RECEIVED

RE: Rate Increase for LG & E

MAR 02 2010

To Whom It May Concern:

**PUBLIC SERVICE
COMMISSION**

I am in receipt of the proposed rate and tariff increase for LG &E. I am writing you this letter to inform you of my opposition to this rate hike. I hope that you will take this matter very seriously. LGE has made plenty of money. In this environment of everyone tightening their belts, they should have to tighten theirs too. They have been given way too much power. I recently saw Chip Keeling on television in damage control about cutting peoples power off in these frigid temperatures. The very fact that they would cut someone's power off when the temperature is way below freezing says it all. Those people do not give one iota about us as a people. They do not care about our welfare, and all they are interested in is our money. I will anxiously await to see if you cave in one more time and, of course, give them more of our money. You are supposed to be looking out for our benefit and welfare. You are the go between for us and the big power company. I know this letter is an exercise in futility. I pretty much know that you are going to give them what they want. If no one ever speaks up, then we know for sure what the outcome will be. My personal opinion of LGE is that they have turned into greedy moneygrubbers, who would turn off your power if you were laying bleeding in the street. All I can say about that is, good luck with all of that when those people get to the pearly gates. Someday, we all will be responsible for our actions. I hope that you will do the right thing for Kentuckians, but alas, I fear you have become a bloodsucker too.

Sincerely,

Mary Ann Cook
