To Whom It May Concern:

I am a 82 year old, single woman, living on a fixed and limited income which puts me already under the poverty level.

The article in the Daily Independent today has upset me. It stated that a 34.95% raise was to be added to our Electric Bills. I think this is unfair to the Senior citizens. This will place a huge burden on me, as well as the others. One that many will be unable to meet. Most Seniors on Fixed Incomes are already in a crisis, trying to pay their Utilities, Medical expenses, and the Exorbitant Medication charges. Many times the money they have put back for food for the month, must be used to pay their Utility bills.

Is it not possible that the Electric Company can make concessions for the Older generation. I feel that Senior Citizens should be exempt from this raise. If we cannot be exempt from the raise in the cost of our Electric Bill can we at least have a substantial reduction ?
