Dear Chairman Armstrong; I just read where the Kentucky Power Company is wanting a increase, you have got to be kidding me. Just moving back to my homeland in Kentucky I am so sick of everything just after 9 months, that I can't stand it. I moved here when the storms hit this past February and looking around at this place Kentucky Power has not cut one damn tree around here in years and I know they have already gotten raises in the past, where do they get off on raising the power and telling lies to get it and they never put forth anything back in the area unless there is a big storm that makes them do something. I guess the CEO's needed a big raise since times are hard on everyone. You as a Chairman and the others needs to go out into the world ever so often just to see what the power companies can do to help prevent the storms from doing so much damage. A child could tell that nothing had been done to this place around here in years and there is no excuse for that. I just bought 24 acres here in the Spring when finely the KPC came by and said their contractors would be coming by to cut trees near the power lines and asked if it was ok, I told them they could cut all the trees they wanted, but did they....no someof the trees close to the lines they wouldn't cut for some reason and I can't hire anyone to cut they because they are so close to the lines.... now go figure????? So please give me a good enough

1/5/2010

reason why you will approve a rate hike for them I would really appreciate a answer before I wrtie  
Governor. Beshear.

Thank You,
