Eric,

Reduced load testing for HAPS was performed at the Wilson Station on August 28. The test report is ready for delivery. The test contractor made an additional copy for Sargent & Lundy. Would you like for Sargent & Lundy to receive a copy?

This testing was not specified under the technical direction of the Sargent & Lundy contract.

Thanks,

Mike

Subject: Sargent Lundy

Mike,

The reports are ready to ship out, but I cannot find the address you sent me for Sargent Lundy. I just got a new computer and many of my old emails were not carried over.

Please send it to me and we will get them on the road.
