Eric

We have a couple of projects in process with Burns & Mac.

We are currently quoting on Black & Veatch projects.

Fuel Tech has worked with Stanley Engineers & Sega Engineers.

There are some other firms that concentrate on industrial plants.

Mac

Thanks

Does Fuel Tech work exclusively with S&L?

Eric

Currently we Fuel Tech is working with S&L on the MidWest Gen SNCR projects in IL.

There have been several other projects which indicates that the relationship has been improving.

I will try to get the main S&L contact for the MidWest Gen. allaince project.

Got the quotes and reviewing them

Question: does Fuel Tech have any relationship with Sargent & Lundy?

Would appreciate reply back on Thursday (leaving on vacation Friday)

Thanks

Eric
