Talked with Jim McMahon this pm

Their model gives an hourly price, so they can calculate on peak and off peak

McMahon and others in his firm have testified in front of state commissions previously

He will probably be at Vectren in about 2 weeks and would be available to meet with us to further discuss their qualifications

Eric

**Subject:** Proposal and CSA - MISO Price Forecast

Eric,

Here is the proposal and Consulting Services Agreement for the stochastic MISO price forecast we discussed. We have set this up as a \$37,500 not to exceed budget, but I am confident we will come in significantly below that. Please let me know if you have any questions.

I'll catch up with you early next week.

Thanks,  
Jim
