I am very concerned about the way LG&E proposed the rate increase - especially the flat rate -

We are always asked to try not to use/waste our resources - why in the world would LG&E of all companies

ignore their own advise to their consumers -

I can only assume that they have only paid lip service and that their only concern is getting the money upfront and

they could care less about the environment -

Please dont let them get away with this - it also hurts the average person - i am one of them - I have always tried to

do my best to contribute to "save the earth" and my wallet - thank you for standing up for us.
