**Importance:** Normal

---

John, Mark Hite, Mike Thompson and I discussed this issue earlier today and decided due to time constraints we would make the necessary adjustments outside of the production cost model.

Bob - does the addition of the Dry Sorbent Injection and Activated Carbon injection for MATS compliance affect the unit operating characteristics that are captured in the production cost model (e.g. heat rate, variable O&M, etc.)? If yes do we have a problem that requires us to re-run the production cost runs? Perhaps we need to run this down with Mike Thompson.

Thanks,  
JW

**Subject:** Updated CSAPR & MATS CAP EX and O&M

Attached is an updated cap ex and O&M file as well as the ECP table of projects.

After reviewing the S&L report further, I have included Dry Sorbent Injection systems as well as Activated Carbon Injection systems for MATS compliance

Net increase is roughly \$30M cap ex and \$2M annual O&M expense.

All 4 tabs in this spread sheet have changed.

The ECP table of projects also changed to reflect the cap ex and O&M revisions.
