To Commissioners:

Regarding case # 2012-00221 and opposition to proposed increases in fixed monthly charges.

We are KU customers and are opposed to an increase on electric service. If increase is a true necessity, then the rate increase should be on actual energy use, not on the monthly service charge.

Increasing the monthly energy charge from \$850 per month to \$1300/month is unfair, decreases investment in efficiency and does not motivate people to be less wasteful with energy. It will impact the poor, those on fixed incomes, and conservationists. We need to reward customers who practice energy efficiency, not those who are wasteful with energy.

Please do not allow KU to implement this newly proposed pricing structure.

Yours,

Donna W. Goebeler
Louis Clay Goebeler
