Subject: Environmental Compliance Study
Importance: Normal

=

BREC (or rather the RUS) has a "preliminary studies" account number that we use when we haven't yet determined whether or not a project is capital. It is technically classified as capital until we know that it's not. We have had a project called "STUDY" that has been used for G&A and transmission in the past. Today I added a project for production studies. Please use this when referencing the Environmental Compliance Study. Also, as I understand it, we will have to fund it out of the capital budget but we do not have to write up an AIP, etc. at this time.

Org: 0012

Project: STUDY-PRODUCTION

Task: ENV-COMPL

Mark:

Can you please change the PO from yesterday to this coding?
