Re: LG&E – an E-On Company

Dear Commission:

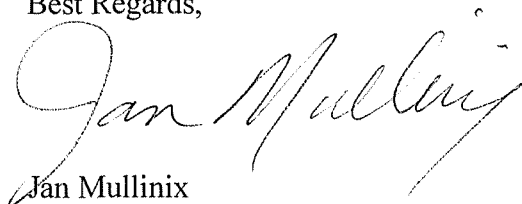

We received the attached letter today and are appalled that LG&E is seeking an almost 13% rate increase on electricity and 9% on gas.

First, has anyone at that company noticed that the United States is in a recession and Kentucky has been a hard hit state? For folks like me who are now unemployed I dread opening the gas and electric bills this winter because I'm afraid we will not be able to pay them and now they want to raise the rates!?!

Second, inflation has been running at about zero for several years. I can understand that the company needs to pay for recent storm damages but shouldn't they carry insurance for those types of occurrences? If you factor out inflation and storms I can't understand why they would seek a rate increase at the very height of a weak economy. Folks like myself are counting every penny, keeping the thermostat on 65 degrees, and cutting out anything that is not a necessity.

Please ask LG&E to thoroughly substantiate the need for this type of increase at such a bad time for working and non-working folks. We would certainly appreciate it.

Best Regards,

Jan Mullinix
