

I am writing in regard to Ky Power's rate increase request. I have always paid my bill on time, as alot of people. We should not be responsible for the extra costs they are saying they have due to storms. My husband's work hours have been cut back, as have many other peoples'. I myself am on disability, and we can't afford an increase such as this one. In our community, most people are on a fixed income, and alot of people have even lost their jobs. We do not need this increase in our electric bill.

Thank you,
James and Jessica Lewis
