**Subject:** your comments in case 2012-00428 - smart grid administrative case

Dear Mr. Coomers :

Thank you for your comments to the Kentucky Public Service Commission regarding the use of smart grid technology by electric utilities in Kentucky. Your comments will be placed AS SUBMITTED into the case file for the Commission's consideration as it deliberates in this matter.

As you noted, the case number in this matter is 2012-00428. Please reference it in any further comments.

Records in the case are available on the PSC website at this location:  
[http://psc.ky.gov/Home/Library?type=Cases&folder=2012 cases/2012-00428](http://psc.ky.gov/Home/Library?type=Cases&folder=2012%20cases/2012-00428)

Thank you for your interest in this matter.

Please include the below email in all comments on public case 2012-00428 - UNEDITED

<http://stopsmartmeters.org/2011/10/27/dutch-research-on-wireless-tree-damage-backs-up-smart-meter-plant-harm-observations/>

The above website unequivocally proves that ANY HUMAN BEING and/or ELECTRIC COMPANY and/or POLITICIAN and/or Government and/or ANY entity who still considers putting in "smart meters" does not care about human beings / the environments health!!!

The purposes of the "people" who want these "smart meters" installed is to (1) negatively effect the environment & peoples health + more sadistically to provide oppurtunites for everyday honest law abiding citizens to be spied on (via the 2 way communication abilities contained in "smart meters") particularly (but not limited to) people who do not have internet and/or "pay tv". The "smart meters" is the last "tool in the tollbox" for introducing a more unhealthy enviornment and ability to finally spy on "everyone ie rural people".

What is even worse than the health issues & spying that these "smart meters" willfully introduces is now any person and/or group of people would not have the ability to "crack into" ones home and send computer nstructions and/or voltage spikes with evil intentions to ruin ones home and/or possessions hooked up to electric.

"Smart Meters" are also the final piece of the puzzle that takes away (every person who resides in a residence) civil liberties / freedom / safety away from them.

This is due to the fact any wackjob who knows electric and/or computers could break in electronically and could ruin appliances (no matter if the appliances are internet addressable or not) and even unlock the homes doors (only if residents were ignorant enough to install "home management systems" and/or home security systems and/or smart locks) to even then stalk people and worse.

All of the above is "unlocked" by smart meters", taking advantage most people are too stupid to even realize this because they are the same sheeple who own cars with computers in the engine & ONSAT TYPE SERVICES & cars with keyless lock systems / basically any car built after 1979.

Also the sickos who want to charge a fee/ whatever is called for intelligent people to opt-out of "smart meters" is disgusting because they claim people would still have to go around monthly and read the "regular meters" WRONG.....

The people who reside at each address that is serviced by an electric company can 1 time per month on a predetermined day OR range of days could -- either drop off the reading at the company, US MAIL it in, enter the info on their account online, send it via smartphone (for the uneducated who use them - who are unaware of the finger and health damages they cause long-term) or even use a landline and call it in.....

Now the elitists say well gee the electric customer could cheat the company out of money, short term that is possible BUT since ALL "smart meters" need a once a year visit for reading and calibration, those workers could also (pre-determined time frame that customers know about ahead of time) read the analog meters in the area as well. Then if the readings for the 12 month period before the reading were too low or too high then an adjustment would be made on the next monthly billing cycle.

Therefore above is evidence that a fee/cost/whatever it is called, is not needed and would only be used to rip off the consumer even more than we already are.

Also the talk floating around that the state would then "pile on" more legal responsibilities onto the end-user (ones that were ALWAYS on the electric company) is nothing more than a scare tactic to "encourage" people to take "smart meters" and simply give up.

ALSO, it is well known even IF the people in charge of all these issues read these comments that they will not be considered because we are not "money people", people commenting are not corporate stooges, and/or are not the shadowy people behind all this.

Because IF the people in charge had the citizens' interests at heart at all, after reading that link above AND READING ALL THE NON-GOVERNMENT RESEARCH and/or the non-funded independent research on the dangers of "smart meters" the people in charge would have ALREADY banned smart meters from even existing.

The fact that the above has not happened yet (and the fact the people in charge claim that over 2 years is needed to decide the case) is undeniable proof of what the final outcome of this "public privacy and health destruction" fiasco will be.

Please add this to the public comments - UNEDITED - Public Case 2012-00428

[http://psc.state.ky.us/PSCSCF/2012%20cases/2012-00428/20140516\\_Susan%20Hedgecock\\_Request%20to%20Intervene.pdf](http://psc.state.ky.us/PSCSCF/2012%20cases/2012-00428/20140516_Susan%20Hedgecock_Request%20to%20Intervene.pdf)

[http://psc.state.ky.us/PSCSCF/2012%20cases/2012-00428/20140619\\_PSC\\_ORDER.pdf](http://psc.state.ky.us/PSCSCF/2012%20cases/2012-00428/20140619_PSC_ORDER.pdf)

The above pdf's are additional proof that PSC is not serving the consumer but cow towing to their corporate benefactors. This is proved because PSC now claims they can not intervene in helping consumer opt-out of the evil "smart meters" and put it at the feet of the ATTORNEY GENERAL, When in reality that is a copout because AToorney General is the step of last resort since PSC was created to intervene in cases such as this. to imm

Even worse is the fact I know of at least 3 people who have called in and asked if they move into area where they are installing "smart meters" the PSC told these people over the phone (NSA records all these calls) that IF the electric company refuses to install an analog meter because company insists on installing a "smart meter" to immediately call the PSC and file a case and that PSC would try and negotiate between customer and the company. Now 1 person saying it 1 thing but 3 PSC people saying it proves alot.

So PSC blowing off that person requesting an intervention proves PSC has no intrest in helping the consumer.
