COMMISSION

In reference to: Case number 2010-00476

To whom it may concern:

I understand Water Services Corp. of Ky. has filed a request with Ky. Public Service Commission to increase our water rates another 21.9%. In 2009 they asked for a 51% increase and was granted a 31% increase. This addition if granted will be more than the initial 51% asked for.

We are senior citizens and believe this is bad for seniors and younger struggling families. We (seniors) are seeing zero increases in our benefits.

I am asking the Ky Public Serv. Comm. to deny this increase.

Thank You -
