Bernie, I would like your take on the question below as well

Eric

I'm assuming all is worked out between GSA and BREC (based on a thank you note I saw from your president)

Subject: CSAPR trading

Although initial thoughts are we should book any excess SO2 CSAPR allowances in 13 and 14 for use in 15, I am curious about trading restrictions in CSAPR.

Should we decide to trade some of our allowances, who are we allowed to trade with (other than Kentucky utilities)?
