BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

BELLSOUTH TELECOMMUNICATIONS, INC.)	
D/B/A AT&T KENTUCKY'S PETITION)	
REQUESTING THE COMMISSION'S)	CASE NO.
INTERVENTION IN NANPA NXX CODE)	2009-00543
ASSIGNMENTS)	

O R D E R

On December 28, 2009, BellSouth Telecommunications, Inc. d/b/a AT&T Kentucky ("AT&T Kentucky") filed a petition requesting that this Commission review and overturn a determination by the North American Numbering Plan Administration ("NANPA").¹ The petition was filed pursuant to 47 C.F.R. § 52.15(g)(4), wherein the Commission is granted the authority to "overturn the NANPA's decision to withhold numbering resources from the carrier based on its determination that the carrier has demonstrated a verifiable need for numbering resources and has exhausted all other available remedies."

AT&T Kentucky explains that the assignment of one block of 1,000 numbers is needed to meet the numbering demand for 100 consecutive numbers for the Meijer Corporation ("Meijer") in Richmond, Kentucky, a customer of AT&T Kentucky. Specifically, the code assignment request is for the five-thousand block of the 575

¹ The NANPA is an independent non-governmental entity selected by the Federal Communications Commission ("FCC") and is responsible for administering and managing the North American Numbering Plan. Neustar, Inc. is currently contracted by the FCC as the NANPA and Pooling Administrator.

central office code (“NXX”) (859-575-5XXX).² AT&T Kentucky does not have sufficient number resources available within its inventory in the available pool for the specified wire center in the Richmond rate center and is unable to meet Meijer’s specific need for numbering resources. Hence, on December 22, 2009, AT&T Kentucky electronically submitted to the NANPA an application requesting assignment of one block of 1,000 numbers in the Richmond rate center in order to address the business needs of Meijer.³ The application process with the NANPA requires the submission of information used for a Months-To-Exhaust (“MTE”) and Utilization Certification Worksheet (“Worksheet”) pertaining to the affected rate center.⁴ Based on the submitted information and resulting calculations, the NANPA concluded that AT&T Kentucky did not meet the FCC’s required guideline for MTE of six months or less or the utilization threshold requirement of 75 percent.⁵ Therefore, NANPA determined that AT&T Kentucky’s request for additional numbering resources should be denied.

The NANPA is not a policy-making entity. In making assignment decisions, the NANPA follows regulatory directives and industry-developed guidelines. The NANPA’s

² See AT&T Kentucky’s Petition for Review.

³ Specifically, the thousand-block request submitted by AT&T Kentucky was for its Richmond switch, but current FCC rules require the evaluation of number utilization for the entire rate center before assignment of new numbering resources.

⁴ In accordance with 47 C.F.R. § 52.15(g)(3), the MTE and utilization level are calculated by the Worksheet based on various inputs supplied by the applying carrier.

⁵ According to the Worksheet, the MTE for the Louisville rate center was calculated to be 61.185 months with a utilization rate of 62.214 percent.

responsibilities are defined in FCC rules and in comprehensive technical requirements drafted by the telecommunications industry and approved by the FCC.⁶

Pursuant to 47 C.F.R. § 52.15(g)(4), this Commission may overturn the determination of the NANPA if the requesting carrier has demonstrated a verifiable need for numbering resources and the exhaustion of all other available remedies. The Commission finds that AT&T Kentucky has demonstrated a verifiable need for additional numbering resources by presenting the request of a specific customer, Meijer, for one block of 1,000 numbers. AT&T Kentucky advises that it will be unable to provide telecommunications services requested by the customer without additional numbering resources in the Richmond rate center. The Commission further finds that AT&T Kentucky has exhausted all available remedies in the Richmond rate center to the extent that no combination of existing numbering resources in the Richmond rate center can be employed to meet the customer's demand for one block of 1,000 numbers in order to obtain 100 consecutive numbers. According to AT&T Kentucky, its Richmond switch serving the Richmond rate center does not have large enough blocks of sequential numbers to meet the customer's need.

This Commission finds that the NANPA determination to deny AT&T Kentucky the additional numbering resources described herein should be overturned and the NANPA directed to assign to AT&T Kentucky the five-thousand block of the 575 NXX in the Richmond rate center. The Commission notes that the numbering resources considered in this Order are to be assigned for the sole use of serving AT&T Kentucky's customer, Meijer, in the Richmond rate center. If the service requested by Meijer is

⁶ See generally, 47 C.F.R. § 52.

withdrawn, declined, or terminated, the associated numbering resources approved in this Order should be returned to the NANPA and may not be utilized to serve other customers without first meeting the NANPA numbering resource guidelines.

IT IS THEREFORE ORDERED that:

1. AT&T Kentucky's Petition regarding the NANPA's denial of its application for assignment of additional numbering resources in the 859 Numbering Plan Area is granted.

2. The decision of the NANPA denying AT&T Kentucky's request for assignment of one block of 1,000 sequential numbers in the Richmond rate center is hereby overturned.

3. The NANPA shall assign AT&T Kentucky the five-thousand block of the 575 NXX (859-575-5XXX) for the Richmond switch in the Richmond rate center.

4. The numbering resources considered in this Order are to be assigned for the sole use of serving AT&T Kentucky's customer, Meijer, in the Richmond rate center. If the service requested by Meijer is withdrawn, declined, or terminated, the associated numbering resources approved in this Order shall be returned to the NANPA.
