Eric,  
Monday and Tuesday would be good for Sebree.

Jim

Subject: S&L visits next week

S&L will be at each plant next week for follow up discussions with you and your production and maintenance managers.

They expect to spent a couple of days at Sebree and one each at Wilson and Coleman.

In order to make this most effective for BREC, are there any days next week that are better or worse for your plant?

Let me know by Thursday pm and I will coordinate with S&L.

I plan on sitting in when I can to help with my education as well

Eric
