Frankfort, Ky. 40602

Gentlemen,

I am greatly concerned about Kentucky Power Company's proposed rate increase as it will affect seniors like us who are on fixed incomes and are already having to deal with increases in health care, utilities and almost anything else you can mention. Having retired from a public utility I realize that there comes a time when an increase in rates are called for. However, an increase of this magnitude is way out of line.

If such an increase was permitted, then I submit that seniors, sixty five years and older, be exempted from paying this increase.

Respectfully Yours,

George R. Kramer
