Importance: Normal

Per our earlier conversation I would appreciate it if you would continue to facilitate this project until we get some direction.

Thanks
Bob

Bob,
Sargent & Lundy has been issued purchase order #203562 to begin an environmental study for Big Rivers. I have a conference call tomorrow with S&L's project team to discuss several items and determine when they will arrive on site. Currently it appears they plan to begin with a kickoff meeting next week and jump immediately into the study.

Would you like for me to continue representing production by facilitating their activities with all stations and other groups until someone else takes over? I believe you need a common focus to help stay on track and ensure data request etc stay on course. Let me know.

Jim

Jim, the attached p.o. has been faxed and e-mailed to Todd Hanssen at Sargent Lundy

Thanks
Mark
