I am astounded that KU is proposing to increase the monthly bill by as much \$7.41 for residential use. I am 75 and on the lowest SS my budget is bursting already this really would hurt. I asked KU if it would not have been cheaper to use wind power, as is done all over Europe, I guess they were already in the process of building the expensive plant, and it seems to me they're offices and grounds take a lot for upkeep. Please stop that high of an increase. Thank you very much.

Sincerely

Helga Grigsby
