As you will note below, [Big Rivers](#) has been tasked with updating our CCR compliance costs as part of a presentation the state's elec. industry will be giving next week to the Kentucky Legislature's Natural Resources & Environment Committee. I sent the request below to Tom for updated #'s; he advises me that you would be the best resource of these.

Can you help me out with this?

Here's the first draft of the power point presentation that LG&E will give to the Natural Resources & Environment committee on Nov. 3rd. Would you please look this over and address the questions listed below in Freibert's email? Essentially they're asking us to update our CCR cost #'s.

Thanks.

John

Gentlemen:

Here's a first shot at what the 11/3 CCR presentation for Chairman Gooch might look like – and what each to electric will need to update/provide to fill in the blanks.

- Taken directly from our KAM presentation
- For purposes of this update/your input – want to clarify that the end product will only deal with CCR. It will be limited to landfills and ash ponds and not address Dam safety and inspection issues.
- We all need to update our CCR numbers/confirm
- Is Duke in for this one?
- I temporarily left the "cost" slides in for each of us for reference, but would like us to
- Tease out the portion of cost related to CCR – and strip away that for Air (most of us had it as two line items anyway, but want confirmation)

- Combine all our anticipated costs/rate impact on a slide to follow and mirror #4 (collective cost of capital) and discard the former cost slides
- Keep some sort of final slide that indicates that, while we will comply, we are working on the issue
- Other things to include/address?

What are your thoughts?
