Subject: Comments on draft report
Importance: Normal

Adam,

Big Rivers submits the following comments regarding the draft report:

- 1 Include a summary of recommendations for CSAPR and HAPS/MACT in the executive summary including projected capital costs
- 2 Table ES-6 should list the compliance activity (conversion to dry bottom)
- 3 Page 1-7 should the paragraph discussing PM be deleted from this section?
- 4 Page 3-5 HMPL only has one spray level, not two
- 5 Page 4-2 HMPL spray level issue again
- 6 Page 5-2 HMPL spray level issue again
- 7 Page 3-6 Section 3.2.3 makes no reference to SCR or SNCR
- 8 Page 3-7 Section 3.2.3.1.3 on PerNOxide seems rather extensive compared to other technologies. Would this detailed description fit better under section4.3?
- 9 Page 4-1 Section 4.1.1 this section discusses 2014 requirements for Coleman, Green and HMPL but not for Wilson. Please add 2014 requirements for Wilson
- 10 Page 5-3 for the Green 'SCR option, please remove cost of replacement catalyst in the O&M figures as Big Rivers capitalizes that material
- 11 Page 5-3 for the Reid natural gas conversion, how much of the O&M expense is fuel? Please break this amount out separately

Eric
