Dear Sir/Madam

I am writing to object to the extravagant percent of increase that is being requested by Ky. Power Co.

Being a recent widow and a senior citizen I lost my portion of my social security, which was always figured in as part of our budget. I have some savings but interest rates are not paying anything as you know.

Electric is not a luxury but a necessity unless we want to go back to primitive living so therefore I do not have a choice of whether I want to purchase electric.

The prices of groceries and gasoline also keep putting a strain on my budget that I cannot afford such an increase as being ask by the Ky Power Co.

Sincerely
Charlotte Taylor
