PUBLIC SERVICE  
COMMISSION

I am writing in regard to case number 2009-00549 for S. D. & E. I wish to protest the rate increase. My husband and I are in our seventies. We keep our thermostat at 65° degrees in winter. We are always cold. In the summer we use fans and only use the air conditioner when the temperature reaches 90° degrees or higher. I always do laundry in cold water. I hang my laundry on a wooden rack in the winter. I hang them outside in the summer. We have energy saving light bulbs. I use my crock pot and other energy saving appliances. We can not save any more. We cannot afford to pay any more. We need relief. We need the State to buy S. D. & E. Thank you
