***Re: In the Matter of AT&T Communications of the South Central States, TCG Ohio, and BellSouth Telecommunications, Inc., d/b/a AT&T Kentucky v. Kentucky Rural Incumbent Local Exchange Carriers, Kentucky Competitive Local Exchange Carriers, Windstream West, LLC, Windstream East, LLC and Cincinnati Bell, Case No. 2010-00162.***

Dear Mr. Derouen:

Enclosed for filing in the above-referenced case, please find one original and eleven (11) copies of the initial position statement regarding AT&T Communications of the South Central States, TCG Ohio, and BellSouth Telecommunications, Inc., d/b/a AT&T Kentucky's (collectively "AT&T"), filed on behalf of the following RLECs:

- Ballard Rural Telephone Cooperative Corporation;
- Brandenburg Telephone Company, Inc.;
- Duo County Telephone Cooperative Corporation;
- Foothills Rural Telephone Cooperative;
- Gearhart Communications Co., Inc.;
- Highland Telephone Cooperative, Inc.;
- Logan Telephone Cooperative, Inc.;
- Mountain Rural Telephone Cooperative, Inc.;
- North Central Telephone Cooperative Corporation;

Jeff Derouen, Executive Director  
May 11, 2010  
Page 2

---

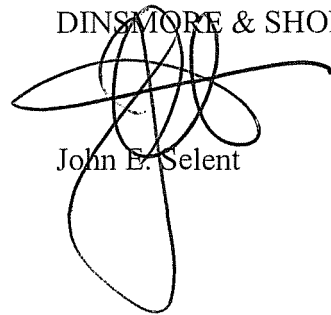

- Peoples Rural Telephone Cooperative;
- South Central Rural Telephone Cooperative Corporation, Inc.;
- Thacker-Grigsby Telephone Company, Inc.; and
- West Kentucky Rural Telephone Cooperative Corporation, Inc.

Please file-stamp one copy and return it to our messenger.

Thank you, and if you have any questions, please call me.

Very truly yours,

DINSMORE & SHOHL LLP

A handwritten signature in black ink, appearing to read "John E. Selent", is written over the printed name. The signature is highly stylized and somewhat illegible.

**THE RURAL INCUMBENT LOCAL EXCHANGE CARRIERS' INITIAL POSITION  
REGARDING INTRASTATE SWITCHED ACCESS RATE REFORM**

The following Kentucky rural incumbent local exchange carriers (collectively the "RLECs"), by counsel, submit to the Public Service Commission of the Commonwealth of Kentucky (the "Commission") their initial position statement regarding AT&T Communications of the South Central States, TCG Ohio, and BellSouth Telecommunications, Inc., d/b/a AT&T Kentucky's (collectively "AT&T") Petition and Complaint Seeking Reduction of Intrastate Switched Access Rates (the "Petition and Complaint"):

- Ballard Rural Telephone Cooperative Corporation;
- Brandenburg Telephone Company, Inc.;
- Duo County Telephone Cooperative Corporation;
- Foothills Rural Telephone Cooperative;
- Gearhart Communications Co., Inc.;
- Highland Telephone Cooperative, Inc.;
- Logan Telephone Cooperative, Inc.;
- Mountain Rural Telephone Cooperative, Inc.;

- North Central Telephone Cooperative Corporation;
- Peoples Rural Telephone Cooperative;
- South Central Rural Telephone Cooperative Corporation, Inc.;
- Thacker-Grigsby Telephone Company, Inc.; and
- West Kentucky Rural Telephone Cooperative Corporation, Inc.

In support of their position regarding intrastate switched access rate reform, the RLECs state as follows.<sup>1</sup>

### **INTRODUCTION**

Notwithstanding the ominous tone of AT&T's Petition and Complaint, no intrastate switched access crisis exists in the Commonwealth of Kentucky – and certainly not one that would require the kind of urgent and accelerated Commission action that AT&T requests. This observation is underscored by AT&T's failure to show how it or Kentucky consumers have experienced any harm as a result of the RLECs' current intrastate access rates. Instead, AT&T seeks to recover from the RLECs via access rate reform what it self-identifies in its Petition and Complaint as lost revenues actually caused by emerging, unregulated competitors like Voice over Internet Protocol ("VoIP"). AT&T, moreover, makes much of the alleged harm to Kentucky consumers caused by current access rates. AT&T's Petition and Complaint, however, fails to include any provision whatsoever that would pass along to its customers the alleged cost savings resulting from reduced intrastate access rates in long distance markets without adequate competition to police or control AT&T's market actions. Absent this provision, AT&T would presumably pocket those savings, revealing the true motivation behind its Petition and Complaint.

Moreover, intrastate access reform is a complex issue, particularly with respect to rate-of-return regulated RLECs. Its complexity partially explains why it has yet to have occurred. The

---

<sup>1</sup> The RLECs' position statement is not intended to be an answer to AT&T's complaint. The RLECs hereby reserve all rights with respect to answering AT&T's complaint at the appropriate time should the Commission so order.

revenues associated with the intrastate switched access rates charged by the RLECs represent a significant portion of their regulated rate design and reflect the recognized costs of doing business in high-cost to serve areas in rural Kentucky. The wrong approach to access reform would have a disastrous effect on the RLECs and their rural customers. As such, any intrastate access proceeding for rate-of-return regulated RLECs should not be conducted in a hasty, expedited manner, but rather should be allowed the time necessary to get it right.

In addition, any intrastate access rate reform proceeding for rate-of-return RLECs should recognize that access reform efforts are currently underway at the federal level. As AT&T recognized in its Petition and Complaint, the Federal Communications Commission (the "FCC") has already begun the process of intercarrier compensation reform as part of its *National Broadband Plan*.<sup>2</sup> As the FCC begins to seek comments on a myriad of policies, including intercarrier compensation reform, the RLECs are marshalling their limited resources to fully participate in those proceedings by making comments and helping craft sound and reasonable policies. The RLECs encourage the Commission to do likewise, as its expertise and perspective regarding the needs and issues facing the RLECs and their rural customers is sorely needed at the federal level.

The RLECs, however, find it somewhat curious that AT&T would file its Petition and Complaint at the same time that the FCC has already initiated proceedings that would result in intercarrier compensation reform. Consequently, opening a parallel state regulatory proceeding would: (i) force the RLECs to spread their already limited resources even thinner in order to effectively participate in both the federal and state regulatory proceedings; (ii) likely lead to unnecessary duplication of effort and expense; and (iii) possibly generate disparate outcomes at the state and federal level. None of these outcomes is in the public interest for customers served by the RLECs in Kentucky.

---

<sup>2</sup> *Connecting America: The National Broadband Plan*, FCC (Mar. 16, 2010) ("*National Broadband Plan*").

Thus, while the RLECs are not ultimately opposed to access reform as a general matter, AT&T's Petition and Complaint appears ill-timed and counter-productive. In its current form, for instance, AT&T's plan for Kentucky switched access reform differs markedly from that put forth by the FCC in its *National Broadband Plan*. Thus, whatever result is reached in Kentucky is likely to be temporary in nature and wasteful of the parties' and the Commission's limited time and resources in the absence of federal guidance on these matters of crucial importance to the state of telecommunications service in areas of high-cost service like rural Kentucky.

For these reasons, and as explained more fully below, the Commission should deny AT&T's request to open an administrative case for the purpose of implementing intrastate switched access reform in Kentucky. In the alternative, if the Commission is inclined to open an administrative case to address intrastate switched access rates, it should: (i) do so separately from the *Windstream Access Case*; and (ii) proceed in concert with the parallel federal regulatory proceedings.

## **DISCUSSION & ANALYSIS**

### **I. AT&T Has Shown No Harm.**

#### **A. AT&T has shown no harm to itself resulting from RLEC intrastate access rates, nor has it proven that these rates are above the cost of providing service.**

AT&T's Petition and Complaint fails to show how it is harmed by the RLECs' intrastate switched access rates. Nor has AT&T set forth a *prima facie* case showing that the RLECs' intrastate switched access rates are unjust and unreasonable. Instead, AT&T complains about circumstances that are of its own making.

As AT&T acknowledges in its Petition and Complaint, it was AT&T that elected to enter into an alternative regulation scheme that reduced its intrastate switched access rates to interstate levels.<sup>3</sup>

---

<sup>3</sup> *BellSouth Telecomm., Inc.'s Application to Restructure Rates*, Case No. 97-094, Order at 1 (Oct. 24, 1997).

As a result, AT&T's local and business rates are no longer rate-of-return regulated.<sup>4</sup> AT&T saw a business opportunity to unyoke its revenues and earnings from rate-of-return regulation, and it took it. This has allowed AT&T to receive revenues and earnings in excess of its costs for unregulated local and business rates, which, in turn, likely offset any alleged lost revenues from intrastate access rates. In fact, AT&T's company-wide return on equity in 2009 was in excess of twelve (12) percent.<sup>5</sup>

However, now that AT&T is experiencing competition from other emerging technology markets such as Voice over Internet Protocol ("VoIP") and wireless phone services, it is looking to the RLECs and their rate-of-return regulated intrastate access rates as a way to staunch the alleged loss of business and revenues caused by its own decision to enter alternative regulation.

AT&T itself acknowledges that the real issue is not intrastate access rates, but rather the wide array of emerging technologies with which AT&T alleges it must now compete.<sup>6</sup> In fact, AT&T squarely recognizes in its Petition and Complaint that its "wireline long-distance business has lost millions of minutes of traffic to . . . competing technologies [such as email, texting, wireless phone services, VoIP services, cable telephony, instant messaging, and social networking websites] . . . because of the market distortion created by regulatory rules permitting those alternatives to not incur costs in the same way as wireline long-distance service, and accordingly those alternatives can offer more attractive retail prices."<sup>7</sup> Even though AT&T acknowledges that this is the real issue, it apparently sees the RLECs' intrastate access rates as the lower-hanging fruit, while simultaneously ignoring the fact that the RLECs' revenues are also being negatively impacted by the same competing technologies.

---

<sup>4</sup> This holds true for Windstream and Cincinnati Bell, as well.

<sup>5</sup> AT&T as used in this sentence is not limited to the parties as defined in the case header, but includes AT&T's business entities nationwide.

<sup>6</sup> AT&T Petition and Complaint at 10.

<sup>7</sup> AT&T Petition and Complaint at 10-11.

AT&T has also failed to show that reforming the RLECs' intrastate switched access rates would actually enable it to compete with these emerging technologies. In any event, AT&T has seriously overstated the potential impact that a reduction in RLEC switched access rates would have. Due to the small size of the RLECs in Kentucky, a reduction in their switched access rates is highly unlikely to have any effect at all on the competitive landscape for AT&T.

Likewise, AT&T's reliance upon the FCC's *National Broadband Plan* as a basis for alleviating its regulatory predicament is fundamentally misplaced. The purpose of such reform is not to help large wireline telecommunications providers like AT&T become more competitive, but rather to encourage and support further development of broadband technologies in high-cost, underserved areas. The *National Broadband Plan* is a marked turn by the FCC away from traditional wireline networks like AT&T's to IP-based broadband networks.<sup>8</sup> In short, the *National Broadband Plan* actually encourages further development of the networks that support the very technologies against which AT&T finds itself competing for access minutes. AT&T's reliance upon the *National Broadband Plan* to help it compete against these new competitors is fundamentally misguided.

Nor does AT&T's Petition and Complaint offer any data in support of its claim that the RLECs' intrastate access rates are excessive. Aside from its claim that the RLECs' intrastate access rates are significantly higher than their corresponding interstate rates – a claim that AT&T commonly makes in other jurisdictions and one that ignores the steps taken by the FCC to reform interstate access rates – AT&T provides no data that these rates, which are filed with and approved by the Commission, exceed each RLECs' underlying cost of providing switched access service.

---

<sup>8</sup> *National Broadband Plan* at 141 ("A comprehensive reform program is required to shift from primarily supporting voice communications to support a broadband platform that enables many applications").

Under no set of circumstances, then, has AT&T shown that the RLECs intrastate access rates are the source of its alleged difficulties.

**B. AT&T has shown no harm to end-user customers from RLEC access rates.**

AT&T has also failed to show that the RLECs intrastate access rates have harmed its end-user customers. In fact, major interexchange carriers ("IXCs"), including AT&T, generally charge end-user customers the same rates for intrastate and interstate calls, regardless of the underlying access rates. That is, end-user customers typically pay a single rate for a bundled telephone plan and are, thus, unaffected by the RLECs intrastate rates.

Ironically, in some instances AT&T charges its end-user customers different rates for intrastate and interstate calls, depending upon the plan or bundle of services purchased. For instance, if an end-user customer were to choose a long distance plan without an associated local calling plan, AT&T would charge that customer a higher long distance rate for that access than a customer who also has a local calling plan. If anything, it is AT&T's intra-LATA toll rates that are excessive and unnecessarily high, taking advantage of residential customers that use AT&T's tariffed rates. (*See, for example*, AT&T Long Distance Tariff, 1<sup>st</sup> Revised Sheet 11 attached hereto as Exhibit A) (showing a long distance rate of twenty-five (25) cents per minute for customers without an associated calling plan). In addition, AT&T is simply incorrect when it asserts that the RLECs have not rebalanced access rates. The RLECs rebalanced their access rates when structural interstate changes occurred in November of 1999.

Yet for all of the concern in its Petition and Complaint regarding the alleged harm caused to Kentucky consumers as a result of "inflated" intrastate access rates,<sup>9</sup> AT&T's access reform plan makes no provision whatsoever to pass along to its customers any proposed cost savings. AT&T's

---

<sup>9</sup> AT&T Petition and Complaint at 9-10.

proposal for intrastate access reform is curiously silent regarding what should happen with any alleged cost savings it would experience through reduced rates. Without adequate market or regulatory pressure, AT&T would presumably pocket those savings and continue to charge its customers the same rates for its various phone plans and long distance service packages. Accordingly, any reform of access rates should require that any cost savings achieved through reduced access charges must flow through to the Kentucky consumer. Otherwise, it will be the IXCs that benefit from reform and not the consumer.

**II. RLEC Intrastate Switched Access Rate Regulation Presents Unique Questions Not Suited for Consolidation with the *Windstream Access Case*.**

The intrastate switched access issues presented in the *Windstream Access Case* differ significantly from those presented by rate-of-return regulated providers like the RLECs, which are in turn significantly different from those presented by the competitive local exchange carriers ("CLECs"). Each should be addressed accordingly in separate proceedings, if at all. Because the issues associated with access rate regulation are complex and unique, AT&T's attempt to lump them all together in one proceeding by requesting that the Commission consolidate an intrastate access reform proceeding with that of the currently pending *Windstream Access Case* should be rejected. The issues associated with intrastate access rate reform are complicated due to the unique characteristics of serving high-cost rural areas and the RLECs' unique regulatory status.

As an initial matter, Windstream, Cincinnati Bell, and AT&T are deregulated entities. Thus, the local and business rate revenues that these entities collect are unknown, and cannot be taken into consideration for purposes of determining proper access rates for RLECs. Because these revenues are unknown, AT&T, Windstream and Cincinnati Bell are able to, and presumably do, earn revenues in excess of their costs on intrastate business.

The RLECs, however, are in a fundamentally different position than that of AT&T, Windstream and Cincinnati Bell. The RLECs are rate-of-return regulated entities. This means that the RLECs local rate revenues are known and regulated; they cannot be raised or lowered without Commission authorization. This is not true of Windstream, Cincinnati Bell and AT&T. Moreover, because many of the RLECs are “average schedule settlement” companies that cannot break apart intrastate costs, the Commission has historically been able to consider the RLECs’ interstate earnings in setting local rates.

AT&T also ignores a crucial fact in its Petition and Complaint: interstate switched access rates are themselves set artificially low due to the FCC's previous reform measures. Interstate access rates are lower because previous FCC orders mandated that implicit costs reflected in per-minute rates be transitioned to explicit federal high-cost universal service mechanisms including Interstate Common Line Support ("ICLS"), Local Switching Support ("LSS") and the Subscriber Line Charge ("SLC"). Accordingly, if the annual levels of ICLS, LSS and SLC recovery amounts received by the RLECs were divided by the RLECs' originating and terminating switched access minutes, the RLECs' interstate per minute switched access rates would be in line with corresponding intrastate switched access rates and reflect the RLECs' underlying cost of providing switched access service.

Intrastate access rates, in comparison, are treated differently. Intrastate access rates are higher because cost recovery is included in the actual rate. The intrastate access rates charged by the RLECs reflect the recognized costs of doing business in high-cost areas like rural Kentucky. Quite simply, telephone networks in rural communities are more costly to build and maintain because there are fewer customers and those fewer customers live farther apart. Given the fact that the RLECS have carrier of last resort obligations to provide voice service to all customers residing in their certificated service territories, the above-average costs of providing service in rural areas is still a

fact of life for the RLECs. Combined with the fact that the RLECs are already experiencing a significant loss of annual access lines, any proposed restructuring of intrastate switched access rates that results in higher costs for the RLECs' consumers would only serve to further exacerbate the high-cost of rural service during these difficult economic times. AT&T's plan would most likely result in higher business and residential rates for Kentucky consumers. Under any circumstance, the RLECs' current, tariffed rates in Kentucky are just and reasonable, and AT&T has failed to show otherwise.

Finally, the RLECs have invested and continue to invest millions of dollars in their respective network infrastructures to ensure that their customers have access to the same state-of-the-art, comparably priced technology as those who live in urban areas. As a part of that investment, the RLECs are aggressively building and providing universal broadband to their Kentucky customers. Yet, any uncertainty brought about by a change or threatened change in intrastate access rates would have a chilling effect on the RLECs' continuing ability to invest in their networks and bring state-of-the-art services, including high-speed broadband, to customers residing in rural areas of Kentucky.

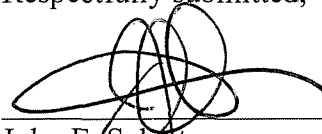

### **CONCLUSION**

For these reasons, the RLECs respectfully request that the Commission deny AT&T's request to open an administrative case for the purpose of implementing intrastate switched access reform in Kentucky. Inasmuch as the RLECs are not opposed to access reform as a general matter, there is simply no crisis in the Commonwealth of Kentucky caused by RLEC intrastate switched access rates – and certainly not one that would justify the expedited procedural schedule proposed by AT&T. AT&T has failed to make a *prima facie* case otherwise. Neither AT&T nor its customers have been harmed by the RLECs rates. Instead, AT&T is a victim of its own decision to enter into an

alternative regulation scheme that put it at risk of competition with other technologies not subject to access charges.

If the Commission is nevertheless inclined to open an administrative case to address intrastate switched access rates, it should: (i) do so separately from the *Windstream Access Case*; and (ii) proceed in concert with the parallel federal regulatory proceedings. The issues associated with RLEC intrastate access rates are complicated by the unique characteristics of serving high-cost rural areas and the RLECs' rate-of-return regulatory status. These issues would be better addressed in a separate proceeding. Benchmarking any access rate case with parallel federal regulatory proceedings will allow for ample time to get the regulatory framework right and serve to promote a consistent outcome that protects the availability of quality, affordable telecommunications services in the high-cost rural areas of Kentucky.

Respectfully submitted,

---

## SYMBOLS

The following symbols are used for identifying changes in guidebook content:

C – Changed Term or Change in Text

D – Deleted Text, Discontinued Rate, or Discontinued Term

I – Increased Rate

N – New Text

R – Rate Reduction

*n* – Moved Text where *n* is the next available number

SECTION 1 – SWITCHED SERVICES RATES AND CHARGES

1.1 Operator Toll Assistance Services

1.1.1 Access Method - Toll Free Access Number

- (A) Reserved for future use
- (B) Group 2 Toll Free Access Numbers

.1 Billed To LEC Card

If charges are billed to a LEC Card, the usage rates and per call charges are the same as the usage rates and per call charges described in Section 1.1.2 (A), (B), and (C) of this Price List.

.2 Billed to Calling Card

.a Per Call Charges

For per call charges, see Section 1.1.2 (C) of this Price List.

-For fully automated calls billed to the Calling Card - Option 3, a per call charge does not apply.

-The per call charges for all other calls billed to the Calling Card are located in Section 1.1.2 (B) and 1.1.2 (C) of this Price List.

SECTION 1 – SWITCHED SERVICES RATES AND CHARGES

1.1 Operator Toll Assistance Services (continued)

1.1.1 Access Method - Toll Free Access Number (continued)

(B) Group 2 Toll Free Access Numbers (continued)

.2 Billed to Calling Card (continued)

.b Fully Automated Usage Charges

.i Calling Card - Option 1, Option 2, and Option 4, Value Card Plus

The usage rate may be found in Section 1.1.2 (A) of this Price List.

.ii Calling Card - Option 2 Categories

Calling card usage rates for Customers that subscribe to Calling Card - Option 2 categories are the same as the usage rates that apply to 1+ outbound calls originating via Switched Access and billed under the optional calling plan selected by the Customer. Usage rates may be found in Section 1 of this Price List.

.iii Calling Card - Option 3, and Option 3 Categories

Calling card usage rates for Customers that subscribe to any of the Company's High Volume Calling plans are the same as the usage rates that apply to 1+ outbound calls originating via Switched Access and billed under the High Volume Calling optional calling plan selected by the Customer. Usage rates may be found in Section 1 of this Price List.

.3 All Other Operator Toll Assistance Billing Options

For all other Operator Toll Assistance Services calls completed via a Group 2 Toll Free Access Number, the usage rates and per call charges are the same as the usage rates and per call charges described in Section 1.1.2 of this Price List.

SECTION 1 – SWITCHED SERVICES RATES AND CHARGES

1.1 Operator Toll Assistance Services (continued)

1.1.2 All Other Access Methods

There are two rate elements. They include a usage charge and a per call charge. The usage charges and per call charges follow:

.3 Optional Feature Charges

The description and rates for available optional features may be found in the Company's interstate Voice Product Reference and Pricing Guide which may be found at [www.att.com](http://www.att.com).

<sup>1</sup>This Service is no longer available to new Customers or to existing Customers at new locations effective April 1, 2005.

SECTION 2 – MISCELLANEOUS CHARGES

2.1 Return Check Charge

When another telecommunications carrier provides the billing function on behalf of the Company, the other carrier's bad check charge applies. Otherwise, the Company will assess the Customer a return check charge of \$25.00 for any check that is returned for any reason by the financial institution on which it is drawn.

2.2 Additional Labor Charges

	<b>Rate Per Fifteen Minutes</b>
8:00 am to but not including 5:00 pm Monday through Friday excluding holidays	\$25.00
Holidays (New Years Day, Federally Observed Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas)	\$31.25
All Other Times	\$31.25

The Additional Labor Charges shown above apply for all Services which are provided by the Company as stand alone intrastate Services (i.e. when the Customer subscribes to one of the Company's outbound Service offerings for intrastate IntraLATA calling and selects another company for the provision of the Customer's intrastate InterLATA calling). When intrastate Service is offered by the Company as an add-on to one of the Company's interstate service offerings (i.e. Switched Services), the Additional Labor Charges apply pursuant to Company's interstate Voice Product Reference and Pricing Guide which may be found at [www.sbc.com](http://www.sbc.com).

2.3 Order Expedite Charge

Customers may request a change in the requested Service due date for pending Service Orders. When the Company accepts a request to expedite an order, the Company does not promise to deliver on the desired due date in advance of the normal service order interval. The Company will use its best effort to meet the desired due date. A one-time charge applies when the Customer requests a Service due date sooner than the standard interval due date, and Service is provided sooner than the standard interval due date. An Order Expedite Charge applies when a change of requested Service due date is the only Customer requested change to the original or supplemental Service Order. The Order Expedite Charge is as follows:

<b>Rate Per Order</b>	<b>Non-Recurring Charge</b>
	\$300

The Order Expedite Charge shown above applies for all Services which are provided by the Company as stand alone intrastate Services (i.e. when the Customer subscribes to one of the Company's outbound Service offerings for intrastate IntraLATA calling and selects another company for the provision of the Customer's intrastate InterLATA calling). When intrastate Service is offered by the Company as an add-on to one of the Company's interstate service offerings (i.e. Switched Services), the Order Expedite Charge applies pursuant to Company's interstate Voice Product Reference and Pricing Guide which may be found at [www.sbc.com](http://www.sbc.com).

SECTION 2 – MISCELLANEOUSCHARGES

2.4 Payphone Origination Charge

Pursuant to the FCC's Order in CC Docket 96-128, this charge applies only to dial-around calls, i.e., calls originating using a carrier's access code, a Customer's 800/877/888 (and other area code assignments as appropriate) number and other toll free numbers and debit card calls, from payphone instruments. The Customer shall pay the Company a per call charge of \$0.60 per call for all such traffic.

2.5 PIC Change Rebate

If local telephone company is requested to change the subscriber's PIC from one long distance service provider to another long distance service provider, the local telephone company may charge the Customer for the PIC change. If a Customer incurs such a charge from its local telephone company for changing the PIC to the Company, the Company will rebate that charge to the Customer. The rebate will be in the form of a credit on the Customer's bill. The credit will appear within two (2) billing cycles after the Customer provides the Company proof that the local telephone company billed the Customer for the PIC change.

SECTION 2 – MISCELLANEOUS CHARGES

2.6 Duplicate Bill Charges

2.6.1 General

- A. Subject to Company retention policies, availability of the bill(s), and ability of the Company to retrieve the bill(s), a Customer may request a paper copy of their bill(s). A Duplicate Bill Charge may apply upon a Customer's request for the duplicate copies of their telephone bill(s) in accordance with the charges specified following, unless stipulated differently in the Customer's contract. This Service will be available where billing and technology exists.
- B. The Duplicate Bill Charge, as defined in Section 2.6.2 of this Price List, will not be applied in the following instances:
  - 1. When a Customer is currently subscribing to a Service to receive additional copies of their bills;
  - 2. When Customers request a copy of the bill because of non-receipt of an initial bill after new connect, transfer or change of address orders;
  - 3. When Customers have not received a bill due to Company error in the address of the bill;
  - 4. When a customer requests a copy of the current monthly bill or final bill

2.6.2 Rates and Charges

Duplicate Bill Charge, mailed via standard US mail only:

Per bill copy charge \$5.00

2.6.3 Liability

With respect to any claim or suit, by a Customer or any others, for damages arising from delays, errors, or omissions, or failure to provide bill copies, the Company's liability, if any, shall not exceed the amount paid for the Service.
