Importance: Normal

Travis, Per our meeting this morning, Eric Robeson will provide you with an estimate regarding inventory of spare parts, as for reagent inventory levels we do not expect additional inventory levels of reagent at Wilson and the Ammonia at Green will be expensed as it is delivered. Please let me know if you need any further information.

Subject: ECP - Spare Parts and Reagent Inventory

Bob,

I am working on adjusting my models to more accurately reflect the proposed Environmental Surcharge mechanism. One item that Big Rivers will seek to recover is the Return on Rate Base (RORB) related to addition spare parts inventory and reagent inventory related to the new ECP assets. Could you give me an estimate for these additional inventories, or let me know the best way to estimate it. We can only include inventory above and beyond what we have today.

Thanks,

Travis Siewert, CPA, CMA
