REF: Case # 2009-00363--Our Objection To This Matter, And
Our Request For Intervention

To Whom It May Concern:

This letter is to set forth my, and our, strong objection to the construction of the new cellular tower for which Bluegrass Wireless is currently seeking your approval. The concerns and objections to this project as stated below are several, but they center upon the fact that construction of the tower on the site Bluegrass proposes would seriously undermine the residential property values of several homes very near by, mine included and as marked on the attached, would damage the value of other properties just slightly further away, and would generally debase the beauty and appeal of the immediate surrounding neighborhood we call home.

Please be advised that the hill upon which Bluegrass wants to build the tower is already roughly 150 feet in elevation above the residences on Stilesville Road, and the proximity of these existing homes, mine included, to the tower is shown on the enclosed map. The Bluegrass tower alone is planned to be 240 feet tall by itself. Therefore, the height of the hill together with the height of the tower will combine to create a massive eyesore in the vicinity of 350-400 feet tall. It is my opinion, as well as that of my neighbors, that this enormous, unsightly structure would completely impose its unsightly presence upon our residences and our neighborhood, and would inevitably and significantly devalue our homes. No one could logically argue that we would not be adversely and materially affected by this.

Before going further, let me interject a hypothetical question to drive home the point of the damage we would incur if the tower is built, and that question is: how many of you, personally, or how many of Bluegrass Wireless executives or its shareholders would purchase a home or invest in any real estate which was located very close to an unsightly, gigantic steel tower. Naturally, the answer is that no one would make that investment because such property is universally considered undesirable. And that is precisely why, we think, that Bluegrass has a public obligation to build their towers in more appropriate, more remote areas where their

structures are less likely to damage property values and create nearby, glaring eyesores. Anyone living in Pulaski County knows that our area literally abounds in less damaging potential sites for tower construction.

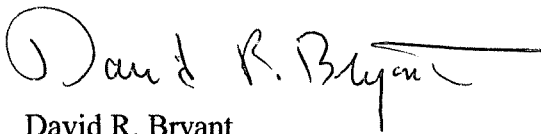

Please note on the enclosed Bluegrass map, on which I have made some markings, that the map seems to focus upon only a 500 foot radius from the proposed center of the tower, and focusing on just a 500 foot radius it, intentionally or not, seems to imply that this short 500 foot area should be the only area affected by their tower. In doing that, however, it ignores my house, which is right at the 500 foot mark, and on which they failed to show that I had a house on my property, and it further ignores my immediate neighbors whose homes again are a mere 600-900 feet from the proposed tower.

Each of our homes are part of a growing community called Deep Springs subdivision, and each of us selected this community for its natural beauty and, of great importance to all of us, because it was a planned community with rules and regulations designed to preserve the value of our homes and our neighborhood.

There are many other homes and home sites not able to be shown on the enclosed maps, some already built and occupied, and many other lots sold for future building. Therefore, please note the number of adversely affected property owners is much greater than just my personal home and that of my immediate neighbors, although our specific homes are the ones in the Deep Springs community which are the very closest to the proposed tower. We would have, of course, never imagined that we would one day be looking at the prospect of an enormous tower built right next to our homes, and on the fringe of our community. The Bluegrass map would have someone believe there is only one single house nearby. Not true at all.

Having now explained to you our deep and justifiable concerns on this matter, we respectfully request that you withhold your approval of the construction of this facility.

Respectfully Submitted,

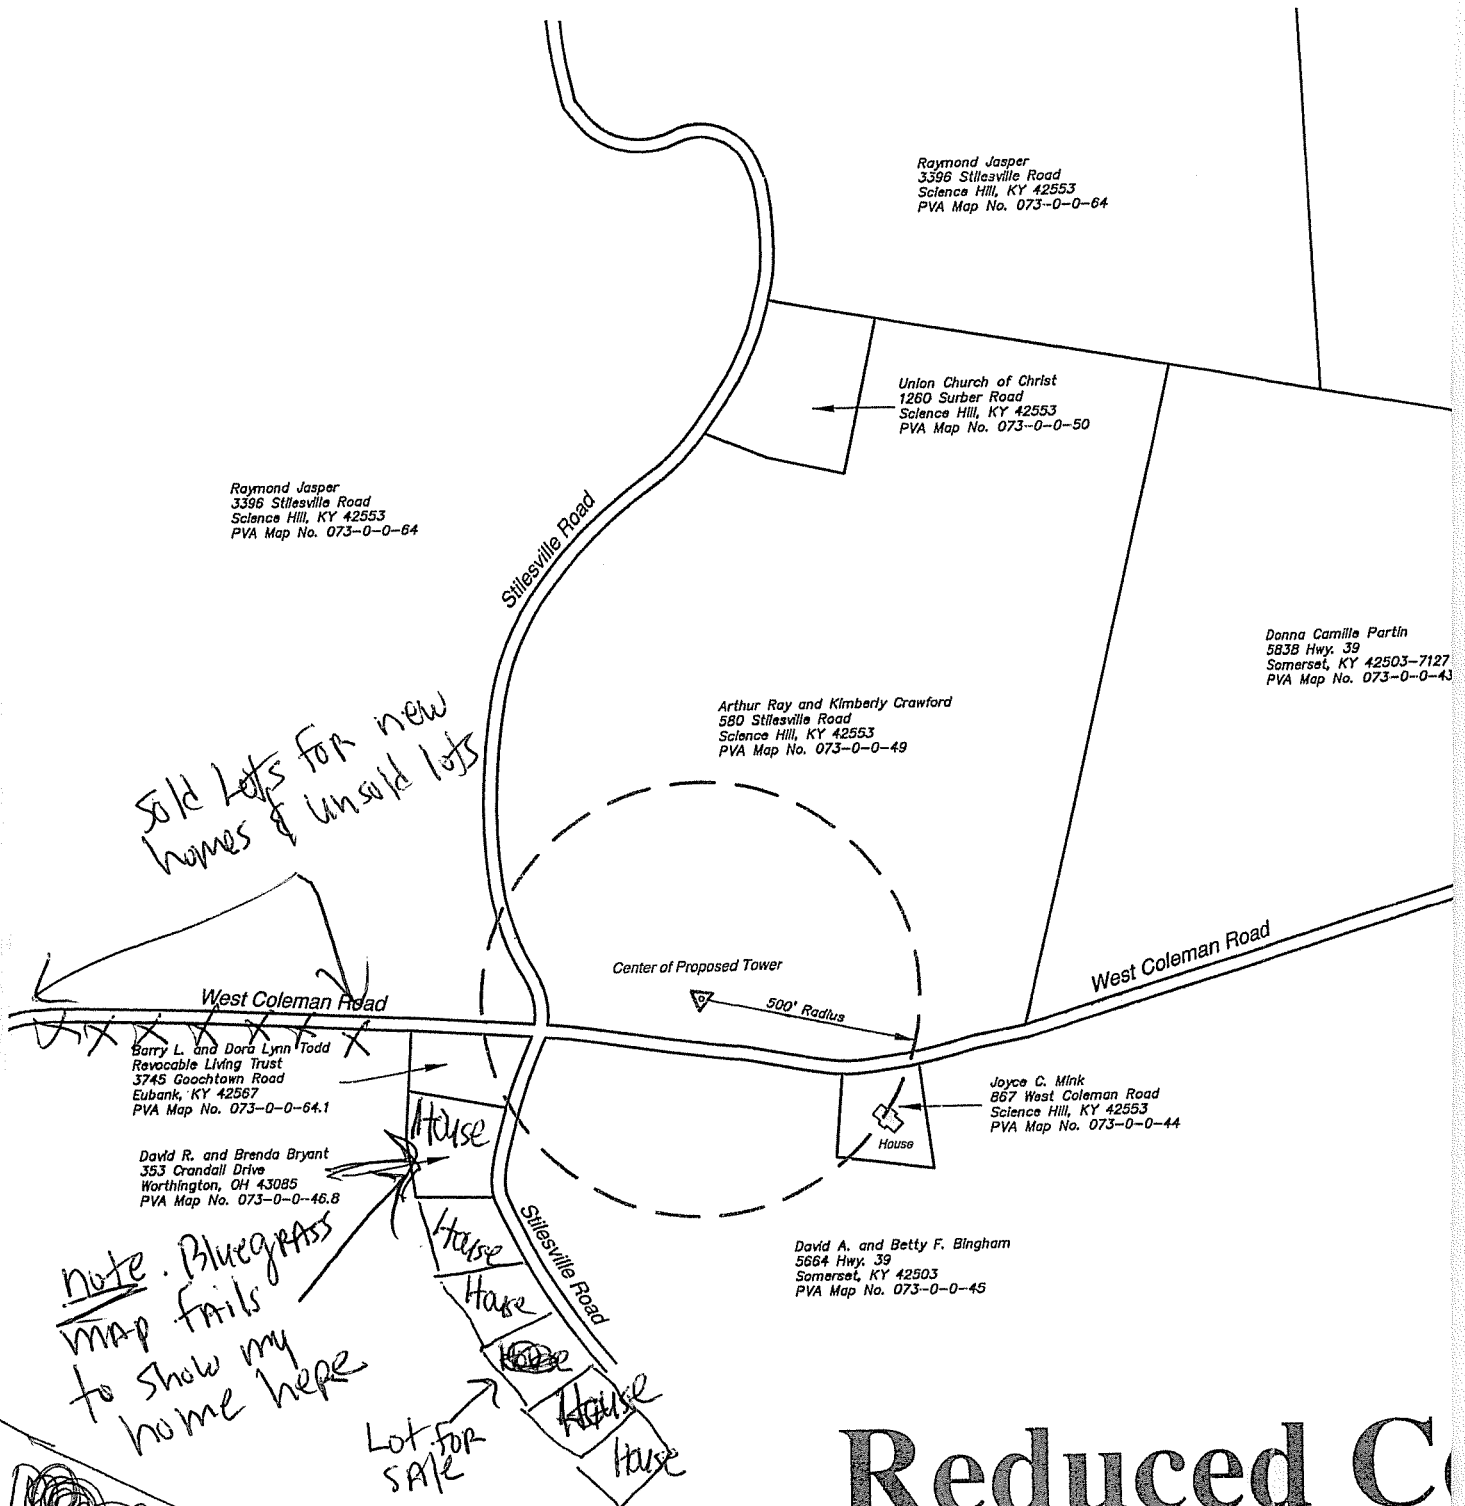

A handwritten signature in black ink that reads "David R. Bryant". The signature is written in a cursive style with a long horizontal line extending from the end of the name.
