Subject: Pace Global price forecasts detail?
Importance: Normal

=

Eric,

After discussions with Bill and Mark for purposes of 15-yr modeling inputs; would you be able to inquire with Pace Global if they could provide electronically their:

- Power market forecasted pricing hourly, on-peak and off-peak, 2012 through 2026?
- ILB (WKy) coal forecasted pricing by month 2012 through 2026 (in \$/mmBTU)?
- Henry Hub natural gas forecasted pricing by month 2012 through 2026 (in \$/mmBTU)?
- CSAPR allowances forecasted pricing by month 2012 through 2026 (SO₂, annual NO_x, and seasonal NO_x)?

This would greatly facilitate modeling efforts.

If you have any questions please let me know?

Thanks,

Mike T.
