Subject: AirTech Purchase Order

Hey Paula. I talked to Tom Shaw and Mike Galbraith concerning the AirTech purchase order for stack testing associated with the Sargent & Lundy environmental compliance study. The job was sole sourced due to the timing of the project, available equipment and manpower, competency of the contractor, and safety credentials. AirTech was C-SCAP certified and had the available manpower and equipment to start the project in a timely manner so the issuing of the final S&L Compliance Report would not be delayed or linger late into 2011. AirTech was also considered to be competent in the stack testing arena whereas quality of work would not become an issue. Tom Shaw completed a Sole Source Form at the beginning of the project.

Please give me or Tom a call if there are any further questions.

Thanks.

Mark W. Bertram, CHMM
