This may have to go to Eric Robeson after Tome is happy with it.

Linda,

Here is the first propopsal. Please create a requisition for "HAPS testing at Coleman Station". Create two

line items; one line for the "HAPS testng", \$77,900, a second line for "time and materials", \$10,000 to cover any additional expenses due to delays.

Thanks,

Mike

Mike,

Attached is an electronic copy of the proposal you requested.

I have done my best to write and price this according to the RFP you sent.

Make note that we call out the need for 4-Ports at all the locations where multiple trains are operating. This is the only way to keep on schedule.

Thanks for the opportunity and see you Monday if possible.

James Christ Q.S.T.I.
