Subject: RE: Rate With vs Without Smelter Load
Importance: Normal

=

Great! Thanks! Would like to discuss this with you... hear how you would summarize these results. Also, what would be the incremental rate impact, above and beyond this, of the new ECP (CSAPR and MATS), with and without the smelters?

Mark

Mark,

The attached file summarizes rate scenarios with and without smelter load (assuming excess power is sold on the market).
