Subject: Environmental Rate Increase

Response requested: No

Importance: Normal

==

After further reviewing the rate impact from potential CSAPR and MATS compliance strategy, I feel I misspoke in the last coordinating meeting.

The cumulative rate increase should be 7.6% over the 2012 base case. This includes capital recovery and incremental O&M attributable to CSAPR and MATS, but does not include impacts from normal business operations.

Please contact me if you need further clarification.
