PUBLIC SERVICE
COMMISSION

This is in regards to the proposals for a new area code in part of Western Kentucky. Speaking for my husband and myself, we would much prefer the overlay plan.

It makes more sense to give the new area code to new phone customers. We would prefer not having to change our phone number again. We had to change ours when the 270 area code replaced 502 in our part of the state. We don't feel that dialing all ten digits would be a big deal since with certain cell phones (like some pre-paid) you already have to do that. We also honestly feel that with the global nature of communication these days "long distance" calls, service, and charges should be a thing of the past. And letting current customers keep the 270 area code would eliminate a lot of hassle and expense for businesses as well.

Thank you for your consideration on this matter.

Sincerely,

Tabatha M. Clark
