Subject: PSC RATE Increase

I am strongly against the rate increase thru an increased delivery/access fee. The marketplace demands that people using LG&E be able to adjust rate increases thru the supply/demand process. When you do not use you do not pay. LG&E needs to be able to manage this and the shareholders need to know that their investment value is related to supply/demand and the marketplace. Not a monopoly non demand based arbitrary increase in everyone's rate thru an access fee or distribution fee which we already pay. The complexity of computing the increase or "decrease" of this fee is much more difficult because of the proprietary information affecting it. It also seems like a little more than co-incidence that LG&E may be on the market and an increase in rates will mean an increase in profits which will contribute to an increase in the sales price and affect shareholders accordingly. Do not increase those rates outside of supply and demand market requirements. The rate increase will also have a large impact on fixed income customers. Thank you.

PS your email access on the web site for PSC does not work.
