Subject: when can we talk
Importance: High

=

I have several comments on draft report

Many are philosophical, others are detailed?

How hard would it be to pull 316b and CCR out and make it secondary near the end of report?

On compliance strategies, we include 5 combined scenarios?

Should we look at SO₂, NO_x, MACT separately?

Other comments are more easily explained while both of us have document in front of us

Eric
