RECEIVED

FEB - 3 2010

PUBLIC SERVICE COMMISSION

Sirs:

Please don't permit this LGE increase go through increasing my bill 14 or 15 dollars. Any increase for that matter. I pay all my bills on time.

Tree limbs on lines don't grow overrite neither does any other routine job. I have cut back and have no cable, sattelight (no t.v. at all). No radio. No gas to go anywhere Cpt the P.O. once a week.

I am eating outdated foods, standing in long lines to get that at a food bank. And that does not include milk, eggs, butter, bread, cooking oil, salt, Pepper, sugar, flour, coffee,

or many other basic foods. Let me say here before God thinks I'm ungrateful. I am thankful to get that. If you can figure out where I can cut back please let me know. Please, I had LGE shut my gas (heat) off April '08 and just had them turn it back on December '09 saving a meter charge of 8.50 month. I have been surviving at a temperature of 50° to 60° after having my heat turned back on. I can't afford to even die but guess I'll have to so filled out and signed all the legal papers for my body to go from the morgue directly to the Univ. of Tnn, Forensic Lab (Body Farm). Every last bit of me will be used including my skull for reconstructive

purposes. I have had a "shipping label" - not required - ~~tattooed~~ tattooed on my left shoulder blade. Just so that, too (my body - doesn't end up in some tow in lot, You! It hurt but we do what we have to.

Well. I'm sure if I can cut back and make it LGE can, I PAY ALL MY BILLS 1ST THING AT THE BEGGING OF THE MONTH and usually after toilet paper, postal stamps, or some other luxury, have only 25 to 45 cents left.

Sorry if this letter reveals a little dementia, or stir crazy which I'm probably suffering ~~both~~ both but trade places with me. Walk in my shoes for a mile or two.

Incidentally, it also irks me to have to walk into an office (created by LGE - carrot and a stick - to get the poor and the negligent to pay their bills on time) and take the rudeness of some well paid worker in charge of that mess.

Home Energy Assistance when "LATE" isn't even my problem. Gave me a lot of problem, tho.

Just lower my bill. Fire them. HEA.  
I'm looking at my budget the only place I can cut down is just discontinue the whole LGE electric AND gas and buy an oil burner stove, eat out of cans (small cans of spam, hash, etc.) and live out of 2 rooms - Kitchen and bath. Well, lets help me and other ~~upscale~~ upscale bag ladies (we have a roof over our heads instead of an overpass and haven't waved the white flag yet).

Carolyn Reynolds
