PUBLIC SERVICE  
COMMISSION

To Whom it May Concern:

I am writing to tell you I'm against the raise that The Kentucky Power Company. It would put a great strain on my family. I am a single mother of three children. My husband passed away and we draw very little social security from him. I can barely pay my bills now, and if they put the raise on the power bill, I'll not be able to afford what my children need. I also don't understand the raise because the power company takes in probably billions of dollars a year, and they haven't used any of it to keep the lines clear, or we wouldn't have had the power outage. I understand they have workers to pay out of that, but they should have plenty saved up from the neglect of the lines. It's not fair to us customers to have to pay more than we do now. My family is already in poverty level, I can't imagine what I'm going to do when they raise the bill. I am totally against the raise and I think the government or State should do something about it. It all the power companies fault so why should we be the ones to pay?

Thank you.  
Christina Mullins
