ASTROLOGY

Some kind of joint endeavor will do far better if you step forward and take a more active role. Colleagues will do what they can, but they don't possess your creativity. Cancer (June 21-July 22) - Once you visualize the type of results you want with regard to something important, you will put forth whatever effort is necessary to fulfill your vision. Use this talent. Leo (July 23-Aug. 22) - Because you are both physically and mentally restless, you won't let any grass grow under your feet. You might even take on something that requires learning new knowledge. Virgo (Aug. 23-Sept. 22) - Your chances for material growth look especially good, mainly because making money to acquire a desired item will be more fun than usual. Libra (Sept. 23-Oct. 23) - Don't hesitate to assert yourself in situations that require assertiveness in order to achieve your goals, but don't ask the same of others. Each person must be allowed to do his or her own thing. Scorpio (Oct. 24-Nov. 22) - You're likely to feel obliged to make a small but significant sacrifice for someone who means a lot to you - and know that it will mean the world to this person. Sagittarius (Nov. 23-Dec. 21) - Put some old projects on the back burner for the moment, and place your new interest front and center. Its input and completion could make everything else easier to accomplish. Capricorn (Dec. 22-Jan. 19) - When properly motivated, you are capable of outstanding accomplishments. But when motivation is lacking, it's usually just another ordinary day for you. Make today count. Aquarius (Jan. 20-Feb. 19) - It's an excellent day to share your philosophical beliefs because people in general are likely to have more natural insight than usual. Spend time with those who want to elevate their aspirations.
