Comment on Kentucky Power increase:

As a retired citizen, I personally, will not be able to afford the price increase. As it stands, I am just making ends meet and doing ok. Folks like myself on Social Security have their money budgeted for just the basics. To increase 35% of a budgeted expense is way out of line. I am in favor of an increase, perhaps 15%, but 35% is out of my budget. Please consider a more affordable tax increase for senior citizens. Let's not add fuel to the fire in this present economy and punish those citizens who are enjoying the fruits of their labor during retirement.
