill corrections that occurred this year as a result of the Company rebilling and "truing up" estimated charges in favor of actual meter readings. Due to malfunctioning Advanced Metering Infrastructure (AMI) equipment installed at Complainant's residence, Complainant received estimated bills for electric consumption from October 6, 2008 through February 11, 2009 and from February 11, 2009

through May 8, 2009. Complainant's meter registered her electric consumption but the data was not communicated to the Company because of a malfunctioning AMI device. The result was estimated bills for electric service. Once the Company replaced the electric meter and malfunctioning AMI device, the Company recalculated Complainant's bills based upon actual meter readings.

II. Complainant's Account History:

A. The First AMI Installation.

According to Company records, Duke Energy Kentucky regularly obtained actual meter readings of Complainant's electric consumption between 2003 through 2007. Complainant was billed for actual metered electric consumption. On or about September 20, 2007, Duke Energy Kentucky installed a new electric meter (Meter No. 97081770) and an AMI device at Complainant's residence as part of the Company's AMI pilot program approved in Case No. 2006-00172.

There was a problem with the installation such that Duke Energy Kentucky was not able to communicate with the AMI device or receive the electronic meter reading data from the AMI device. This affected the meter readings from September 20, 2007 through June 2008. Nonetheless, despite being unable to receive the electronic data, Complainant's monthly bills were accurate. The majority of Complainant's bills during this period were based upon actual readings. According to Company records, Complainant's bills were calculated from readings performed by Complainant and communicated to the Company, readings obtained by the Company or through estimated readings. According to Company Records, Complainant provided meter readings on December 8, 2007, January 9, 2008, and April 9, 2008. Complainant's consumption was estimated on March 7, 2008. On May 8, 2008 Duke Energy

Kentucky obtained an actual meter reading and Complainant was billed based upon actual measured usage. Therefore, the data used to calculate Complainant's bills were based upon actual measured consumption.

B. The Second AMI Installation.

On or about June 12, 2008, having not received an electronic signal from Complainant's meter since installation, Duke Energy Kentucky conducted a field inspection to examine Complainant's meter. Upon investigation, it was determined that Complainant's load had been metered properly and all meter seals were intact. The inability to receive data electronically was due to switched leads, causing the electronic AMI device not to function properly. Duke Energy Kentucky installed a new meter (Meter No. 97081813) and AMI device. A copy of the meter investigation dated June 11, 2008 is attached as Attachment 1. This report shows that the old meter had been functioning properly, all load was measured and, therefore, there was no loss of revenue. Furthermore, because Complainant's consumption for the period affected was determined through mostly actual readings performed by Complainant or by the Company, there was no adjustment needed to "true- up" for actual readings.

Following this new installation, Duke Energy Kentucky began receiving electronic data from the AMI device. Complainant's bills for June, July, August, and September 2008 were based upon actual readings obtained from the meter and sent electronically from the AMI device. After Complainant's October 6, 2008 billing period, the AMI device stopped functioning and the Company was not able to receive an electronic reading. Accordingly, Complainant began receiving estimated bills for the consumption periods ending November 4, 2008, December 8, 2008, January 9, 2009, and February 9, 2009.

C. The Third AMI Installation.

On or about February 11, 2009, Duke Energy Kentucky conducted another field investigation. At that time, the Company obtained an actual reading of Meter No. 97081813 that showed Complainant's actual consumption since October 6, 2008, the last actual reading of Complainant's meter. Attachment 2 is a true and accurate copy of the field investigation report. The Company then installed another AMI device and a new electric meter (Meter No. Meter No. 97081778). The Company recalculated Complainant's bills based upon the actual meter reading obtained on February 11, 2009 and prorated the consumption back to the last actual reading on October 6, 2008. Duke Energy Kentucky then credited Complainant for the estimated charges from October 6, 2008 through February 11, 2009 and re-billed based upon the actual consumption. Attachment 3 is a true and accurate copy of the bill adjustment sent to Complainant on or about March 4, 2009. Complainant received a recalculated bill in March 2009, following the installation of a new electric meter and AMI device. Attachment 4 is a true and accurate copy of Complainant's bill prepared on March 16, 2009. This bill is a four-page bill that shows the monthly adjustments prorated back to October 6, 2008.

For three months following the February 11, 2009 installation, Complainant continued to receive estimated bills for consumption until Duke Energy Kentucky's system programming caught up and began receiving the new electronic signal. The estimated periods included billing periods ending March 10, 2009, April 8, 2009, and May 8, 2009. Once the AMI system was reprogrammed to pick up Complainant's new AMI signal, actual readings were used to determine monthly bills. This occurred in time for the June 9, 2009 meter reading. With the bill for the consumption period ending June 9, 2009, Complainant's estimated charges were cancelled and Complainant was re-billed based upon actual metered consumption. Attachment 5

is a true and accurate copy of Complainant’s bill prepared June 15, 2009. This bill shows a detailed breakdown of pro-rated adjustments to prior months’ estimated charges due to finally obtaining an actual meter reading. Since the reprogramming, all of Complainant’s bills have been based upon actual electronic data received from the Complainant’s meter.

III. Complainant’s Allegations are without Merit.

A. Recent Consumption Levels are Consistent with Prior Periods

In her Response, Complainant makes several meritless allegations regarding Duke Energy Kentucky’s treatment of her account. First, Complainant maintains that since her meter was replaced, her bills are “substantially” lower. Duke Energy Kentucky charges its tariffed rates based upon the level of consumption either measured or estimated on a monthly basis. Complainant’s description of her recent bills as “substantially lower” is simply her opinion and irrelevant. What is relevant is the measured level of consumption.

Complainant’s electric consumption since the June 9, 2009 meter reading has been in line with her historic consumption. Attachment 6 includes true and accurate copies of Complainant’s bills from January 2006 to present. A summary comparison of Complainant’s most recent consumption (June - September) with relevant prior periods is as follows:

Beginning date	Ending date	Prior Reading	Current Reading	Total consumption (kWh) *
6/7/2006	7/7/2006	1001	1019	1080
7/7/2006	8/7/2006	1019	1041	1320
8/7/2006	9/6/2006	1041	1059	<u>1080</u>
Total				3480
6/8/2007	7/9/2007	1196	1212	960
7/9/2007	8/7/2007	1212	1226	840
8/7/2007	9/6/2007	1226	1244	<u>1080</u>
Total				2880
6/12/2008	7/9/2008	0	11	660
7/9/2008	8/6/2008	11	25	840
8/6/2008	9/5/2008	25	37	<u>660</u>
Total				2160

6/9/2009	7/9/2009	6	26	1200
7/9/2009	8/7/2009	26	40	840
8/7/2009	9/8/2009	40	57	1020
Total				<u>3060</u>

*Complainant has a demand meter with a multiplier of 60

A customer's consumption can vary on an annual basis. Consumption levels can be affected, positive or negative, by a number of factors, including a customer's installation of new electronic equipment, more efficient appliances, weather conditions, and number of persons living at a residence. Nonetheless, as can be seen from the above summary and upon review of the Complainant's bills, her recent level of electric consumption is in line with prior periods. Accordingly, Complainant's claim that her electric bills are "substantially lower" is inaccurate. Her electric consumption is very much consistent with usage billed over the last three years.

B. The Company Explained Billing Adjustments through Monthly Bills

Complainant next alleges that Duke Energy Kentucky "merely credited her bill and did not advise of or consult with Complainant regarding the time which the [alleged] error occurred or how the credit was calculated."¹ First, Duke Energy Kentucky disputes the allegation that there was an error. As previously explained, Duke Energy Kentucky adjusted Complainant's bill to true-up and prorate estimated consumption levels with actual meter readings. This is a standard practice and one which the Commission has endorsed. The adjustments were not due to an error. The periods adjusted were simply those months in which complainant received estimated bills. Second, the fact that Duke Energy Kentucky did not contact Complainant to explain that her prior months' usage was estimated and that recently Duke Energy Kentucky obtained an actual reading, and that we were resulting correcting her bill for actual usage is

¹ See Complainant's Response at 2.

immaterial. Each of Complainant's bills indicated whether or not they are estimated. An estimated reading contains an ("E"). The bill message at the bottom of the first page explains that Complainant's meter was estimated because the Company could not read the meter. Upon obtaining an actual reading, Complainant received a detailed bill that showed the calculation of the prorated consumption.²

The adjustments were communicated to Complainant through her monthly billing statements. For example, Attachment 3 shows the cancellation of late payment charges when Complainant did not timely pay her prior bills during the estimated period and the estimated electric consumption. Complainant was credited with her past payments. Attachment 4 is Complainant's monthly billing statement for the period of February 11, 2009 through March 10, 2009. This statement also shows the detail for the billing adjustment related to the prior periods. An explanation of prior months' charges begins on page 2 of Attachment 4. The adjustment is based upon the actual reading of 58 kWh obtained on February 11, 2009. Using that February 11, 2008 reading and comparing it to Complainant's previous actual reading (October 6, 2008), Duke Energy Kentucky recalculated Complainant's bills, month-by-month, going back to October 6, 2008. The result is that Complainant was billed on actual metered consumption.

Duke Energy Kentucky made a similar adjustment to actual consumption with Complainant's bill for the period May 8, 2009 through June 9, 2009.³ As explained above, Duke Energy Kentucky did not receive the electronic signal from the AMI device until sometime on or about Complainant's June 9, 2009 reading. Duke Energy Kentucky then prorated Complainant's consumption based upon that reading in comparison to the last actual meter reading of February 11, 2009 when the new meter was installed. Page 2 of Attachment 5 begins the explanation of

² See Attachments 3, 4, and 5.

³ See Attachment 5.

prior months' charges and shows the prorated adjustment going back to February 11, 2009. The result is Complainant being billed based upon metered consumption.

C. Complainant's Meters Were Accurate

Finally, Complainant's allegation that her "bills reflect over a two percent error in billing" is immaterial and her reliance upon 807 KAR 5:006 Section 10(2) is misplaced. 807 KAR 5:006 Section 10(2) refers to a meter test that shows a meter that is operating more than two percent fast or slow. Here, Complainant did not request her meter be tested. Here, Complainant's meters were measuring consumption, consistent with prior levels, and there is no evidence that the meters were inaccurate. Duke Energy Kentucky merely adjusted Complainant's bills for metered consumption following a period of estimated readings. In fact, during the June 2008 field inspection, Duke Energy Kentucky's technician verified that the meter installed in 2007 was measuring full load and there was no loss of revenue.

Complainant's insinuation that Duke Energy Kentucky has run afoul of 807 KAR 5:006 Section 10 is meritless. Duke Energy Kentucky did, in fact, test Complainant's meters, either upon removal or prior to installation. Attachment 7 is a true and accurate copy of the test results for Meter Number 71573898, the meter that had been measuring Complainant's monthly consumption until September 20, 2007 when a new meter and AMI device was installed (Pre-AMI meter). According to this test, Complainant's Pre-AMI Meter was tested shortly after its removal and was determined to be measuring within the range of accuracy required under 807 KAR 5:006 Section 10. Attachment 8 is a true and accurate copy of the test result for Meter No. 97081770, installed on September 20, 2007 (First AMI Meter). The First AMI Meter was tested prior to installation and the results show that it was also measuring within the two percent range required under 807 KAR 5:006 Section 10. True and accurate copies of tests for Meter No.

97081813 (meter installed on June 12, 2008) and Meter No. 97081778 (complainant's current meter) are contained in Attachments 9 and 10 respectively. These test results show that Complainant's meters were operating within acceptable thresholds for accuracy.

Historically, Complainant's bills were based upon actual meter readings. These readings were confirmed month after month. There is no evidence that Complainant's meters were inaccurate. In fact, when Complainant's meter was inspected on June 12, 2008, Duke Energy Kentucky's technician confirmed that Complainant's meter was registering the full load and there was no loss of revenue.⁴ Accordingly, Complainant's allegations that Duke Energy Kentucky's meters were somehow inaccurate or that the Company was overbilling Complainant are without merit.

IV. Conclusion

Complainant's allegations are without merit. Duke Energy Kentucky merely adjusted Complainant's billing for actual metered consumption following estimated periods. Complainant's meters were accurate. This Commission should set this matter for hearing or dismiss Complainant's complaint.

Respectfully submitted,

DUKE ENERGY KENTUCKY, INC.

Before beginning any outdoor projects this fall, remember to consider safety first. Always be aware of overhead power lines when using ladders or trimming trees and make sure you call 811 to have underground utility lines marked before digging. For more tips on electric and gas safety, visit the Public Safety tab at www.duke-energy.com.

Before beginning any outdoor projects this spring, remember to consider safety first. Be aware of overhead power lines when using ladders or trimming trees and make sure you call 811 to have underground utility lines marked before digging. For more tips on electric and gas safety, visit www.duke-energy.com.

HOME ENERGY ASSISTANCE- The Home Energy Assistance program has been reinstated to provide bill payment assistance to qualifying low-income Kentucky households. The Northern Kentucky Community Action Commission will administer the program. It is funded by a monthly 10 cent charge on both residential electric and gas accounts. WINTERCARE-Help those less fortunate stay warm this winter season by contributing to Duke Energy's WinterCare program. See this month's bill insert for more information, or visit www.duke-energy.com.
