Subject: Draft Project Approach

Eric –

Black & Veatch has developed the attached project approach for the specification development at Wilson Station. We are putting together our estimate based on this project approach. We hope that by sending this to you in advance of our full proposal, we can ensure that we are on the right track. If we have misunderstood anything about the project, please let us know.

Our goal in sending this is to make sure that we are providing Big Rivers with exactly what they need to execute this project.

Regards,

Diane Fischer
