PUBLIC SERVICE
COMMISSION

Dear Public Service Commission,

I am a single mom and I pay out of pocket for my lge services. I do not receive any assistance at all with my bill and I am struggling to make it. I dont waste electric or gas and I dont have the luxury of keeping my heat above 68 in the winter because I simply can't afford it.

If you approved this rate increase I am going to have to choose between lge or basic groceries for the month. During this hard time, in this fallen economy, it isn't right to make it any harder on the customers that are already struggling.

Please reconsider and do not approve the rate increase.
