Case # 2009-00459

Jan. 23, 2010

To whom it may concern:

Everyone knows that every American home has to have electricity to run their homes for heating, lights and to run their home appliances. The power company knows that whatever price they charge us that will have to try and pay it. We the people are just at their mercy and need our state and federal government to stand up for us and put a cap on it to control the price, ~~for us.~~

I'd like to know the names of the committee or group of the state and federal offices that voted for and allowed them to raise the price for our electric bills ~~that~~ <sup>so</sup> high, I'd also like to know the ones that voted against allowing them to raise our bills or at least tried to stop them from <sup>passing</sup> getting it. Surely to God someone will try to look out for us! I'd like to know who is for us or who is against us.

If there's no state and federal laws to protect us from these high prices, we need to form one and if they are one already formed, I'd like to know why they allowed them to raise the price so much.

PUBLIC SERVICE  
COMMISSION

Everytime the Power Company sends me a bill telling me that they are going to raise my bill, I'd also like to get a letter from my state & federal law explaining why they are allowing them to raise the bill price so much. I'd like to get a letter from <sup>you</sup> the <sup>you</sup> Public Service Commission explaining to me why you are allowing them to raise our electric bill so much.

I'm very upset about receiving the letter from the Power Company telling me that they have requested for a over 23% pay increase. I'm sure that the Power Company realizes that all the poor people including myself are already struggling to pay their electric bills so what are they going to do when they raise the bills over 23% higher? I pray to God that you'll reconsider this request before you grant it.

Thanks,  
Jerry & Lorraine Isaac
