

I am writing concerning the rate hike that the Ky Power Co has proposed (34.95%) increases in all residential bills. I wish to tell the president and the CEO that as a senior citizen I wish to be exempt from this this proposed increas. The senior citizens are taxed enough and many are now living at or near the poverty level. This increase would add a very heavy burden on each of us, thus causing a giant hardship. We are now having to choose between our bills or food and meds. I think this is outrageous. You need to cut back on some of your workforce that I see and know personally who just ride around in co trucks and brag about the type of money they make and are now expecting a 60% raise on paycheck, while the seniors who live on social security alone, do not even get a cost of living increase and has been banned for 3 years. I think this is also outrageous., that the govt would do this to their retired people.

Thank you so much,
