RE: Case No. 2010-00074

South Hopkins Water District petitions Public Service Commission for rehearing in Case No. 2010-00074 as follows:

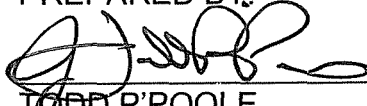

1. The Public Service Commission in Order of 4-28-2010 revised the water district's wholesale rates.
2. The water district did not request a revision or modification to its wholesale rates in its application for rate adjustment. The proposed rate schedules did not contain a wholesale rate revision.
3. The special contracts between South Hopkins Water District and its wholesale customers provide a specific methodology for wholesale rates and these rates are modified annually after the performance of an audit on Dawson Springs' cost of producing water.
4. If the wholesale rates are returned to their pre-4/28/2010 level, South Hopkins Water District's retail rates must be revised to produce the annual revenue requirement the Commission found reasonable in the 4/28/2010 order.

Respectfully,

Robert J. Tucker  
Chairman
