Re: Case No. 2011-00375

Dear Mr. Derouen:

We are in receipt of the Commission's September 26, 2011 letter indicating a filing deficiency with the Louisville Gas and Electric Company's and Kentucky Utilities Company's ("Joint Applicants") September 15, 2011 Joint Application in this matter. The Commission's letter indicated a deficiency related to the filing requirement set forth in 807 KAR 5:001, Section 9(2)(b) concerning "copies of franchises or permits, if any, from the proper public authority for the proposed new construction or extension, if not previously filed with the commission."

We believe the letter is in error and that the Joint Application, supporting Direct Testimony, and exhibits attached thereto satisfy the filing requirement set forth in 807 KAR 5:001, Section 9(2)(b).

In an effort to resolve this filing deficiency issue as promptly as possible, we write to inform the Commission that the permits identified and discussed in the Joint Application and in the Direct Testimonies of Joint Applicant witnesses Messrs. John N. Voyles and Gary H. Revlett are all the permits of which the Joint Applicants are aware at this time that will be required for the requested construction of the proposed new generating facility at the existing Cane Run site. To the extent that the Joint Applicants become aware that any other permits will be required for the proposed construction at the Cane Run site, the Joint Applicants will so inform the Commission and intervenors via appropriate means.

Finally, we request that the Commission issue a letter at its first convenience confirming the sufficiency of the Joint Application as of September 15, 2011. Should you have any
