Subject: Emission Allowance Allocations
Importance: Normal

Mike,

Could you provide the SO₂, NO_X Annual, and NO_X Seasonal allowances allocated to Big Rivers for 2013-2026 under the base case (CAIR) and under the environmental case (CSAPR). The PCM runs should provide allowances consumed and the prices. This should allow me to determine the amount of allowance expense each year under each scenario.

Travis Siewert, CPA, CMA
