

SUMMARY NOTES
PUBLIC MEETING
5:00 P.M.
HAZARD, KENTUCKY
CASE NO. 2009-00459

In the Matter of: Application of Kentucky Power Company for a General Adjustment of
Electric Rates

The public meeting in the matter 2009-00459 In the Matter of: Application of Kentucky Power Company for a General Adjustment of Electric Rates was conducted on the campus of the Hazard Community and Technical College, One Community College Drive, Hazard, Kentucky 41701 at 5:00 p.m. Eastern time, Wednesday, April 21, 2010.

Those in attendance on behalf of the Public Service Commission:

Chairman David Armstrong
Vice Chairman Jim Gardner

PSC Staff Members

Stephanie Bell
Faith Burns¹
Jeff Derouen
Andrew Melynkovich
Wayne Miller
Jim Rhodes
Maggie Woods

Chairman David Armstrong, Chairman of the Kentucky Public Service Commission welcomed everyone to the meeting. He introduced Vice Chairman Jim Gardner and PSC that were in attendance. Chairman Armstrong requested that cell phones be put on vibrate or turned off. The Chairman indicated that Commissioner Charlie Borders could not be in attendance due to a long standing commitment.

The Chairman indicated that the purpose of the meeting was to take public comment on the Application of Kentucky Power to increase revenue for electric sales about 24%. He indicated that if approved, the increase would result in an average residential bill increase

¹ This PSC staff member acted in the capacity of stenographer/note taker for this Public Meeting. These notes are intended to be a summary of the proceedings and not an exact verbatim transcription. The spelling of some names and/or locations may not be accurate. While attention has been given to assure the accuracy of this summary of public testimony and the information submitted by the public to be included in the public record in this case proceeding, this staff member was not in possession of all information submitted by the public to be filed in the public record, and as such, cannot verify either the completeness of the information filed herewith (including any and all attachments), or the identify of the person or entity submitting such information.

of 34% for Kentucky Power residential customers. Kentucky Power has indicated in the increase that it needed to pay for system improvement and maintenance. The case Number is 2009-00459.

The Chairman indicated that this is last of 3 meetings in the Kentucky Power service area. The first meeting was held in Ashland; a meeting was conducted in Pikeville the previous evening, and the meeting in Hazard.

The Chairman indicated that he recognized this could be an emotional issue, particularly in this economic time. He indicated that "we are here to listen to you." He explained that there would be no presentations by Kentucky Power or any other interested party in this rate request. He stated that there would be no question and answer period involving the parties as to do so creates a potential procedural problem. He stated that the Commission will take sworn testimony from them (Kentucky Power and other interested parties) in a later evidentiary hearing.

The Chairman stated that representatives of Kentucky Power have agreed to remain and meet with anyone who has particular questions as to why they are coming forth with this request. He further stated that Customer Service Reps are across the hall for any customer who has billing questions.

He stated that those wishing to speak have indicated by signing up on forms. He asked that names be given even from those who did not want to speak we want your name so that a complete record of the hearing could be had.

He stated that 3-5 minutes per speaker would be allowed so everyone could be assured of getting their voice heard. He explained that the timekeeper had 2 cards. The white card will remind the speaker that 1 minute remains and the red card means to stop.

He further stated that those wishing may want to take the PSC comment forms and mail them to the PSC or leave them with PSC staff. He also stated that comments could be e-mailed to the PSC. The Chairman further stated that the meeting was being video taped and that the tape would be available to view on the PSC website. He stated that a summary of the comments will be part of the case record available on the web site as well. He said that all written comments would be entered in the case record. The Chairman stated that written comments would be received until the date of the hearing. The Chairman stated and recognized Assistant Attorney General Dennis Howard.

The Chairman stated that the date and time of the hearing would be at 10:00 a.m. Tuesday, May 25 at the PSC offices at 211 Sower Boulevard in Frankfort. He stated that the hearing is open to the public and will be streamed live. He stated that because the PSC acts as a quasi-judicial Commission and it must rule on the Kentucky Power application, it cannot answer questions pertaining to the substance of the case tonight. He explained that the questions asked tonight may be part of those that the Commission asks during the formal proceeding in Frankfort. He explained that the PSC staff is available to

answer questions and that officials from Kentucky Power have agreed to answer questions at the conclusion of the meeting.

The Chairman stated that he wanted everyone to remember that it would be helpful to keep in mind to ask are the rates fair, are they just, and are they reasonable. He stated that if there were questions or concerns about that to feel free to contact the consumer hotline at 800-772-4636 to get updates on what is happening in this case. He requested that speakers state their name, place of residence, and any other identifying tag they would like to place on themselves. He requested that comments be kept to 3-5 minutes.

The Chairman thanked the elected officials for coming tonight. He indicated that other elected officials had indicated they would be monitoring the PSC website.

The Chairman then recognized Representative Fitz Steele and invited him to come forward.

STATE REPRESENTATIVE FITZ STEELE

State Representative Fitz Steele thanked the Commissioners for coming to Hazard. He thanked Stephanie and all of the PSC staff for coming. He said that the time we are going through now is the worst since the Great Depression. He said that through the LIHEAP (Low Income Home Energy Assistance Program) program, in his Community Action District alone there were 6,124 homes that participated during the crisis period at 9,692 homes. He said that will give people a good sign of what shape the economy in Eastern Kentucky is in. He stated that they had lost thousands of jobs and that right now, there is no light at the end of the tunnel. He asked that when proposing this increase take into consideration that small business owners, and his people are struggling. He indicated he represents Perry and Harlan Counties and that they have having a hard time. He said there is one question that has not been brought up and that he would like the Commission to consider. He stated that he would like Commission to consider that the Commonwealth of Kentucky gets over 90% of its energy from coal. Unless something happens with the federal government, we are going to have to look at other means to provide energy for this the Commonwealth is going to have to look at other ways to provide energy to the Commonwealth.

He thanked the Commission again.

CHAIRMAN ARMSTRONG then recognized County Judge Jim Moore.

LETCHER COUNTY JUDGE EXECUTIVE JIM WARD

Judge Ward thanked the Commission and stated that through all this process, a public forum had been conducted in Letcher County with himself and Commonwealth Attorney Edison Banks. He stated that he had presented the Commission with all the testimony (information delivered to PSC staff to be placed in the record and CDs so that the forum

could be viewed). He stated that the Commission would be able to take those back and look at them to see first hand many people who came to the forum there who were unable to attend tonight's hearing.

He stated that before stated that before the Commission looks at raising rates, the Commission has got to look at the people and see, can they afford it. He said that the majority cannot afford it. He said that during the large power outage they had seventy-some percent of households out of power. He said that was from neglect in lack of cutting the right-of-ways. He stated that Kentucky Power should have been doing this all along. They should have been taking care of the system all along instead of trying to wait as long as they have to come in and needing a 35% increase on their people.

He stated that when you bring a 35% increase on our homes, and you bring it to our businesses, the only way that the businesses can make up is to pass it on to the customers so you're passing it on again. He said that to him, there's no way that we should be able to let them have a 35% increase when they have neglected to do what they need to do to start with.

He again thanked the Commission.

CHAIRMAN ARMSTRONG then recognized Paul Collins

PAUL COLLINS - Representing the City of Hazard

Mr. Collins stated that he was a local practicing attorney there on behalf of Hazard Mayor Gorman and the Board of Commissioners of the City of Hazard. He thanked the Commission for taking the time to come to Hazard, Kentucky to listen to the customers in the service area and to hear their concerns. He stated that the City of Hazard supports the concept of utility rate regulation and again thanked the Commission for being there. But he further stated that they oppose, however, the granting of the Kentucky Power rate increase in the form in which it has been presented.

He stated that the City does not reject the possibility of a rate increase of a reasonable size at an appropriate time. But the City cannot agree that this is a reasonable request and it is certainly not the appropriate time. He stated that Mayor Gorman had articulated the basis - a more full basis - of his opposition to this rate increase request in a letter to the Commission on February 8, 2010. He said he didn't know if the Commissioner had that copy and indicated that he had additional copies that he would like to leave if the Commission did not have a copy he would leave one at the end of his remarks.

He said the City recognizes the need for continuing adjustments based on the fuel adjustment clause. He stated that Kentucky has a very strong economy based upon for the production of coal, oil and natural gas and so they recognize that is appropriate. He further stated that a healthy local electric company is essential to every region of the Commonwealth but this request is untimely and unfair. He stated that first of all the current rate request is predicated on statistics from the time period September, 2008 to

September, 2009. If anybody has been paying attention in this country that is not a representative time period by any stretch of the imagination. He said that if you are able to cherry pick your data you can support almost any proposition. He said that the city of Hazard would request the PSC to exercise its discretion to postpone a decision on this request if that's possible for a period of 12 to 18 months to see what the 2010 numbers would show because there's a recovering economy. Alternatively the City of Hazard would ask the PSC to ask at the very least that the request submitted by Kentucky Power to be withdrawn and resubmitted on the basis of complete accounting for every year since the last general rate increase in 2005.

He said that the great recession is not a time to isolate and consider for purposes of determining whether there should be a general rate increase.

Next, if the PSC believes that it doesn't have any choice but to act now upon this rate request, then the City of Hazard believes that the PSC has the discretion to deny this request altogether because the current rate of return for that altogether for that period – 2008 to 2009 is not unreasonable under the present economic circumstances. He said that even today in the Herald-Leader it reported that Kentucky Power's revenue was down only approximately five percent during that time period. I wish we all were so lucky. They still had a revenue of 632 million dollars. They still achieved a three percent positive return on equity at a time when a lot of businesses were lucky to avoid bankruptcy. What answer would you get if you went today to your local banker and you asked him for a three percent interest rate on a simple certificate of deposit? You wouldn't get a very favorable response. This rate increase will add an additional 124 million dollars to a 632 million dollar base. That's an enormous statistical and significant percentage increase. Sometimes in negotiations you may ask for a loaf hoping to get half a loaf because half a loaf is better than none. But I really think that what Kentucky Power is doing here is asking you to turn over the keys to the bakery.

All across this country legislative bodies, the General Assembly, local county governments and city governments have been forced to restrain spending at this time and we would encourage you as the City of Hazard to use the same philosophy in evaluating these rate requested proposals that have been made. We also, the City of Hazard also opposes the requested rate increase because granting this increase will have a significant and substantial ripple effect throughout the economy. I know that you heard from the Kentucky Mountain Water District last night in Pikeville. We would only echo what they had to say but also point out that we have 8,000 water customers; we have 3,000 sewer customers. We've already estimated that granting this rate request would increase the water rate by \$16.24 per year for each water customer we have and \$16.08 per year for each sewer customer that we have. If you do not already do so, and I don't believe you do, we would encourage you to adopt a policy which would and implement one that would require any rate request to be accompanied by an economic impact study that not only addresses the direct effects of a rate increase but also considers the economic impacts of of of – indirect economic impacts as well.

Finally, we oppose this requested rate increase because no rate increase based upon any long term commitment for alternative energy infrastructure outside the Commonwealth of Kentucky ought to be considered without a thorough economic and policy analysis of why long term investments in infrastructure here inside the Commonwealth of Kentucky would not be a feasible alternative. I've looked at this proposal – hundreds of pages long. One of the primary reasons for this proposal is the expected anticipated costs associated with entering into a renewable energy purchase agreement for a twenty year contractual commitment to purchase power and to help develop a 22,000 acre project in Illinois. Now AEP also has similar investments in wind farms in Illinois, Indiana, Oklahoma, also in our neighboring state of West Virginia and in Texas.

Governor Brashear was here last week. In his November, 2008 Comprehensive Energy Plan, it says that that this administration is directed at making the Commonwealth of Kentucky a leader in every aspect of the emerging energy economy. The Kentucky Power rate request contains no data or analysis regarding the feasibility that wind or any other alternative renewable energy sources could be developed locally.

The City of Hazard asks that the PSC require the rate request to be resubmitted with a comparative analysis of the potential for investment in renewable energy infrastructure or operational changes here in Kentucky.

Thank you.

CHAIRMAN ARMSTRONG then recognized the County Judge of Knott County Randy Thompson.

KNOTT COUNTY JUDGE EXECUTIVE RANDY THOMPSON

Thank you Mr. Chairman. I am Randy Thompson from Hindman, Kentucky Knott County Judge Executive Thompson and ditto what Mr. Collins said. Very well stated sir. And I do too understand the reasoning behind asking for a rate increase being a small business owner myself and I understand that. Times require additional income from time to time but timing is everything and in my opinion, based on the current situation, addressing our local economy, out national economy, Kentucky Power's request for a rate increase, their timing is horrendous. Based on the situation the request occurred after the tremendous snow storm that we had, people were without power for several weeks. That being said, I do complement Kentucky Power's employees for the long hours and hard work and dedication that they did during that time period, however, I 'd also have to echo and agree with Judge Ward that had routine maintenance taken place prior to that that uh that outage may not have occurred. So in answer to the three questions you said to keep in mind earlier, my answer to all 3 of those is no.

Thank you sir.

CHAIRMAN ARMSTRONG then recognized Tim Bates of the Knott County Attorney's office

TIM BATES – KNOTT COUNTY ATTORNEY

Thank you I am Tim Bates, I'm the Knott County Attorney from Hindman, Kentucky and I would just like to reiterate the our formal protest that we made recently and just like to do that again. These are terrible economic times everybody has indicated that. It's the worst since the Great Depression. There's a lot of folks out of work; there's a lot of coal miners out of work especially in Knott County. The people are having to choose between food on the table or paying the electric bill. Those are the choices. People are cutting back. They're having to cut back. That's what people have to do when they're faced with such situation. I would like to pose a question to either you or AEP. Are they cutting back? Has a expert in efficiency of the operations at AEP, have they looked at the operations of AEP? Has an expert decided or given you information whether or not things can be done to cut costs? If you can cut costs or increase revenue, why can't costs be cut first? That's what I'd like to know. Has a report been done? Has it been provided to you? Has that report been made public? Will it be made public? Those are things that I am interested in. I would like an answer hopefully by the end of the night on whether AEP is doing like everybody else in eastern Kentucky. Are they cutting back too?

One more thing, that figure of 632 – is it million, billion? I forget what it was, how much of that goes went to salaries for AEP employees that are working overtime or had to during the snowstorm and how much is going to corporate bonuses to the higher ups? Those are just things I'm curious about.

Thanks.

CHAIRMAN ARMSTRONG then indicated that we would turn to public speakers who have signed up in the in which they order signed up.

CHAIRMAN ARMSTRONG then recognized the Judge of Perry County

DENNY RAY NOBLE –Perry County Judge Executive

I'm a workin' Judge as you can see, I've been down in the dumps today. I want to welcome you to Hazard and Perry County and thank you guys for coming. And I agree with the other Judges. We have had poor maintenance in eastern Kentucky. I think that if they had kept this maintenance up, I called several times in the area that I lived in as we saw the sparks come off the lines and before the storms hit and then you see all the power go ou. Judge Noble stated that he is a working Judge. He said that he agrees with the other Judge Executives that poor maintenance is a problem in eastern Kentucky. He stated that he had called several times in area where he lives because he saw sparks come off the line. He says that power goes out because of poor maintenance in this area. He said they wait until areas are down and call in and it costs millions of dollars to repair these lines. He says they should be kept up regularly. He said Kentucky Power could

save a lot of money by maintaining lines every day. He said they have thousands of petitions and there are lots more than that in his office. He stated he would give them to the Commission as he goes out. (information given to PSC staff member to be included in the record).

He said that the people in that area do not have jobs. Most of the factories have moved out and there are low income people. He said that if the Commission allowed this raise, the people will be without electricity and that a lot of people will freeze to death. He said if it were not for the coal companies giving people coal, you would see a lot of people freeze to death in the winter. He stated that he paid a guy's electric bill the other day. He said a lot of people just can't afford this now.

He thanked the Commission for coming. He said that if we didn't have coal mines, coal produces probably 90% of the power in eastern Kentucky. He asked if we didn't have coal and miners, what would we do.

He thanked the Commission.

CHAIRMAN ARMSTRONG then recognized Senator Smith

STATE SENATOR BRANDON SMITH

Sen. Smith stated that the proposed rate increase comes at a terrible time with the economy the way it is. He stated that in lieu of some of the problems from the winter power outage, the power was out so long and people that goodwill needs to be repaired in the community before rates are increased. He said people to feel like they're paying more for what they're getting. He said with the layoffs they are seeing their coalfields and the dollar becoming shorter and shorter to stretch as far as it can. He said it would be better to wait perhaps another year or so and let people catch their breath. Right now is not a very good time. He said he hadn't planned on speaking but he thanked the Commission for coming. He said he knows there is a lot of need – the power company has needs a lot of people trying to trim off some trees in his district. He said the hole in their sock today is bigger than it was yesterday.

CHAIRMAN ARMSTRONG asked if there were any other elected officials.

EDISON BANKS – COMMONWEALTH ATTORNEY LETCHER COUNTY

He thanked the Commission for coming to hear first hand from some of their citizens. When the power went off he had to camp out some of the period at his office and he started taking the calls. He said the phone was ringing off the hook – those that still had phones. He said that a lot of people, when the power goes off, they only had cordless phones. Thank you for coming hearing our citizens. Radio stations were off the air. They had very little information coming out at all. He said that's when they decided they were going to hold a public forum.

He indicated they have provided the Commission with a CD they had of the hearing with power company officials to answer questions and hear what the citizens had to say. They have also provided the Commission with some 300 questionnaires of families that told first hand of the problems that they had and their belief that the problems could have been if not completely alleviated, certainly power returned much sooner had their been routine maintenance.

He said that included in that, in Letcher County they have a high point on Pine Mountain at U.S. 119. On top of that mountain sits several towers. Those towers are their 911 services, state police fire departments, the cell phones. The electrician that is in charge of that site provided photographs. Mr. Banks indicated that that man said that for over 2 years he had made the power company aware of the photographs that you will see there – the power lines are literally in between trees - limbs growing all through them. If one of those towers were to catch on fire, short out, it would take weeks to replace and repair those.

He said that the other thing that came about at the public forum, the Lexington Herald has written a few stories about it. They keep saying it's a 24% but if you look, as we did, it's more like 35% that they're trying to pass on to the residential customers. And when asked to justify that, the forum it was said for too long the rest of the customers have subsidized the residential customers in eastern Kentucky. He said he was offended with that. Most people from eastern Kentucky would be. He said he had asked, aren't we the ones that have provided you with everything we have to offer – in terms of our loved ones that lose their life, our roads, our waters, giving you the coal so the entire state can have cheap and affordable electricity. He said he thinks it's the other way around. He said they have been subsidizing some of the rest of the area. He said but certainly they are not asking for charity.

He said we understand that you're entitled to make a profit but asked what is a reasonable profit. When asked and looking at the forms that they have provided they are still making a profit even under these current economic conditions.

He said that in his case, as a prosecutor, he has had to absorb a 25% budget cut over the last 3 years effective. They haven't seen a 3% increase. He said the staff in his office has not had a pay raise for the last three budgets and probably like most are not going to get one anytime soon. But yet the power company is not satisfied with a 3% profit. If that in this time is not a huge profit, he said he doesn't know what is.

He said in closing he said one of the things that has frustrated most of the residents the most is a belief that the power company can do pretty much what they want; and we know that's not true. That's why we have PSCs and that's why we have laws and regulations. But to the people of eastern Kentucky, and in particular to the ones that took time to fill out those questionnaires, they felt like that they're getting the run around. They felt like that their questions of why the trees were not properly maintained. In all of

those questionnaires, he said that he had yet to receive one that says oh they have more than maintained the trees and the vegetation in my area. They talk about lines that have not been replaced for years, poles that have been up since the '30's. These are unheard of. But that's what we put up with. It is not uncommon at all on a typical week to have your power go off. It is not uncommon every time there is an electrical storm to see your lights dim. He said that we feel like that there is work that needs to be done, we feel like that there are things that can be done and we believe that a profit is something that they're entitled to. But it should be reasonable, and it should be one that doesn't end up basically forcing us to go back to the dark ages -- literally.

Thank you.

CHAIRMAN ARMSTRONG then recognized Otis Thornsberry

OTIS THORNSBERRY (spelling?)

Mr. Thornsberry stated that he is from a Knott County and that he is a coal miner. He said that he is the little guy. He said he thanked the Commission for getting to hear from the little guys. He said he wanted to let the Commission know how the rate increase is going to affect them and how it is affecting him and his community right now.

He said he works in a coal mine but wages are down; coal is not that good right now. He referred to something that had been said earlier about choosing between the table and the power company. He said, I'm gonna' tell you you do have to make that choice. Here's the thing about it is, talking about the rate increase. In his community, for himself, he has a bill right now. He had to put food on the table so he had to be a little bit late on the power company. He said so he is late, he gets a \$300 fine, he said they call it deposit. He said some of his neighbors gets \$1,500 deposit they call it.

He said with this increase, they have to go back and just run the refrigerators. There's no way us little guys are gonna' make it. He said he really wished they would consider the little guys. He said they're struggling right now as it is in the coal countries.

He thanked the Commission for their time and asked that they please consider them.

CHAIRMAN ARMSTRONG then recognized Francis Begley

FRANCIS BEGLEY

Ms. Begley stated that she is a manager with Leslie County Farm Bureau and she was there on behalf of Leslie County. She said the crisis program paid \$700,098.20 for people who were going to lose their power within 4 days. Another program just for November and December alone paid electric bills for 1,401 persons, a total of \$252,014

to keep the children and the elderly people from freezing. She said there's no other money from the federals to help increase this. If this increase goes into effect, over 3,000 or more just in Leslie County alone children and elderly people will suffer.

She said she was asking the Commission for the people, how would you feel if this was your loved one or your children. When you make your decision, put your family in their shoes, and I know you'll make the right decision.

CHAIRMAN ARMSTRONG then recognized Charles Turner

CHARLES TURNER

Mr. Turner indicated he was from Hazard. He said that the Commission stands between them us and the monopoly, that's their job. He said we have this monopoly because they have to have power and the way that's regulated is through the Commission.

He said they have heard a lot about preventive maintenance and how it's not being done. He said he would suggest to the Commission that its' not being done on purpose. He said the company is asking for more money to maintain the lines that are not being maintained as they have heard. He said he would suggest that the Commission look in to that further because the easiest way for the company to get a rate increase is to say they need more money to maintain the lines.

He said, in other words, do your job. That's all we ask.

CHAIRMAN ARMSTRONG then recognized Deborah Campbell

DEBORAH CAMPBELL

Ms. Campbell stated that she was from Hazard. She stated that her electricity alone – she lives on upper second creek – was out 13 times in 1 year. She said that every time the wind would get hard, it would go. The trees had grown up until you couldn't see the lines in some places. She said they do not maintain the lines. She said her electric bill has increased now to where it was \$400 through the winter. People cannot afford this. And we do need your consideration and we do thank you for coming.

Thank you.

CHAIRMAN ARMSTRONG then recognized Carolyn Begley

CAROLYN BEGLEY

Ms. Begley said she wasn't sure if she was going to speak or not but she circled yes just in case. So she decided she would. She said first of all, the gentleman that said he was

small person, he was a coal miner, she said she would like to correct that. She said he's the big man on campus to her. She said the power company wouldn't have their jobs asking him to work longer to give him a raise. So if it wasn't for him, and people like him, we wouldn't be here with these lights on today. Referring to the gentleman, she stated so I admire you for risking your life to work in the mines.

Second, the gentleman from Knott County made a statement that really got her and she agreed with him. She said that she would like to know if the power company has cut back. Have they sacrificed any? She said she thought that was a really good question because she's surprised. She said she doesn't think they have. She said they should have made a profit – a bigger profit than they usually do because they've not paid workers to get out there and maintain their lines.

She said that when this storm went by, people in eastern Kentucky - Perry County especially because that's where she is from – we're proud people; very proud people. They got out, dug in the snow trying to check on their neighbors, trying to help each other. These old people that couldn't do anything; mothers with small babies wading through, digging through this snow trying to get these trees out of the way so the ambulances, all this could get to them. That is a dirty shame. Dirty shame. And she's not a politician; she said she doesn't normally know how to speak but she's doing the best that she can.

She said she feels like that if they had done their job all along we wouldn't be in this predicament. Just like at the house, right now. If I had done my job today, I wouldn't have to go home and do my dishes. They'd already be done. You know, that's just an example, small example. But she asked is it reasonable to ask for a raise? Not at this time. She said she works with an organization that goes out and helps their community. She said she knows that people don't understand just how bad some of their people, how hard they live. She said she went to a home that for heat this mother had a barrel in her living room with holes punched in it trying to burn – she had her furniture – burning her furniture to keep them warm because she couldn't afford to pay an electric bill. Well God forbid, how in the world is she going to pay one now if they raise it? This is not the time. Our people our senators, our – all of our people are working as hard as they can to get more jobs in here. They're willing to work – they'll work hard if they can get them. If they can get these jobs we'll be more than glad to pay more if we get the service. She said that's all I've got to say.

CHAIRMAN ARMSTRONG then recognized Chris Doll

CHRIS DOLL

Mr. Doll stated that he works at the Housing Development Alliance in Hazard. He said they are a community housing development organization. He said he has a great job. His job is that he gets to be the guy that tells their homeowners that they get to have a new house. They build houses for people that get anywhere from \$700 to \$2,500 a month

income; low income and working class people. As part of the process of getting this new house, they go over a new budget. They're going to be in the new house, this is their new house payment, this is what it's going to look like. The people that they work with at the end of the month on these budgets have such thin margins that out of the 20 houses they hope to build this year, a rate increase like this would knock a quarter of those people out of being able to buy a new house. That they are that thin at the end of the month that if they had to go up \$38.00, he said he would have to say, listen, it doesn't look like you can afford this now. That's his first point.

His second point was at the Housing Development Alliance they operate rental units in Perry County for low income people. Again, people that are making probably \$700.00 and less a month. And after paying our landlords insurance, all of their reserves, doing the maintenance, and all that, they are lucky if they lose \$100.00 a year. That's a good year for them. As a landlord, this sort of increase is going to make it that much harder to rent to low income people. And the people that were had \$674.00 month income, we're going to say, listen you can't afford to rent here anymore because of the increase in our electric. Our margins are that thin trying to rent to these people that any increase from the landlord's point of view is going to make it that much harder to serve low income people. And that's what he wanted to say. Thank you.

CHAIRMAN ARMSTRONG then recognized Mike Strickland

MIKE STRCKLAND

Mr. Strickland lives in Perry County. He said he is fortunate, he could afford a \$38.00 rate increase. Most of his friends that he knows can't. The only thing he would ask is a fair, reasonable, and just increase but one that's accountable. Hold them responsible for taking that money and making sure they do what they say they're gonna' do with it. Thank you.

CHAIRMAN ARMSTRONG then Sue Banks

SUE BANKS

Ms. Banks lives at 417 Hwy 2035, Whitesburg, Kentucky. Her next birthday she will be 68 years old. And the poles and the lines around her house, she thinks she is about 3 years older than they are. And the tree cutters when they do show up maybe once every 4, 5, 6 years, they sit in their car, truck, they play cards, they sleep, and they pretend to cut trees and trim brush and whatever. I have given some pictures of just within a half a mile of my house where when they had their big snow storm, the trees fell, and broke the lines and they were around 2 houses just close to her that she could see and the live wires were down around their house. The trees have, I mean, it's ridiculous. It's nothing but greed. I've said this before and I think he's heard me before, it's greed is all I know to call it because we're not getting anything back for what we pay. And they keep saying,

you know, that they're keeping us up. If we didn't pay our power bills 3 days later we would be cut off. They're not going to have that. They are still wanting us to pay. But I think we should have something to show for what we're paying. That's all. Thanks.

CHAIRMAN ARMSTRONG then recognized D.W. Bouchard

D.W. BOUCHARD – HAZARD-PERRY COUNTY COMMUNITY MINISTRIES

Mr. D.W. Bouchard is the Executive Director of Hazard Perry County Community Ministries. He said there had been a couple of people that had spoken tonight, the Hon. Judge Noble had mentioned they are low income people; a gentleman by the name of Thornsberry, he believes had talked about being the little guy. He said what they've also mentioned is that there's a great deal of turmoil within this section of the state. We are even in the best of times well behind those who can perhaps afford better cars or the vacation that they wanted. This is a poor neck of the woods and this is a very, very bad time. Community Ministries, the organization for which he works, has a certain interesting perspective on that. They run a number of programs within the agency and within the community, one of which happens to be day care center and transitional housing program but the one that deals with people struggling to pay for their rent, or pay for their electricity happens to be their shelter. They run a homeless shelter and it is the only homeless shelter in that neck of the woods as well. In addition to running the homeless shelter they also try and work to try to prevent people from becoming homeless. Last year they actually dealt with hundreds of people who had as one of the major contributing elements to becoming homeless is their rate of their electricity. They simply can't afford to pay their electrical rates. They actually for everyone they served there was one that they didn't; there was more than one that we didn't. They had to turn away hundreds and hundreds of people because they simply did not have the money. Last year and to give you an understanding as to what this downturn in the economy has done to the poorest of the poor, every year, communities throughout this country are asked to do something called a point in time survey. The point in time survey is a HUD – housing and urban development – United States Department of Housing and Urban Development – a mandated snapshot of a particular day; how many people are homeless within a community. The number of people – and this is done in an eight county area – Hazard and those surrounding, the number of people that were reported as homeless from last year to this year increased 146%. That's 146%, so we are talking about a concern about having these people who are already at risk – have more of those people at risk. So what we actually end up having is we actually end up having an organization that has made millions and millions of dollars who are being run by people with six figure salaries who are making a decision to pass what appears to be poor planning and questionable leadership having that passed on to people who earn just a few thousand dollars a year. It doesn't sound very fair, doesn't sound very just, and it certainly doesn't sound very reasonable. Thank you.

CHAIRMAN ARMSTRONG then recognized Rickey Harlow

RICKEY HARLOW

Mr. Harlow is from Knott County. He said he doesn't have all the facts and figures with him today that some of these people have brought with them, but he said he does remember a meeting in Letcher County where a gentleman stood up and said that residential electric customers have been subsidized for years by two other groups. And at that point in time, just a couple of months ago, he said those groups, they made 4% profit off of one group, 6% off of the other. I don't know how you get 3%, where I come from, 6 and 4 is 10. Now this is not from me, this came from one of them. Now he didn't have any papers with him and he wasn't looking at anything so he could have been just talking off the top of his head. I don't know. But we were supposed to believe that residential customers were being subsidized at a 2% loss. Now if you've got people running your company and they're willing to accept a 2% loss, maybe you need to fire those people and put in some people that know how to make a profit. Because I agree, every company needs a profit. You can't operate it without a profit. But when you look at me and tell me that I'm a 2% loss and then you're going to put a 34% increase on me, I'm smart enough to figure out that's 32% profit if I'm only causing you 2% loss. Now I don't see how that's anywhere just, or fair, or anything else. And as far as the trees are concerned, go home this afternoon, drive back down Route 80, which is the best road in our area, the power lines and the poles disappear. They don't; you don't see 'em, they disappear. But the trees. Trees have grown back since Route 80 was put in are 10 to 12 feet tall. There's trees that are 8 feet over the power lines that are the power lines that was put in beside of Route 80 which means those trees were never cut period – let alone come back we didn't do maintenance or we did do maintenance we just haven't got to this area yet.

Over where I live out on Wylie Fork, they just put in new lines. They cut those trees back to where the poles go and they drill. And they put new poles, new lines and everything. And I really appreciate it. I don't get my power from that section it comes in from the back side, but there were no trees cut behind the power lines. So there again, why did we cut those trees? If we're putting in new poles and new lines why weren't those trees cut? But they were left there. So when the snows came, guess what? They fell on the lines. So when someone gets up and stands and tells you we have maintained our lines we have done this we have done that just drive down Route 80 between Hazard and Hindman and follow the electrical lines and look at them. How come the telephone poles didn't have the same trouble with the phone lines that the electric company did? I lost power for 4 or 5 days at my home. Didn't lose phone service. They run along the same side of the road, in the same directions. The telephone poles run right down through there except they maintain their lines a little better. And I'm not saying anything for that I just think that they beat the power company.

I do not think a 33% or 34% power increase is anywhere near just or fair. Thank you.

CHAIRMAN ARMSTRONG then recognized Jim Wooton

JIM WOOTON

(He has photos)

(Mr. Wooton handed one of the Commissioners an Exhibit).

Mr. Wooton is from Hyden in Leslie County. He doesn't think the rate increase is deserved, he doesn't think it is needed, and he doesn't think as a region they can afford it.

He referred to the photographs he had handed one of the Commissioners, indicating that if you look at photos, a lot of people had mentioned line maintenance, cutting the trees. He stated that he lives along U.S. 421, a federal highway, it's the main artery going from Hyden, county seat of Leslie County to Harlan, the county seat in Harlan County. It's a much traveled road. In the spring and summer of 2009, they maintained the lines. They cut a lot of the trees and a lot of the brush. You can see from pictures 2 and 3 some tree stumps that were left. You can also see the picture of the tree that fell across the line. If there was a tree on that bank that needed to be cut that was it. It's rotted, it's split, it was left. So even though they performed line maintenance in my area, less than six months before the outage, it was a poor job. He doesn't think it's deserved on that basis.

He said he doesn't really think it's needed. He said he got on the internet on the website of forbes.com. He said it's his understanding they are the business experts as it relates to Wall Street. The CEO of American Electric Power which is the parent company of Kentucky Power is a gentleman named Michael Morris. Mr. Morris' compensation package – salary, bonus, stock, for the last fiscal year is \$9.9 million. The average compensation package for every other utility CEO – the average – is \$5.02 million. The CEO of this company received almost twice the average CEO of other utility companies. So given that fact, I don't think it's really needed. Of course the CEO's the top dog, he's going to make the most money, but I think that we can safely assume there's some other pretty high officials that are making some pretty good money. In the five years that Mr. Morris has been with the company, his total compensation is \$47.7 million in salary, bonus, and stock. He's been there 5 years and that's his compensation.

The third point that we as a region I don't think can afford this, there's a handout there that was downloaded from the ARC website. Appalachian Regional Commission it's a federal agency. If you'll look at the map, every county in eastern Kentucky is classified as a distressed county with the exception of Pike County. What is a distressed county? Well there's 3 criteria. They look at your average unemployment, they look at your per capita income, they look at your poverty rate. Now I didn't sign in as a county official, but I am one. I'm from Leslie County. I'm a PVA. We deal with property taxes. I'll give you the statistics for Leslie County which is one of the 40 poorest counties in the United States. The median income in Kentucky is \$52,000. In Leslie County it's \$22,000. the poverty level in the United States is 13%. In Kentucky it's 17%. In Leslie County, it's 31%. Unless you've been living in a cave the last two years, you've heard

that stricter environmental enforcement regulations are going to drive up the cost of coal. That means the cost of electricity is going up.

I see my time's up. I'd just like to say I don't think we can afford it and the timing's bad. Thank you.

CHAIRMAN ARMSTRONG then called the name Sandy Thompson; Sandy Thompson – or it looks like Sandy Thompson, P.O. Box 505 Hindman, Kentucky

VOICE FROM AUDIENCE: That's Randy and I've already spoken but I'll talk again if you want me to.

CHAIRMAN ARMSTRONG then called recognized Tammy Nevarez of Middle Fork

TAMMY NEVAREZ

Ms. Nevarez said she is from Viper, Kentucky, Perry County. She said first of all she'd like to say I think we need to give respect where respect is due, and I've been watching gentleman over there on their cell phones giving text messages which I think is inappropriate considering you told us to turn them off. So it would be nice to know that your respect us as well as we respect you.

OK. As you all are aware, unemployment's on the rise, there was no increase in social security this year for people on disability or retirement social security. There's no cost of living increase there. The cost of gas is increasing, the food prices skyrocketing. Our church alone in 2009 fed 1,640 people food boxes. Now there is a need for this in our community. There's poverty everywhere you turn. If you guys don't see people coming in and they can't clothe their selves, they can't clothe their children, they can't put shoes on their children's feet, they're having to come to our church to get food, because food stamps don't cover anything. You can't get medical care if you're over 18 and you can't get a job and it's just unbelievable. How do you expect the general people to feed themselves and do the things that they have to do on a daily basis if you increase this? Myself, I cannot afford a \$38.00 a month increase. I would have to shut my phone off or something. So I'm talking from the general population what I see coming in and out of my church as far as who needs to be fed. If that was a 400% increase from 2008 because I did the tabulations on that for my church. If that went up 400% in one year, what is it going to go up from this year? 1,640 people – men, women, and children that we have fed. How can we take this increase?

As you see on the news, we've got this VAT tax proposal. We got mandated health care for the first time in the history of the United States of America. They are breaking the backs of the American people. Why do we need that when we're at home? We need to be able to sustain our families. We cannot sustain our families with increased proposals on every direction. This is not fair to the American people. This is not fair to the people of Perry County or any other county in Kentucky. And I don't know what the problem is

that people cannot see that. But we need to think about that. If we've having to feed that many people, then where is their electric bill coming from? I mean, they can't take that increase. And I wish you all would understand that. They can't clothe their kids. You look clothed fine. You know, we need to realize that there's that need. 38% these people, these children are gonna' be without heat. They're gonna' be without a fan to blow on them in the summertime. We have a food program in the summertime that feeds kids because they lose weight during the summer because food stamps won't cover that. And so if food stamps don't cover that then the church picks up. OK, so if we feed children because they're losing weight, how are their parents going to afford an electric bill increase? I'm looking at it from that perspective. There is no justice there. There's no justice at all. And that's what we're known for in the Untied States of America – to give people hope, to give justice. I mean, how can we sit here and say that this is normal and this is good? There's no justice there. Let it go and let the country get back on its feet and let the state get back on its feet and then think about that. But right now is not a good time to do that. And you're just gonna' break the people and like these other people said, they're gonna' have to choose between food on the table or taking their medication or paying their electric bill. And it's just not right what they're tryin' to do.

Thank you.

CHAIRMAN ARMSTRONG then recognized Wayne Fleming

WAYNE FLEMING

Mr. Fleming said he is from Jenkins, Kentucky. He said let me tell you about a compensation package. Compensation package in his community when the power went off was a widow woman that draws \$580 a month. Her power bill was \$230 of it. She's raising 4 grandchildren. Now that's a compensation package. The power company does not care about these people. We could make a Christmas Carol movie over again. The power company would be the Scrooge. My neighbors, I've got 64% of my community is retired people. Some of my neighbors went 10 days without power. The power company did a calculated gamble on cutting trees and doing their right of ways. They went nearly 10 years and did very little of nothing. They got caught; they got caught with their pants down this year. But the ones that suffered were our people. Our people suffered. They lost everything they put up – their crops, they put in their refrigerators, now they're losing their motors on their appliances and stuff but that was due to brown out power, nearly no power. This is the wrong time like the lady just got done saying, there wasn't no cost of living increase for social security or the veterans. Them people has suffered and them is the most honest people they are. They are the ones that pay the bills. The rich people, them's the ones that won't pay you brother. It's the poor people that pays you. You could be them people's savior now. You've got an opportunity it's up to you. You've got the opportunity to say no to the power companies. No to the \$9 million compensation packages. Please, please for these poor people's sake, help us.

CHAIRMAN ARMSTRONG then called Shelby Amburgey

SHELBY AMBURGEY

Mr. Amburgey said that he lives in Knott County and that he is presently President of the Knott County Chamber of Commerce and he just has a few comments and he will be brief. He said that he believes that back there in January, when the economic factor went sour, I believe our Governor and many of his staff took a 10 % decrease in their salary, I believe I'm right on that. And they talked about the tree trimmers. My first job was 600 miles from here in Newport News, Virginia, Asplundh tree expert people, 85 cents an hour. That was 1952. So at this point, I would urge the Public Utilities Commission to vote no and say no to any rate increases whatsoever and let that be for several years, maybe 5 years down the road. So I thank you for your time and I want to thank Hazard Community College for hosting us here and thank you so much. Thank you again.

CHAIRMAN ARMSTRONG then recognized Roger Martin

ROGER MARTIN – FINANCE OFFICER LETCHER COUNTY BOARD OF EDUCATION

Mr. Martin indicated he was Finance Officer for the Letcher Board of Education and said that he would like to speak to the Commission with regards to the financial hardship that the rate increase would cause on their school systems. He said that he had been finance officer in either Knott County or Letcher County for the past 30 years and this is probably the hardest economic times that he's seen in those 30 years for a school system. He said our legislature has met and they haven't been able to come up with a budget, but I'm sure that when they go into special session they will have a budget but whatever it is it's not going to be very pretty. It's not going to be very good. And it's really going to be a hardship on school systems in particular that most school systems in this area derive about 70% of their income from state funds.

The utility bill that we expect to pay Kentucky Power from Letcher County schools alone this year is \$720,000.00. Now that's a whole lot of money. And any increase you know, I've written some numbers down here whatever the increase may end up being, hopefully it won't be any, but I've heard numbers such as 35% increase and that alone would be an increase of \$252,000.00 to our school system. A 30% increase \$216,000, and down to a 15% increase \$108,000.00. Now what this is gonna' do, I mean, you know, we're going to have to operate, we're going to have to heat our buildings, we're going to have to do whatever it takes, you know, to keep the power turned on. And most of our schools in Letcher County are heated with electric. You know, it's gonna' cause us to have to decrease our instructional services to our children, and, you know, we don't want to do that but you know, that's the bottom line. For the most, as operating expenses go up, then instructional services has to go down, teachers have to be laid off, all of that which has a negative impact on on our County and our area. And I thank you for your time.

CHAIRMAN ARMSTRONG then indicated that that covers the people who signed up to speak tonight. Are there any individuals who came in late that would like to speak and come forward?

DREW BEARD

Mr. Beard stated that he is from Perry County. Thank you for letting me speak. My question is I would like to know if the power company has checked into hiring their own crews to clear the right of ways instead of farming it out to the company, you know, to the tree cutting companies. If it would be cost effective to hire their own crews. It seems to me the last few years the service has went down because when we have a bad storm, they have to put all these crews in from Florida and Georgia. I'd like to know if that's cost effective. By the time you pay all that overtime and travel time and motels, and all that, you know, I'd just like to know if a study's been done about that. Thank you.

CHAIRMAN ARMSTRONG: Thank you.

MR. BEARD

Personally, I've had a tree on my line for the last year and I've called twice and it's still there. And they say call us back when your power goes out.

CHAIRMAN ARMSTRONG:

And again I want to remind everybody that the officials from Kentucky Power are here and will be available for those kind of questions and again across the hall for the billing questions you may have. Anyone else who's come to the meeting who like to be heard now?

TRUMAN HURT (?Spelling? Urp?)

Mr. Hurt (?spelling?) from Montgomery Creek, Perry County. Mr. Hurt (?spelling?) said that he is a disabled coal miner. He said he'd like to oppose the rate increase, he said I think it's a bad time to do it. And I don't believe that all of that would be necessary, but it seems that we're being charged for mismanagement of the company and some of the tree cutters were up on my creek a week or two ago and I know they've cut trees that were 20 and 30 years old. And there were very vast amount of trees to be cut and that should have never happened. And that surely raised their expenses. When a tree knocks down the line it will often break several ___?___. And we saw that happen on Montgomery Creek. I think that that utility companies in this state are the ones that block bills that could have required investments in energy efficiency and I think that that would be good for our energy company to do and best in energy efficiency for poor people and

they blocked some of those bills that we would have had passed for that purpose. That was supported by KFTC and many of the groups who were building affordable housing and helping low income housing. And I think that would be a good thing for the power company to do, to maybe some of those people could do up with a little less than those million dollar compensations, and give the people a little more break. Thank you for the opportunity to speak and I hope you'll consider what they're doing. I'm sure some of those people with those large incomes could do with a little cut before the poor people would be asked for a increase.

Thank you.

CHAIRMAN ARMSTRONG then called if there were other speakers

ADRIENNE BUSH Adrian Bush Hazard/Perry County Community Ministries

Ms. Bush said she worked with Mr. Bouchard. She said he talked about the plight that people who are homeless and are at risk of homelessness face and what they will face if this proposed rate increase goes into effect. I would also like to point out, being the more pragmatic person of the two of us, that as a small business employer we employ 50 people, which, yes, that's small, but as you've heard a lot of people say in this room tonight, one thing we are lacking in this area are jobs, especially right now. And I can tell you as a small business, and a non profit, we plan our budget very very carefully for 2010, and we will do so again for 2011. But I can tell you that we did not anticipate a 25% rate increase when we were planning our budget for 2010. And I don't, I'm not the CFO, I was very impressed by the Letcher County Board of Ed's representative's numbers. We have 4 different locations. We pay AEP for all of those, you know, electricity bills. It will impact us very greatly, I mean, we're talking again about the hundreds of thousands of dollars and when we are forced to make that choice between paying AEP keeping our operating costs keeping our building open, keeping our buildings open, that's less money that we can give and that we can help and we can help other people and serve other people. And then we're failing our mission to be perfectly honest because we're paying exorbitant costs to AEP so that their CEO can make \$9 million a year. That's all I have to say.

CHAIRMAN ARMSTRONG then indicated if there are no other speakers, I'm going to at this time thank you all for coming tonight and participating in this public meeting. The Commission finds these meetings very informative and knowledgeable to help us to acquaint ourselves with actually what's going on on the ground here. So I thank you. This has been a very valuable experience for us. The three meetings we've held here in the area regarding this rate increase. I want to urge you to be drive careful going home tonight and thank you again for coming. And the information I've given you with regard to the timing of the hearing. The access to our website, and I hope you will take up the

offer of the Kentucky Power to meet with them on questions you may have and also check your billing service.

Thank you once again. We're adjourned.

Re: Kentucky Power Co.
Application for 35% Residential Rate Increase
Case No. 2009-00459

Dear Chairman Armstrong:

On 29 December 2009 Kentucky Power Co. filed its initial "*Notice to Customers of Kentucky Power Company Proposed Changes to its Base Rates*" wherein a 35% rate increase was sought from the customers of the power company. This "*Notice*" came while thousands of residents throughout Eastern Kentucky remained without power due to the many broken power lines, power poles, and damaged transformers caused by a snowstorm that began around 4:00 p.m. on 18 December 2009 and continued until 19 December 2009.

During the power outage the residents of Eastern Kentucky were literally left in the dark as little information came from Kentucky Power Company as to when service would be restored or what areas the out of state crews were scheduled to work in. I can personally attest to the inability to obtain any information or to speak with a live person concerning the power outages.

I personally attempted to contact Kentucky Power Company for three days and each time could not get past a recording stating "due to heavy snow and massive power outages, all of our crews have been dispatched to West Virginia." When I finally did reach a live person on 22 December, they were in Arkansas and advised that they were aware of the problem and nothing more.

During this time, I received numerous phone calls from sick and elderly residents who called me in desperation after being unable to speak with anyone at Kentucky Power. Several of these callers advised me of downed lines, some of which were hot. Nearly all indicated that their power had been lost due to trees well within the right of way of Kentucky Power Company falling on the lines, causing lines and poles to snap.

Because of the wide spread belief of the residents of Letcher County that the power outages were mainly caused by the failure of Kentucky Power Company to maintain its right of way and to replaced poles and lines that are in many cases 60 years or more old, I requested that the Letcher County Grand Jury conduct an investigation into this matter. In order to begin the investigation I prepared a simple questionnaire to get some idea of the cause of the power outages, if known, the duration of the outage, and the hardship and financial losses attributed to the power outage.

My questionnaire also asked if the individuals were aware of any maintenance performed by Kentucky Power Company within the past year. I also arranged for a public forum to address these concerns in which several of the local elected officials, volunteer fire departments and rescue squads and representatives of Kentucky Power Company were invited.

Following two cancelations due to weather, the forum was held on 22 January 2010 in the Letcher Circuit Courtroom. As reported in the local press as well as on WYMT TV 57 and WKYT TV 27, several hundred residents filled the court room and overflowed into the hallways and stair wells to voice their concerns over the loss of power and the widely held belief that the power outages are directly attributable due to the negligence of Kentucky Power Company in failing to properly maintain its right of way and equipment.

Enclosed are approximately 200 of the completed questionnaires received to date along with a video of the public forum held on 22 January 2010 and a few of the photographs I have been promised by several individuals. Although the investigation of the Letcher County Grand Jury is on going, I believe the findings of the Grand Jury will be entirely consistent with the statements and conclusions reached at the public forum.

Specifically, Kentucky Power Company specifically denies any fault or negligence in the power outage. According to the President of Kentucky Power Company, Mr. Timothy Mosher, the power outages and resulting hardships on its customers, including all financial losses, were the result of "an act of God." By sharp contrast, the several hundred in attendance and those who completed the questionnaire all attribute the power outage to the lack of proper vegetation control and maintenance of the equipment and right of ways of Kentucky Power Company.

Mr. Mosher also took the position at the forum that Kentucky Power Company acted entirely reasonable when it diverted the available linemen in the AEP coverage area closest to Eastern Kentucky to other areas including West Virginia and Virginia as the weather forecasts did not predict more than 2-3 inches of snow. By sharp contrast, representatives of Emergency Management and local officials stated at the forum that they had met as early as 4 days prior to the snowstorm as the National Weather Service was predicting 10-14 inches of wet, heavy snow for all of Eastern Kentucky.

Mr. Mosher also claimed that the approximate 35% rate increase currently sought from residential customers in Eastern Kentucky was more than justified as the commercial customers and other customers of the parent company American Electric Power (AEP) have long subsidized the cost of providing electricity to the residential customers of Eastern Kentucky and that the profit earned from residential customers was approximately 2.3% less than the actual cost of service.

I, along with the vast majority of the customers of Kentucky Power Company would sharply disagree with this position as the residential customers, nearly all of whom

are on fixed incomes and can least afford an increase, and certainly not a 35% rate increase. Furthermore, I would also take exception to Mr. Mosher's belief that the power bills of the residential customers of Eastern Kentucky are long overdue for a rate increase due to our power bills being subsidized by the other customers for it is our roadways, our water ways, streams drinking water and other natural resources that are most affected by coal mining operations. We are the ones who suffer from black lung disease and mining fatalities.

Without our contribution and the coal mined from our region, there would be no Kentucky Power Company. To my way of thinking, the citizens of Eastern Kentucky have more than contributed our share to the "profits" earned by Kentucky Power Company and AEP.

I wish to thank you and the other members of the Public Service Commission for taking the time to thoroughly investigate Kentucky Power Company's application for a rate increase. To the extent possible, I believe this matter can best be investigated by the Public Service Commission coming to Eastern Kentucky to see firsthand and hear directly from the residents effected by any rate increase their opinions of the cause(s) of the recent power outage, the poor condition of many of the power poles and lines and perhaps most importantly, the obvious lack of proper right of way maintenance by Kentucky Power Company.

Sincerely,

A handwritten signature in cursive script that reads "Edison G. Banks, II".

January 15, 2010

Dear Sirs:

It has been brought to my attention via the Lexington Herald Leader report "Kentucky Power requests 35% rate Increase" published December 29th - Kentucky Power has submitted a request for consideration of rate increase to be effective January of 2010. I humbly request you decline the rate increase on behalf of the citizens of Kentucky until a full review and financial audit of KP's operational and fiscal practices is completed. The audacity of such a request is galling, considering the current circumstances of Kentucky's overall economic crisis, KP's lack of reliable service maintenance and general operational procedures with coinciding service outages. At the exact moment of KP's 34.5% rate increase request many of the 20 Kentucky counties KP boasts as "serving" were without power. Of the 175 thousand total persons served by KP within Eastern KY, more than 75 K found themselves rendered powerless after a December snowstorm merely one week prior to the request. Many citizens remained without power for more than 14 days, forcing the closure of schools, businesses and churches - grossly affecting the regions ability to generate viable income while consecutively burdening cities, counties and citizens with increased expenditures impossible to have foreseen in their yearly budgeting estimates. Currently Pike County Judge Executive Wayne T. Rutherford has launched legitimate claim against KP for the extended outages. In addition the Pike Co., Fiscal Court has now taken initial legal steps necessary to seek reparation from KP - the party they claim most responsible for the extended service failure. These facts are the ones that should be the most relevant in your consideration of the rate increase request.

The request itself proves that KP is void of consideration as to the financial reality Kentuckians currently face and their culpability in the greater hardship placed on citizens due to their purported malfeasance.

Specifically Eastern KY and the 20 counties served face a financial impact greater than any other Kentucky region. Currently, Kentucky's unemployment rate has reached a 30-year high; our poverty ranking is 23.5% an increase from 15.3% in 2001, while numerous reports detail a significant increase in food and nutrition service and utility payments aid. Of Kentucky's 120 counties, easily the 20 counties served by KP face the most disparaging economic outlook. This fact, KP is well aware considering the length of time they have operated in the region. The amount of the increase is worth note too; the request represents a minimal \$40.00 per month increase to consumers who reside in a region currently struggling to meet monthly utility

payments. This grandiose rate increase is preposterous if one simply evaluates the facts.

I have reviewed KP quarterly operating budgets and AEP annual financial statements and without boring you with the details it is apparent that both AEP and KY Power currently maintain a positive operating budget.

Fourth quarter reporting will likely reflect a negative operating amount due to the prolonged outage's affect on monthly billing totals resulting in a significant decline in overall proceeds. The rate increase and reduced billing in conjunction with a request for rate increase is a correlation too obvious to be considered coincidental. In other words the citizens of Kentucky are being charged for KP's inability to provide reliable service. It is that simple.

I would like to refer to KP's own statement included in the rate increase request: *"The increased costs of doing business, including those for operations, safety, equipment, materials, supplies and labor – not to mention the ever-increasing costs of meeting environmental and regulatory obligations – have all risen since our last rate case. We cannot sustain the reliable level of service that our customers expect with our current rate structure and that has necessitated this filing," said Tim Mosher, president and COO of Kentucky Power.* What Mr. Mosher lacks to clarify in his statement is that each of the reasons provided to justify KP's request of a rate increase are results of poor internal operating (maintenance) practices rather than outside factors as he eludes. It would be a far more convincing statement if KP were credited with having provided reliable service first.

The mission of the Public Service Commission is to *"foster the provision of safe and reliable service at a reasonable price to the customers of jurisdictional utilities while providing for the financial stability of those utilities by setting fair and just rates, and supporting their operational competence by overseeing regulated activities."* Clearly the requested increase does not meet the standards as set forth by the PSC.

Thank you for your consideration.

Respectfully,

Dea Riley

Dear Mr. Banks:

I regret I am unable to attend the Public Forum on January 12 due to the Legislative Session in Frankfort. The December snowstorm left thousands in our area without power, and a declaration of emergency was signed by the Governor to provide assistance to those counties affected by the storm.

The concerns about the maintenance of the electrical lines along the rights of way by Kentucky Power have been brought to my attention by many folks. In addition to the Governor and the Public Service Commission addressing this issue, I stand ready to assist in any way I can.

I look forward to learning of the results of the Public Hearing. As always, please do not hesitate to contact me whenever I may be of assistance.

Sincerely,

Leslie A. Combs

Dear Mr. Banks,

In the aftermath of the December 2009 snowstorm that left more than 100,000 people – including 7,000 in Letcher County – without electrical power, Governor Steve Beshear traveled to Eastern Kentucky to survey the damage first hand. I accompanied the Governor in Jenkins as he reviewed the damage caused by broken power lines there.

The Governor is concerned that at least 16 counties were declared in a state of emergency and that National Guard troops had to be sent to the region to remove fallen trees. Many of Letcher County's residents have expressed concerns, questioning whether Kentucky Power is maintaining electrical lines to keep trees from growing into them. However, Kentucky Power contends that most of the trees that fell were not in the rights of way.

Naturally, both the Governor and I are concerned that the heavy snow and falling trees resulted in such destruction. The Governor indicated that he would bring the issue of the trees in the rights of way to the attention of the Public Service Commission. The PSC could conduct its own investigation if it deemed it necessary.

I will stay in contact with the Governor and will keep you apprised of any developments as they become available. As always, if I can be of further service, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Johnny Ray Turner".

Dear Mr. Banks

4-12-10

I am not able to attend the meeting about the electric ~~bill~~ bill. But I want to reject to them about raising the bill up, I am on a fixed income and I just draw \$674.00 a month. My light bill now is almost \$300.00 a month.

I can barely make it now as it is with gas so high and I have other bills too.

I live on Bottom fork and the the trees are covering the power lines and haven't been trim in years. When the power went out in Dec. I had no electricity for 6 days and I didn't have no way to get heat for my home. I have 2 grand kids that stays with me and we had to stay cover up with blankets and I didn't have a phone either where it was cordless it didn't work. I also lost all my food in my freezers.

RE: Account [REDACTED]

To Whom It May Concern:

I am reviewing our electric account and am very puzzled by some things. I thought I would write and let you know I have these nagging questions in hopes that you might could enlighten me on the particulars.

First of all, how can a home be virtually closed down for ten days out of a month and it not lower their usage? I can't for the life of me understand that. We were gone for ten days during November-09 and everything in our house was turned off and the heat was set on a very low setting and yet we used more electricity in November (remember November was rather mild weather) than we did in October. Oh yes, and we had new energy-efficient windows installed in the majority of our house at the first of November which were guaranteed to save us thirty to thirty-five percent on our electric bill.

Second of all, we were without power for seven days during December and there wasn't anything on in our house. It didn't seem to make a whole lot of difference.

Also, I don't understand the huge jump in our usage during the winter. Our heat pumps are on all year. We run them on air conditioning in the summer. If they are running either on air or heat it doesn't make sense to me that heat should cost three or four times more than air conditioning.

Page 2

We were gone ten days in April and our bill was higher in April than it was in May when we were home the entire time.

I have long been of the opinion that you charge people what you think they should pay instead of what they actually use. The recent issues that I have outlined in this letter only increase that belief.

Sincerely,

A handwritten signature in cursive script that reads "Donna Mullins".

Donna Mullins

de

2-5-2010

To Whom It May Concern:

On 2-4-2010, my mother, Betty Wise, received her electric bill. Her January bill had increased \$24.00; however, her usage had decreased from the previous month. She contacted AEP on 2-4-2010, the AEP employee confirmed her usage had decreased but told her the 34% increase had been applied. Mom told her that her understanding it was to increase until July. The employee was silent a minute & then replied we sent out the notice & we are allowed to increase on

On 2-5-2010 I received my electric bill. I noticed my usage had went down but my bill had increased. I called AEP & spoke with a woman. I explained my usage had went down but my bill had increased. She didn't reply. I then asked was the 34% increase reflected on this month's bill. She answered yes. I asked when was the rate applied & her response was 1/29/2010. I asked if the rate increase not supposed to occur until July. I told her the county had held an open forum with AEP & it was understood that the rate increase had not been approved. Her response back to me was "the customers" didn't control them & couldn't dictate the rates.

Dec. 30, 2009

Commonwealth A.H. Long

I would like to state my concerns about the service a lack of service from Ky. Power Co.

The hollow in which I live is very isolated with only a few families. Our power goes off constantly. Even in the summer the wind can blow & our power goes off.

The lines in this area & poles & transformers are probably 60 years old. The power lines are so old & splined so many times they break with the slightest movement. The wind protection installed in the 1950's & hasn't been upgraded since.

This last outage lasted 7 days. About 2 weeks ago I was without power about 3 days.

On 3 different occasions this past year I have had to throw away all the food I had in my Refrigerator. It was spoiled due to lack of electricity. The power has probably been off ²⁰⁻³⁰ ~~30-40~~ times in the past year.

Many times KPC will restore power to within a mile or so of where I live and it will be 2-3 days later before we get our power restored just because there aren't many families here. I have been told that even if we are the first to have power they leave us the last because the more populated areas come first.

On 1 occasion they had my TV put a breaker in to reset power & couldn't do it for a couple of days.

We have even had them when power lines are down and they still won't come out to work on it. On one occasion I look and see it for a day or 2.

I have complaints about the poor quality of service we receive but since we have been in our area since the

L. Cam
Amos R
tsville, KY

I realize that the last snow we had was
very heavy but if the power and lines were maintained
properly it should have melted a day or so before
power was restored not 7 days. I had to be away from
my home during the Holiday because without Electric
I had no heat. Also this was not an isolated incident
it happens all the time.

Thank You
Connie Lynn

These are Tress and Vines That
Always take over and run up
the light post every year. Since I
have lived here since, 1991 until now,

Wilma Hall
5436 Hwy 805
Upper Heymond.

My electric cable was still
attach to their pole after it fell
and pull my post down. Then the
Volunteers came and removed it from
my post and took it and tape it to
my power post that broke.

They was the two main live laying
up the creek for day before any one
came in to move them and then they
took them to another property that nearby
me and I took them back up and ran me
a live to the broken pole & left it. until
I was able to get one.

Wilma Hall

Taken on Christmas Day they moved
The Transformer.

This is how the creek was left
and still remain the same today
after Ky power (Friday 22nd 2010
left off the scene
Dec 25th 2009

They are enough debris left to cause
a lot of damage if the flood waters
get up to my land and to other below
me. They are tree limbs
Ky power top of their
post that fell, the tie
wires they left
in the creek. Tangled
all together.

Celema Hall
5436 Hwy 805
Waymond, Ky

This was how it look before
They cut the tree up & left in the
Creek.

This is the transformer that fell
from the power pole after it broke
& fell down in the edge of my resident
plot back.

This shows when my electric cable
to my power pole still attached to
there pole after top is gone.

This check mark if you
can see it is where the top
of Ky power pole still lies in
the creek on Friday Jan 22, 2010.

This was where the pole went down
on Saturday Dec 19th 2009, power went
off Friday night early on Dec 18th and stay
off all night.

on Dec. 18th the Power went off
& did not come back on until Dec. 25th
we had gone to our daughter's house
because we had no water or Power.
A neighbor called & told us the Power
was on. we came home on Dec. 26th
Our lights were very dim.

I checked the breaker box & there
was 238 Volts on a 110 Circuit. the
main Power had been turned on
& a tree was laying on the line
out from the house. the line was
broken & on the ground.

my wife called the Power Co. & was
told to turn off the main breaker
at once, which I did.

About an hour later the Power trucks
came & repaired the line. When
the Power was turned back on
these Appliances were out.

a microwave

stone oven

Computer

2 telephones

fax machine

basement ~~refrig~~
refrig.

we lost about
\$200.00 worth
of food

COMPLAINT FORM

Name: Courtney Baker Phone: [Redacted]

911 Address: 3197 Hwy 803 City: Millstone Zip: 41038

Mailing Address: City: Zip:

Name of account holder with Kentucky Power: Kevin R. Baker

How many members in your household? 3 Ages: 33, 29, & 4

Do any members of your family have any special needs? YES Please explain: My son has Asthma and we were unable to use his breathing machine during the power outage.

What date did you lose electricity? Friday 12/18/09

What date was your electricity restored? Thursday 12/24/09

Do you know the cause, if known, why you lost power? YES Please explain: Trees had fallen on the lines in several areas due to the heavy snow.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? YES Please explain: We lost all our food in both our refrigerator/freezer and deep freeze. I was unable to give my son any breathing treatments as well. A trip to the doctors arose from this situation. Copays + meds.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the past year? YES Please explain: Asplundh was in our area a few weeks prior to this power outage. The trucks were parked along the road no sign of any workers. AEP replaced line earlier in year due to prior outage.

Additional information or comments: We have lost power on several occasions due to the weather causing trees to fall across the lines. Maybe there should be a law requiring AEP/landowners to rid the right of

Signature of person completing form: Courtney Baker

Signature of AEP account holder: Kevin R. Baker

way of trees and debris. Perhaps an incentive with a lower bill for a month if landowners remove the trees. AEP could hire contractors who are dependable to rid the trees as well with the amount they charge the customer. I would also like to state that my power bill for December increased more than \$50 however I did not receive service for (b) six days. How could this be?

Additional information or comments: While the power was out I did lose some groceries. I also had to take what money I did have and buy a kerosene heater and kerosene. Even though my power was restored before some others, I still didn't *use reverse side if necessary

Signature of person completing form: Lisa Burke

Signature of AEP account holder: Jesse L. Burke

have the money to put on the purchase of a kerosene heater, I had to buy it because I only have electric heat & I didn't know exactly when the power would be back on. I had called the power company early Sat. morning Dec. 19 and they told me it would not be back on until the 27th and that is why I went ahead & bought the heater. My main problem with the power going out was my father's health. He has been sick for the past few years and he became deathly ill in early Dec. He came home after spending over a week in the hospital. He has been using an oxygen machine 24/7 for over 2 years now. When he came home from the hospital this last time, his doctor put him on a BiPAP machine. When Home Health brought the BiPAP machine to his house, they told us they had turned his name, address & health problems into the electric company. That way when the power went out the power company would know to come work on getting his power turned on quickly because of his health. Not only is he on the BiPAP & oxygen machine, but he has to take a breathing treatment every four hours. My mother & father live next door to me & yes our power was turned back on early than some others, but it was still too long for someone in his condition. We were lucky to have a few oxygen bottles handy and I had to hook a small generator onto the car battery and run an extension cord into the house to hook his breathing machine to. He could not use the BiPAP because it was too strong for the small generator. He couldn't use a kerosene heater because the smell would have smothered him out. So, we kept him covered up in his bed. I was so afraid he would catch a bad cold because he had gotten so cold & didn't get to use what he needed for his health because of not having any power. I would not have been so upset over the power outage, but because of his health problems & the amount of time it took to get it back on was ridiculous. I feel we all pay a way too high of a power bill anyway. And ~~now~~ ^{now} they want to raise it, that's insane! I live in a 2 story old camp house. Every winter I hang up quilts & blankets to block off the whole upper floor. I block off another room downstairs. That leaves me the living room & kitchen. I have an electric heater in each. I even wear thermal underwear.

pajamas and even 2 pairs of socks & house shoes to keep warm, I have even (especially this year) had to wear hooded sweat shirts and toboggans in my house to keep warm. I try not to turn my heaters very high, probably not even half way up because I know how high the bill can get. I have put plastic on windows, doors, I have put some insulation in to try to cut the bill down. But even after doing all that the bill still stays the same - high! And now they want to raise it. My bill for Dec. was \$350 and I froze the whole time. Right now I don't have a job, but I am attending college. I get financial aid and that's what I live on for now. I do odd jobs and those with my financial aid would help me greatly, but I end up using most of it just on power bills. I know how rough it is on me to have these big power bills, I couldn't imagine people trying to pay them on a fixed income or a small paying job. I couldn't imagine trying to keep a family warm in the winter

and trying to eat & pay other bills with a big power bill, NO, I do not think the power company does enough to service it's people especially with them paying big power bills. It seems as if a person pays that big of a power bill, then the power should be back on within a couple of hours, The power company can say it's not their fault if a tree fell on a line and knocked the power out, that's an act of mother nature. It is an act of mother nature if a tree falls due to bad weather, but is that power company's fault if it falls on a power line. They know where all of their lines are, they should work all year long making sure nothing can fall onto the lines, They should keep a good amount of space around them cleared. They shouldn't just wait until a storm hits and the power's out everywhere and then try to do something about it. Our bills are too high as it is, we are overcharged and under serviced. We shouldn't have a raise on our power bills, right now we should have a decrease in them. The power company should earn the money from our big power bills, but they don't. Thank you for your time, Lisa Burko

Name of account holder with Kentucky Power: Wanda J. Caudill

How many members in your household? 2 Ages: 64 & 59

Do any members of your family have any special needs? no Please explain: _____

What date did you lose electricity? 12-18-2009 on A Turkey

What date was your electricity restored? 12-23-09

Do you know the cause, if known, why you lost power? Yes Please explain: Power maintenance

of Power Co. rights of way; failure to cut & remove trees growing into Ky Power Co. rights of way which were reported to a local power line in the Foothills neighborhood. Our complaints were basically ignored.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? Yes Please

explain: We lost over \$300 worth of meats, all vegetables in our

freezer & refrigerator & we had to spend 2 nights in a local motel which cost \$145.00 for which we were never reimbursed.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the

past year? no Please explain: Nothing has been done in this area for

several years. No tree trimming, pole maintenance or wire replacement for the Foothill Road area has occurred.

Additional information or comments: Complained about a tree growing into the power

lines for 4 years. Tree was partially cut only because they had to install a new transformer several years ago. We need better access to Ky Power Company officials instead of an automated system. We also need a faster response time.

Thank God, we didn't. I'd hate to be the people that was on Oxygen, or any back up best.

What date did you lose electricity? Dec 18

What date was your electricity restored? Dec. 22

Do you know the cause, if known, why you lost power? yes Please explain: Power lines were

broken down by trees due to trees being left around power lines were they could fall on them, if the power company had removed these trees as they should have, our power wouldn't have been out.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? Yes Please

explain: We lose \$150.00 of food, not hot water to bath in, plus we had to go buy oil for oil lamps and propane to cook with, we had to buy soap & crackers to eat.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the past year? No Please explain:

Additional information or comments: I believe if the Ky. power Co. would cut the trees above and below the lines at least 30 feet on each side of the lines, we wouldn't have this problem. We don't need no rise on our electric bill, we pay to much now. *use reverse side if necessary

Additional information or comments: My bill went from \$220⁰⁰ to \$623⁰⁰ in one month with 2 people living in the house. I do not feel that it is possible that we would have tripled our electricity usage during that period. (over)

Signature of person completing form: Scott Grayson

Signature of AEP account holder: Scott Grayson

*use reverse side if necessary

Being a single Mom with only one income in the household, this is an undue hardship on me to pay such an exorbitant bill. This bill is also \$117 more than my house payment. It is just impossible to expect average people to pay the current rates let alone assume that people will be able to pay a bill with a 35% increase added to it. For me on this particular bill would have been \$841. A 35% increase is just simply far too much to ask people to pay. I can't imagine what elderly people on a fixed income will do to be able to keep their electricity and live comfortably. It would be inhuman to ask this rate increase on them.

D. Franzi

Name of account holder with Kentucky Power: Rhonda Jean Hall (Daughter) Wilma Jean Hall

How many members in your household? 3 Ages: Rhonda Hall 38, Ronald J. Hall
Wilma Jean Hall 62 (mother)

Do any members of your family have any special needs? Yes Please explain: all three disabled

Wilma Jean Hall I have to a machine for Copd.

Rhonda Jean Hall (Daughter has Diabetes)
Ronald Lee Hall (son has a back injury of spine)

What date did you lose electricity? Frist lost power on Friday night December 18th
and the Electric pole was torned down on Saturday morn Dec 19th

What date was your electricity restored? my power was restore Mon
Dec 30th 2010

Do you know the cause, if known, why you lost power? Yes Please explain: yes I watch

it happen. A tree came down on heil and it to power pole and broke
The top of it off and Brought Transformer part down + the 2 main
lines and took my personal pble. & parts down to the ground.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? yes. Please

explain: I lost all my freezer food for the winter mts and all

my food that was in refrigertory I use a machine for Copd and
I couldn't because it work by electricity (Neon VTD Department + Rescue
gave me a tank of oxygen.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the

past year? No Please explain: I did see a few men come in by in the

Spring & cut some cuds vines at the ground where the tie was
connect to the top of pole. They always leave the one on
the pole and they would always smoke, Crackle & Burn threw out the year
I seen tree cutters throw this same a face wheel 4 yrs ago or so.
they had certain people they was cutting down they payed a cut

Additional information or comments: more then they did any thing over next
to the creek bank so they couldn't be seen because of the
tree. They would just cut on here + ther the evident is up
near that can be checked out by Ky power. I don't think
should have paid 470 to restore my pole and all the food

I lost also 53 gallon Sears hot water
heater that was only about 3yrs old this year.

Fam. The Home owners and

Mr Edison Bart you keep all those photos
I gave you in Court Sat 23rd Jan 2016.
You all can use them any way that you
can if it will help the County and people you
are that all they lost to.

2017
2012

If you need me to be a witness.
All you have to do is notify me.

On Behalf of me, my Daughter, & Son Ronald Lee Hall
we thank you from the bottom of our hearts.
Truly I can say if it hadn't been for you Edison
WKLp, Sheriff's Dept, & Neon Volunteer Fire Dept & Rescue
for their tank of oxygen & m.e. food they gave us
for Christmas & plenty water, because with our
neighborhood we all could have been found dead
or seriously sick. I hope you truly realize for all
you that you showed us the love & concern this
County gave us and people we knew for 20 years
didn't have a ounce of love to offer me or my
Turn down and me telling them what shape I was
put it with my life, but for the sake of God
and of all of you I mention. I thank you all
and I love you all for the bottom of my heart.
You kept me going my having me chest on with
your office till then. I said thank them
and now I appreciate them. All of you were my family
in a time of need, I don't any family here they all
live away 500 miles or so.

I thank you all
& God bless each & every one of you.

Wilma Jean Hall.
Daughter C Rhonda Jean Hall
(Son) Ronald Lee Hall.

^{is not} ^{injured} Our brother (brother-in-law) almost froze to death without
financing alternative heat.

What date did you lose electricity? 12/18/09

What date was your electricity restored? 12/22

Do you know the cause, if known, why you lost power? No Please explain: _____

The whole system does not seem to be properly maintained.
We have frequent power outages with slow restoration of power.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? Yes Please

explain: Lost frozen & refrigerated food plus cost of propane & kerosene.
Also no well water during this time.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the

past year? Yes Please explain: tree trimming in our yard

Additional information or comments: Our son Adam Henriksen right across
the creek had his power off on the 17th and was not restored
until Christmas Eve. Why can't he and the Bull Creek Church
be hooked up to our line rather than lower Bull Creek? use reverse side if necessary

Signature of person completing form: Jon T. Henriksen (over)

Signature of AEP account holder: Jon T. Henriksen

I don't think the Power Company's past record and fast
promises ^{of good service} justifies a 35% rate increase. Poor maintenance
resulted in very expensive out-of-state power crews.

I think that a 35% rate increase is SHAMEFUL. I realize that you need a raise like everyone else does but not 35%. We are on Social Sec. And if there is a 35% rate increase we will have to move. When you old and not able to work and you have the same ~~at~~ amount coming in each month with no raises its tough. With in almost double Power bill its going to destroy a lot of people. Please try to lower the rate increase that you wanting.

Do you know the cause, if known, why you lost power? _____ Please explain: _____

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? NO Please explain: EVERYONE SUFFERS LOSS IN ANY POWER OUTAGE

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the past year? NO Please explain: HAVE BEEN TRYING TO GET VINES AND

TREE LIMBS REMOVED FROM POLE, LINES AND TRANSFORMER JUST BELOW
MY HOME FOR 7 YEARS NO ONE WILL EVER DO IT AND I WAS INFORMED NOT
TO DO IT ON MY OWN SEVERAL TIMES BECAUSE OF THE DANGER
Additional information or comments: I HAVE TRIED FOR AT LEAST 7 YEARS TO GET
SOMEONE TO REMOVE VINES + TREE LIMBS FROM POLE BY MY HOME
WHICH DOES HAVE A TRANSFORMER ON IT WHICH IS TOO LOW TO GROUND

I HIRE A PRIVATE CO TO TRIM ALL THE REST BUT NO *use reverse side if necessary

Signature of person completing form: Isa Bell Pease

Signature of AEP account holder: Isa Bell Pease
Joe R. Pease DEWASCO

ONE WILL DO THE ONES AROUND THE TRANSFORMER BECAUSE OF THE DANGER INVOLVED. THEY ALL SAY THEY DON'T KNOW WHY IT HASN'T CAUGHT FIRE OR BLOWN BY NOW. VINE IS ALL OVER IT AND IS NOW RIDING DOWN THE LINES!

I ALSO FEEL THAT A 35% INCREASE IN UNSUBSIDIZED, WE ALL LIVE ON FIXED INCOMES IN THIS AREA AND 35% IS JUST TOO HIGH! I REALIZE EVERYTHING IS GOING UP AND TIMES ARE HARD BUT PUTTING THE BURDEN ON US IS NOT JUSTIFIED AND BACKS ON BEING ILLEGAL. YOU BLAME POWER OUTAGE ON A "ACT OF GOD" MOST OF THE TIME WHEN REALITY IS YOUR CO. FAULT FOR NOT MAINTAINING SIMPLE MAINTENANCE ON LINES AND POLES. WHY MAKE US PAY FOR YOUR SHORTCOMINGS.

Name: Rickey Pease Phone: [REDACTED]

911 Address: 91 FRANKLIN BR. RD City: ERMINE Zip: 41815
(if different)

Mailing Address: PO BOX 192 City: ERMINE Zip: 41815

Name of account holder with Kentucky Power: Rickey J. Pease

How many members in your household? 2 Ages: 55 - 51

Do any members of your family have any special needs? NO Please explain: _____

What date did you lose electricity? N/A

What date was your electricity restored? N/A

Do you know the cause, if known, why you lost power? N/A Please explain: _____

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? _____ Please

explain: ANY TIME A household loses power IT IS A hardship
Both physical, mental, AND economic

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the
past year? NO Please explain: we HAVE TRIED TO get

something done for years AND IT never gets
done. Always get some kind of run around answer!

Additional information or comments: I HAVE TRIED FOR several years to
get something done. ABOUT The TREES AND vegetation growing
up FRANKLIN BR. IT TOOK me several years just to get
3 poles replaced THAT were in REAL BAD shape *use reverse side if necessary

Signature of person completing form: [Signature]

Signature of AEP account holder: [Signature]

ON MY LAND. IT TOOK ANOTHER YEAR HALF AFTER THE POLES WERE
PUT IN PLACE JUST TO GET CHANGED OVER. IVE REPORTED BAD VINE GROWTH
IN A POLE UP AT MY MOTHERS HOUSE FOR AT LEAST 7 YEARS. IT IS EXTREMELY
DANGEROUS BECAUSE OF THE TRANSFORMER AND IT IS TOO CLOSE TO THE GROUND.
WE ALSO HAVE A POLE ON WREN RD. THAT IS BURIED HALF INTO. DUE TO
A TREE LIMB THAT CAUGHT IT A FIRE 3 YEARS AGO AND STILL NO
ONE HAS CHECKED IT. I HAVE PERSONALLY SPENT MONEY OUT OF MY
OWN POCKET REMOVING TREES THAT WERE IN DANGER OF FALLING
ON POWER LINES BECAUSE I WAS TIRED OF TRYING TO GET ANYTHING DONE.
I THINK THAT 35% INCREASE OF POWER BILL IS A LITTLE OVER BOARD.

TIMES ARE HARD ENOUGH OUT THERE NOW WITHOUT THE POWER CO
TRYING TO PUT AN EXTRA BURDEN ON THE AVERAGE PERSON.

PEOPLE IN THIS AREA ARE POOR AND HAVE A HARD ENOUGH TIME
JUST TRYING TO PAY BILLS WITHOUT YOU WANTING THE REST OF WHAT
LITTLE THEY HAVE. I KNOW YOU NEED MONEY TO STAY IN BUSINESS
BUT YOUR POOR SERVICE DOES NOT JUSTIFY THAT KIND OF
INCREASE. IF YOU WOULD DO MORE PREVENTATIVE MAINTENANCE

YOU WOULD NOT HAVE AS MANY PROBLEMS. MOST LINEMEN
IN THIS AREA WORK REALLY HARD AND DO WHAT YOU WILL ALLOW
THEM. BUT THE CONTRACTORS YOU HIRE ARE JUST TAKING YOU
TO THE CLEANERS. THAT IS WHO YOU NEED TO GET YOUR
MONEY BACK FROM. WHEN IT TAKE'S 3 MEN 4 DAYS TO
CUT 6 LITTLE BUSHES, ITS A JOKE.

COMPLAINT FORM

Page 1 of 2

Name: Kristi Lynn Skeens Phone: [Redacted]

911 Address: 44 Mule Dr. City: Whitesburg, Ky Zip: 41858

Mailing Address: P.O. Box 143 City: Mayking, Ky Zip: 41837

How many members in your household? 2 Ages: Myself: 31 ; Roommate: 33

Does any members of your family have any special needs? N/A Please explain:

What date did you lose electricity? December 18, 2009

What date was your electricity restored? December 23, 2009

Do you know the cause, if known, why you lost power? possibly Please explain: The power company told me they knew it was a transformer causing our power outage. When they finally came it took them around 10 mins to fix it.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? None Please explain: Took my food to someone's house w/ electricity before it ruined.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the past year? No Please explain: I never see anyone coming to trim trees or maintain electrical lines & poles in my service area.

Additional information or comments: On December 21, 2009 during one of my many calls to the power company I was told by a worker of the phones that they had called one of the people w/out power in my area which was four (4) houses & that they had received an answering machine & therefore assumed we had power & had been taken off of the list to have power restored. Once, I told them we absolutely did not have power they put us back on the list.

On December 22, 2009 I called the power company for the last time that evening, before trying to hold up ~~in~~ in my bedroom & try to stay warm in a house w/ no heat. what so ever. I told the lady who answered my call how long we had been w/out power & how cold it was in my house & how we had no heat or water. She suggested that I go to one of the shelters provided in our area.

I told her that wasn't possible because none of our shelters were animal friendly & since I had two cats that were inside cats I couldn't leave them to freeze.

She then advised me, that at some point I would have to make the choice between myself freezing or leaving my animals to freeze. I told her I would not leave my animals & she said well there is not much I can do.

Do any members of your family have any special needs? no Please explain: _____

What date did you lose electricity? _____

What date was your electricity restored? _____

Do you know the cause, if known, why you lost power? yes Please explain: Severe winter storm that caused trees to fall and lines to break due to heavy snow, and the lack of AEP being prepared even though they tell us to be prepared.

Did you suffer any economic loss or other hardship (must be specific) due to the power outage? yes Please explain: We lost most of the groceries that was just purchased the day the storm hit.

Are you aware of any tree trimming or any electrical line or pole maintenance in your area by anyone for the past year? yes & no Please explain: I have not seen anyone from the power company trimming trees in over a few years.

I have seen them changing things on the lines and poles. I feel that is why they want to increase our bills, to pay for the changes they have made and the man hours and high wages they pay their workers. I do not think it is fair to make us pay for what is their responsibility. The upkeep of lines + poles being one of those things.

Signature of person completing form: Angela Stone

Signature of AEP account holder: Jesse H. Burke

*use reverse side if necessary

I feel as though the power company makes enough money off of the poor people here in Eastern Kentucky. I feel as though we are being asked to pay more, to pay for the price of all the mines shutting down, and the increase in coal. We are also paying for the wages of their workers and the amount of man power it took to restore the power with the power company not being prepared. And even if the prices of coal hasn't been on the rise then I feel we have been asked to pay this 35% increase to pay for all the new meters, lines, poles transformers ect. that AEP should be responsible for. The problem is we have no competition and that is why AEP can ask for such a hike in Electric and get it. Us poor people are depending on you the Courts to not let AEP by with such robbery.

KENTUCKY

PSC sets meeting dates

The state Public Service Commission announced Thursday it will hold a series of public meetings during April in Ashland, Hazard and Pikeville to receive comments about the request by Kentucky Power for a rate increase. The meetings are scheduled for 5 p.m. April 13 at the auditorium at Park Place at 1701 Central Avenue in Ashland; 5 p.m. April 20 at the auditorium at Pikeville High School at 120 Championship Drive; and 5 p.m. April 21 at the auditorium at Hazard Community and Technical College at 1 Community College Drive.

Kentucky Power has about 176,000 customers in 20 counties in Eastern Kentucky and has proposed to increase its electric rates by 24 percent overall. The company estimates the average monthly bill for residential customers would rise to nearly \$153, an increase of about 34 percent.

EXHIBIT C

Information Submitted by

Paul Collins, Attorney at Law

On behalf of Hazard Mayor Gorman and the
Board of Commissioners of the City of Hazard

February 8, 2010

Mr. Jeff Derouen
Executive Director
Kentucky Public Service Commission
P.O. Box 615
211 Sower Boulevard
Frankfort, Kentucky 40602

Re: Application for General Adjustment of Electric Rates
Of Kentucky Power Company, Case No. 2009-00459

Dear Mr. Derouen and individual Members of the Commission:

This letter is submitted by me as Mayor of the City of Hazard, Kentucky as a part of the public comments on the proposed general adjustment of electric rates application of Kentucky Power Company in your case no. 2009-00459. The City of Hazard opposes the granting of the requested rate increase for reasons set forth more fully below.

Before setting forth the City's opposition against the proposed rate increase, I must say that the City of Hazard does not reject the concept of supervised adjustment of electric rates or even the potential need for a rate increase of a reasonable size at an appropriate time. I acknowledge the need for continuing adjustments of rates pursuant to the fuel adjustment cost mechanism since Kentucky's economy as a whole is based in significant part upon the production of coal, natural gas and oil, and I believe that maintaining a healthy local electric utility company is essential to progress in every region of the Commonwealth. My reasons for opposing the rate adjustment request are tied to the timing of the request, its magnitude and the lack of evidence that it is fashioned for the long term benefit of the rate paying public inside the company's service area.

First, I oppose the requested rate increase on the basis that it is entirely predicated upon extraordinary, non-recurring conditions and not upon a reasoned analysis of economic performance subsequent to the last rate adjustment or upon a sound forecast of future performance of the company. The entire rate request is predicated upon economic statistics

prevailing during a test year commencing in September 2008 and ending in September 2009. No one could imagine a year in our national and regional economy which would be more unrepresentative of general business conditions and trends since the commencement of the Great Depression. Rate adjustments ordinarily last for several years; the last general rate adjustment proceeding for the company was in 2005 according to the documentation submitted. No general rate adjustment should be awarded to the company on the basis of conditions in the national and regional economy which are so abnormal as those experienced over the past 18 months. The company should be required to resubmit its application with appropriate supplemental material which includes economic data from the years preceding the test year and either excludes the abnormal data from the test year or appropriately adjusts the data in a manner which does not skew the overall results.

Second, I oppose the requested rate increase because the magnitude of the company's request for rate adjustment cannot be justified in light of present economic circumstances. Despite the worst economic downturn in three quarters of a century, the company reports that it nevertheless achieved a return on equity of nearly 3% during the test year ended September 30, 2009. This return on equity is described as "inadequate and unreasonable." I only wish that all of the businesses in the City of Hazard and surrounding communities within KPC's service area had been so fortunate as to reflect a similar positive return on equity during the same time period. The current rate of return is not unreasonable under the present economic circumstances. In fact, the PSC could justify withholding *any* increase on the basis of the application as presently submitted. Legislative bodies across the country have been forced to exercise fiscal restraint in meeting severe budget shortfalls due to the recognition that heavier tax burdens on the public at this time would further damage a fragile economy and kill prospects for an expedited recovery. The PSC should guard the public interest and exercise similar fiscal restraint since significant increases in utility bills for consumers usually fall even more heavily on those least able to pay than imposition of new tax levies.

Third, I oppose the requested rate increase because granting such a large increase will trigger a serious "ripple" effect throughout the economy of the service area. The magnitude of this particular request in the 20% to 34% range for virtually all customers cannot be viewed in isolation. Such a large increase cannot be absorbed by the customer base without additional severe repercussions for the average family in the service area. The cumulative effects of the proposed increase should be considered in evaluation of the request. As the Mountain Water District in Pikeville and Big Sandy Water District in Catlettsburg and other opponents of the rate increase have noted in their recent written objections, the granting of the increase will lead to predictable increases in other essential goods and services throughout the service area. The impact on other essential utility services may be the best example of the double whammy which would result. The City of Hazard provides public water service to 8,094 customers and sewer collection and/or treatment services for 3,114 customers. The City has 150 separate accounts with Kentucky Power Company to provide electric service to operate the water plant, sewer plant, pump and lift stations, telemetry sites and other associated equipment and administrative offices. The single increase in the electric utility rate requested in the present case would alone result in an increase of 4.02% of the City's operating expense budget for water and 3.97% of its operating expense budget for sewer. The City could not absorb those increases without passing the added expense along to its own customer base. The increase in water rates for an average

customer attributable just to the additional cost of electricity would be \$16.24 per year. The increase in sewer rates for an average customer attributable just to the additional cost of electricity would be \$16.08 per year. Of course these utility increases would be compounded upon the higher electric bills also paid by the consumer. I believe it would be an abuse of discretion to overlook the “ripple” effect of the rate increase which has been proposed.

Finally, I note that one of the primary reasons included in the company’s Application to justify the pending rate request is to reflect the costs of the proposed Renewable Energy Purchase Agreement. That Agreement proposes to create a twenty year contractual commitment by the company to purchase power and help develop 22,000 acres of land in Illinois as a new “wind farm” and renewable energy source. The testimony submitted to the PSC from Jay F. Godfrey reveals that the company’s corporate parent has similar contracts with wind energy facilities in Illinois, Indiana, Oklahoma, West Virginia and Texas. The testimony of Scott Weaver indicates that the company’s investment in wind resources is motivated, at least in part, by Governor Brashear’s November 2008 comprehensive energy plan which sets forth a renewable and energy efficiency portfolio standard. Another additional factor is the *possibility* that Congress might not elect to extend a renewable energy production tax credit amounting to approximately 2.1 cents per kilowatt hour for wind generation according to Mr. Weaver’s testimony. The latter factor is not a sufficient justification based upon the mere speculation that future credits could be less favorable while the company’s proposed course of action violates at least the spirit of the Governor’s initiative.

Apart from the obvious and superficial question of why investment in an allegedly low-priced renewable energy technology should ironically justify a substantial increase in existing electric rates, I am struck by the total absence in the company’s application of any data or analysis regarding the feasibility of capital investment in renewable energy infrastructure here in Kentucky—and particularly in the company’s service area. After all, Governor Brashear’s initiative is directed at making the Commonwealth of Kentucky a leader in every aspect of the emerging energy economy. There is some indication in the rate request that the company will experiment with the use of biomass as an alternative fuel on a small scale in its Rockport and Big Sandy plant facilities, but there is no economic data or analysis comparing the relative merits of biomass versus wind or the feasibility that wind or other alternative renewable energy sources could be developed locally. Approval of a twenty year commitment to develop out of state infrastructure is akin to raising the white flag of surrender and conceding that Kentucky is unable or unwilling to accept responsibility for its own energy future. If the PSC is to perform its assigned function as guardian of the public interest of Kentuckians, then *no* rate increase based upon any long term commitment for infrastructure outside the Commonwealth should be granted without a thorough economic and policy analysis of why long term investments in infrastructure here would not be a feasible alternative. If the PSC is unwilling to support Governor Brashear’s long term energy initiatives *through actual implementation of policy*, then someone on the Commission should advise the Governor to quit paying lip service to solving our energy problems.

In summary, I do not believe the company has made its case for the rate increase. The PSC should fulfill its responsibilities on behalf of the public and exercise its discretion to require adequate justification why such an increase should be made at this time, under these circumstances and without greater consideration of the long term best interests of the Commonwealth.

Sincerely,

A handwritten signature in black ink, appearing to read "W. D. Gorman", written in a cursive style.

MAYOR WILLIAM D. GORMAN
CITY OF HAZARD

EXHIBIT D

Numerous pages containing signatures of various citizens
indicating their opposition to the proposed rate adjustment increase

Submitted by

Denny Ray Noble - Perry County Judge Executive

To all interested citizens of Perry County, be it known that Perry County Judge Executive Denny Ray Noble and the Perry County Fiscal Court is opposed to the proposed rate adjustment increase of electric rates for southeast Kentucky. We the Fiscal Court are requesting all Perry County citizens to sign this petition against the rate increase to express their views to the Public Service Commission.

County Economic Status in Appalachia, Fiscal Year 2009

(Effective October 1, 2008 through September 30, 2009)

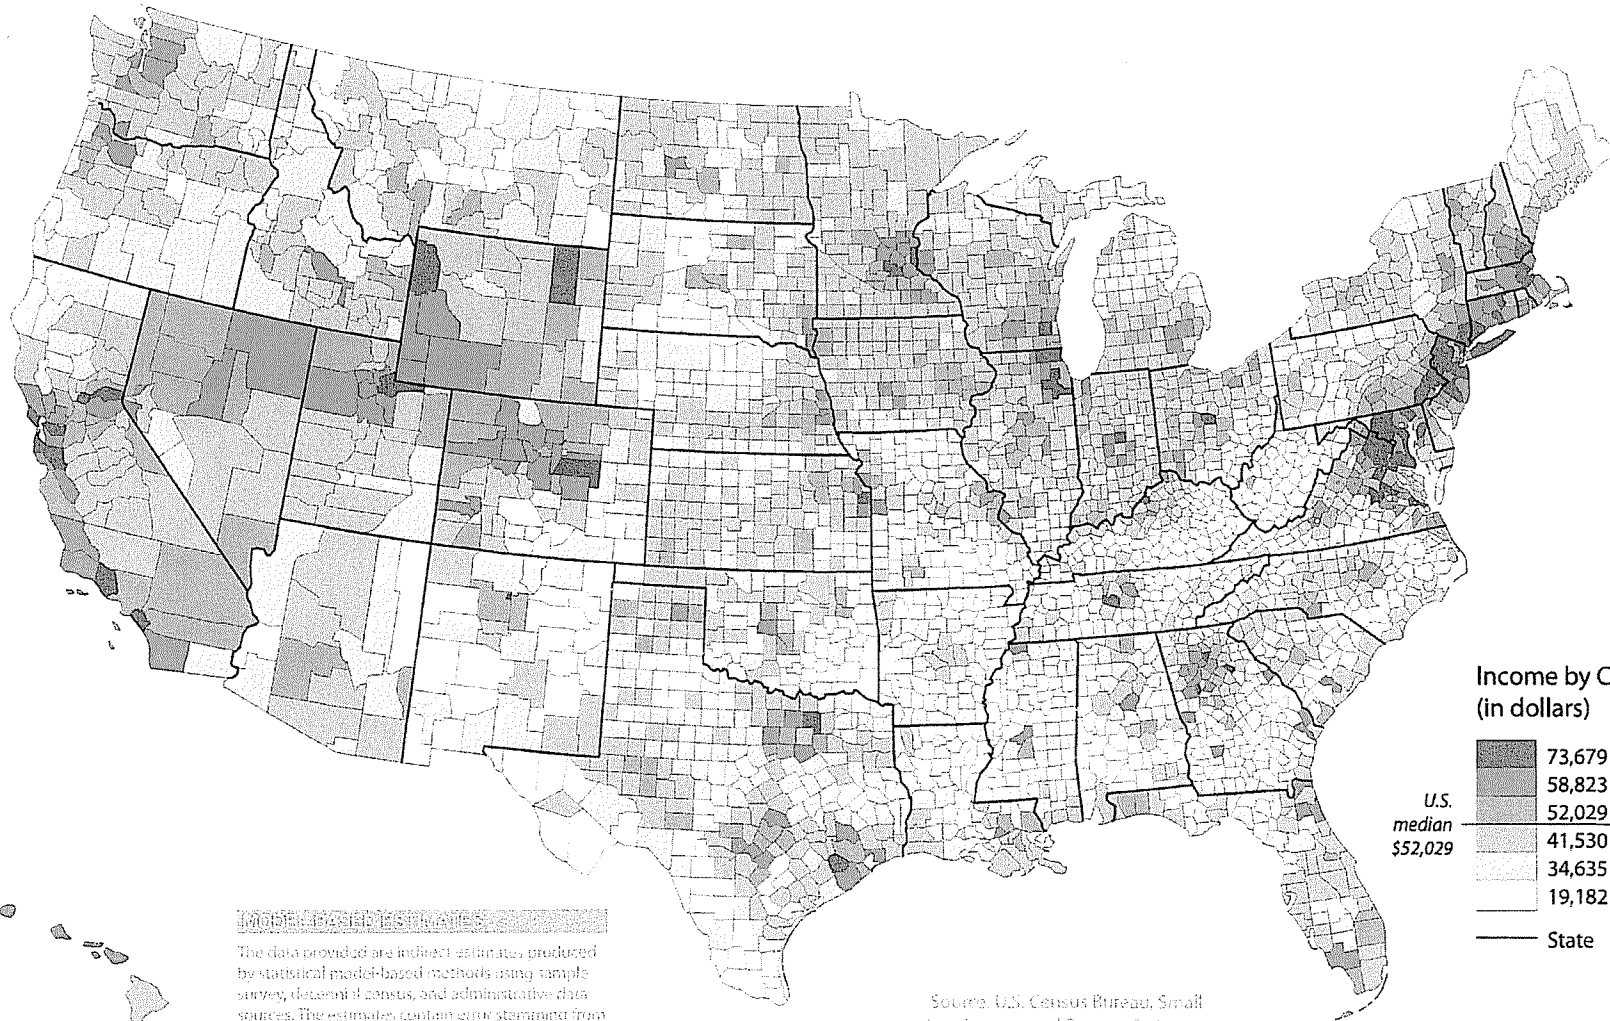

The Appalachian Regional Commission uses an index-based county economic classification system to identify and monitor the economic status of Appalachian counties. See the reverse side for a description of each economic level.

- County Economic Levels**
-  Distressed (81)
 -  At-Risk (81)
 -  Transitional (232)
 -  Competitive (19)
 -  Attainment (7)

Map Created: October 2008.
 Data Sources: U.S. Bureau of Labor Statistics, LAUS, 2004-2006;
 U.S. Bureau of Economic Analysis, REIS, 2005;
 U.S. Census Bureau, 2000 Census, SF3.

MEDIAN HOUSEHOLD INCOME, 2008

Income by County
(in dollars)

UNPUBLISHED ESTIMATES

The data provided are indirect estimates produced by statistical model-based methods using sample survey, decennial census, and administrative data sources. The estimates contain error stemming from model error, sampling error, and nonresponse error.

POVERTY IN LESLIE COUNTY

**Classified by Appalachian Regional Commission as a “Distressed County”
That means Leslie County ranks in the worst 10% of U. S. counties based on
a composite index of**

- 1-average unemployment rate**
- 2-per capita market income**
- 3. poverty rate**

One of the 40 poorest counties in the U. S. according to Census Bureau

Median income

**Kentucky \$52,000
Leslie County \$22,160**

Poverty levels

**United States 13%
Kentucky 17%
Leslie County 31%**

County Economic Status Classification System, FY 2009

The Appalachian Regional Commission (ARC) uses an index-based county economic classification system to identify and monitor the economic status of Appalachian counties. The system involves the creation of a national index of county economic status through a comparison of each county's averages for three economic indicators—three-year average unemployment rate, per capita market income, and poverty rate—with national averages. The resulting values are summed and averaged to create a composite index value for each county. Each county in the nation is then ranked, based on its composite index value, with higher values indicating higher levels of distress.

County Economic Levels

Each Appalachian county is classified into one of five economic status designations, based on its position in the national ranking.

Distressed

Distressed counties are the most economically depressed counties. They rank in the worst 10 percent of the nation's counties.

At-Risk

At-Risk counties are those at risk of becoming economically distressed. They rank between the worst 10 percent and 25 percent of the nation's counties.

Transitional

Transitional counties are those transitioning between strong and weak economies. They make up the largest economic status designation. Transitional counties rank between the worst 25 percent and the best 25 percent of the nation's counties.

Competitive

Competitive counties are those that are able to compete in the national economy but are not in the highest 10 percent of the nation's counties. Counties ranking between the best 10 percent and 25 percent of the nation's counties are classified competitive.

Attainment

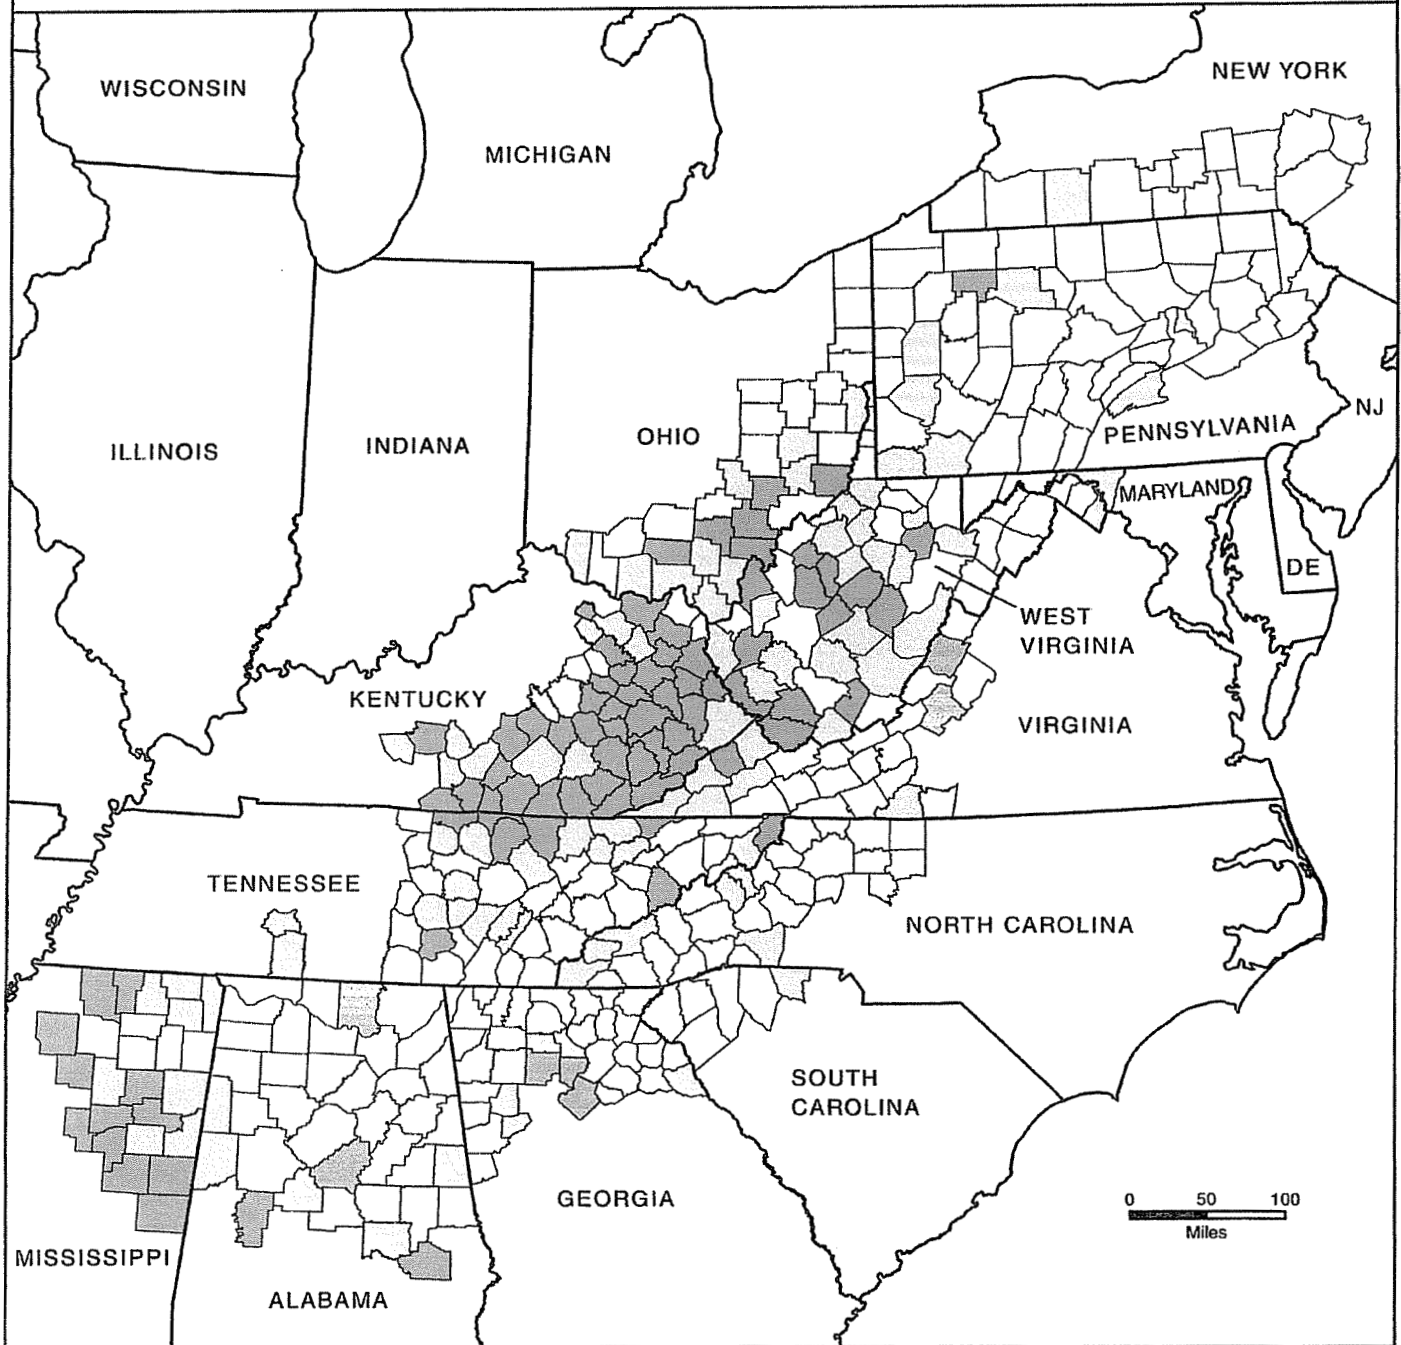

Attainment counties are the economically strongest counties. Counties ranking in the best 10 percent of the nation's counties are classified attainment.

Rank | Name | Age | Company | Efficiency
Total Compensation | 5 Year Compensation |
Market Value

Methodology:

Compensation rank is based on total compensation for latest fiscal year. Total compensation for each chief executive includes the following: salary and bonuses; other compensation, such as vested restricted stock grants, LTIP payouts and perks; and stock gains, the value realized by exercising stock options. Efficiency rank is based on our chief executive's performance/pay score. Ranks are given only to chief executives who have a six-year tenure and six-year compensation history. The most efficient rank is 1 and least efficient is 179.

Footnotes:

Total returns and value of stock owned (including all classes) is based on Apr. 9, 2009 stock price. Compensation percent change is based on combined salary and bonus. Annualized total return during tenure covers the tenure of the executive or from the time of the IPO or available stock history. Relative to market is the ending value of \$100 invested in the stock, divided by the ending value of \$1 invested in the S&P 500 (a score of 100 = the S&P 500). NA: Not available or not applicable.

- ¹Annualized.
- ²Four-year total.
- ³Three-year total.
- ⁴Less than 0.01%.
- ⁵Prior-year data.
- ⁶New chief executive; compensation may be for another executive office.
- ⁷Less than \$100,000.
- ⁸Received options or restricted stock in lieu of portion of salary.
- ⁹Received options or restricted stock in lieu of portion of bonus.
- ¹⁰Includes shares indirectly held.

Information Submitted by

Adrienne S. Bush – Hazard-Perry County Community Ministries

PUBLIC COMMENT FORM

Mail your comments to:
Kentucky Public Service Commission
P.O. Box 615
Frankfort, KY 40602.
Or fax to: (502) 564-9625

Name: Adrienne S. Bush
Address: 216 Kentucky Blvd. Hazard, KY 41701

Case: KY Power Co. Rate Increase 2009-00459

COMMENTS: I object to the proposed rate increase for several reasons, as outlined below:

- 1) KY Power Co. has not demonstrated that the rate increase is fair, just, nor reasonable.
- 2) KY Power Co. has not demonstrated that they have been good stewards of its customers' fees for service. This request comes at the heel of the most irresponsible, damaging power outage in memory, due to poor maintenance of lines
- 3) KY Power Co.'s customer base is one of the most persistently impoverished areas in the nation. People already struggle with utilities; how many more people will struggle if these rates are approved?
- 4) KY Power Co. should have been investing in sustainable energy infrastructure years ago as other utility companies have. The fact that KY Power Co. failed the public by keeping all of its energy sources in coal does not justify this request.

This request is placed on the backs of people already struggling and should be denied.

Adrienne S. Bush
