**Re: In re: Salem Telephone Company Petition for Review, Application for
Grant of Numbering Resources and Request for Expedited Treatment
Case No. _____**

Dear Mr. Derouen,

Enclosed please find the original and ten (10) copies of Salem Telephone Company's Petition for Review, Application for Grant of Numbering Resources and Request for Expedited Treatment.

Should you have any questions concerning this matter, please do not hesitate to contact me.

Sincerely,

James Liebman

In the Matter of

*Salem Telephone Company Petition for
Commission Review of Reversal of a Decision of
the North American Number Pooling
Administrator*

Case No _____

**PETITION FOR REVIEW, APPLICATION FOR GRANT OF NUMBERING RESOURCES,
AND REQUEST FOR EXPEDITED TREATMENT**

Salem Telephone Company (“STC”), pursuant to rules adopted by the FCC for challenging determinations of the Number Pooling Administrator (“NeuStar”), petitions the Kentucky Public Commission Service (the “Commission”) for an expedited review of NeuStar’s denial of LCTC application for use of central office code numbering resources in the 270 area code.

Salem Telephone Company respectfully shows the Commission as follows:

1. STC is a telecommunications public utility regulated by the Commission providing intraLATA, local exchange telecommunications services in the Hyden Rate Center.
2. NeuStar is an independent non-governmental entity that is responsible for administering and managing the North American Numbering Plan (“NANP”). See C.F.R. § 52.13(a), (b).
3. On March 31, 2000, the Federal Communications Commission issued a Report and Order and Further Notice of Proposed Rule Making relating to numbering resource optimization (“FCC 00-104” or the “March Order”). On December 29, 2000, the FCC issued its Second Report and Order, Order on Reconsideration in CC Docket No. 96-98 and CC Docket No. 99-200, and Second Further Notice of Proposed Rulemaking in CC

Docket No. 99-200 (“FCC 00-429” or the “December Order”). These FCC orders addressed issues and strategies relating to the efficient use of numbering resources.

4. In FCC 00-104 and FCC 00-429, the FCC announced rules and sought comments in an effort to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of existing telephone numbers and to slow further exhaustion of existing numbers under the NANP.

5. Among other things, FCC 00-104 adopted a revised standard for assessing a carrier’s need for numbering resources by requiring carriers to report rate center based utilization data to NeuStar. The FCC further required that to qualify for access to new numbering resources, applicants must establish that existing inventory within the applicant’s rate center will be exhausted within six months of the application. Prior to this ruling, the Central Office Code Assignment Guidelines, used by the industry and NeuStar to make code assignments, required the applicant’s existing number inventory within the applicant’s serving switch to exhaust within six months of the code application in order for a code to be assigned.

6. This shift to a “rate center” basis for determining the need for new numbering resources was intended to “more accurately reflect how numbering resources are assigned” and to allow “carriers to obtain numbering resources in response to specific customer demands.” FCC Order ¶ 105. On December 28, 2001, the FCC entered an order retaining the rules requiring carriers to calculate MTE on a rate center basis rather than on a per-switch basis. *In the Matter of Numbering Resource Optimization; Implementation of the Local Competition Provisions of the Telecommunications Act of 1996; Telephone Number Portability*, CC Docket Nos. 99-200, 96-98 and 95-116, Third

Report and Order and Second Order on Reconsideration in CC Docket No. 99-200, FCC 01-362, Paragraph 48 (rel. Dec. 28, 2001).

7. On September 18, 2012, STC submitted a Central Office Code (NXX) Assignment Request - Part 1, and the CO Code Assignment - Months to Exhaust Certification Worksheet, to NeuStar to be assigned an 270 Code for the Salem Rate Center. While the code request is for the whole code, STC will retain one block for the rate center and the remaining 9,000 numbers from each code will be pooled. The Central Office Code Assignment Request and the Thousand Block Application Form are attached hereto as Exhibit "A"

8. The code assignment request is to open the code 270 and to obtain just the 1000-1999 block and pool the other 9000 numbers for Salem, KY for the company's new Metaswitch SALMKYXAGT0. The Metaswitch is located in Salem, KY and thus a unique LRN needs to be provisioned to identify the switch or POI in the number portability capable network.

9. The code assignment request was based on STC obtaining a Location Routing Number ("LRN") for new Metaswitch augmentations it is establishing at the Salem Rate Center. The new STC Metaswitch will function as a feature server in the existing Salem central office to provide new and advanced services as well as handle internal long distance traffic which the existing 5ESS switch cannot provide or perform. Customers requiring new feature functionality will be migrated to the new platform, and thus there is a need for an NXX/LRN for porting functionality to the Metaswitch. However, in order for the Metaswitch to be functional, it must host 1000 numbers. STC

does not have 1000 numbers that are appropriate to be hosted in the new switch. For this reason, STC sought the numbering resources as noted above.

10. STC's basis for requesting additional numbering codes is: (a) LCTC does not possess a non-contaminated existing code to transfer the A-record to the new switch Carrier Language Location Identifiers ("CLLI"); (b) the LRN would be a ported number as this is the only way to route pooled numbers; (c) if STC does not get a new NXX and the only numbers assigned to the new switches are pooled/porting numbers, any failure of Number Portability Administration Center ("NPAC")/Local Service Management System ("LSMS"), or any mishap on the LRN subscription in NPAC would eliminate any routing into the new switches, and in case of NPAC/LSMS outages etc., default routing to the NPA/NXX is used to get calls to the switch that owns the NXX so at least some calls can be completed; and (d) if the only numbers that belong to the new switch are ported/pooled numbers, a failure of NPAC/LSMS databases would route all traffic to the switch that owns the ported/pooled NXX.

11. STC completed the applications in accordance with NeuStar's Central Office Code (NXX) Assignment Guidelines and completed the necessary Months to Exhaust Certification Worksheet required by NeuStar.

12. At the time of the code request, the Salem Rate Center had a months to exhaust of approximately 85.24 months. The Months to Exhaust and Utilization Certification worksheet are included in Exhibit A

13. Despite the fact that Salem Rate Center may not exhaust for 85.24 months, STC is unable to utilize the new Metaswitch without a new NXXs.

14. On September 18, 2012, NeuStar's Central Office Code Administration denied the code assignment requests on the grounds that LCTC had not met the 75% utilization criteria now set forth in the Central Office Code (NXX) Guidelines, notwithstanding the fact that LCTC does not have the numbering resources needed to provide the service required in connection with its new Metaswitch. The Pooling Administrator's Response / Confirmation is included in Exhibit A.

15. STC's inability to utilize the new Metaswitch without the requested numbers prevents LCTC from providing the quality of service its customer's desire and expect.

16. Both FCC 00-104 and NeuStar's Central Office Code (NXX) Guidelines provide that state regulatory commissions have the power and authority to review NeuStar's decision to deny a request for numbering resources. See FCC 00-104, Appendix A, Final Rules, § 52.15(g) (3) (iv) ("The carrier may challenge the NeuStar's decision to the appropriate state regulatory commission"); NeuStar Central Office Code (NXX) Guidelines § 13.0 ("Appeals may include but are not limited to one or more of the following options: . . . C. The CO Code Administrator(s) and code holders/applicants may pursue the disagreement with the appropriate governmental/regulatory body").

17. The Commission has recognized its jurisdiction and authority to review NeuStar denials and to order the release of numbering resources to meet specific customer needs.

18. The Commission, and not the FCC, is the most appropriate body to address this appeal. As noted above, the Commission has been granted jurisdiction to hear appeals from NeuStar's decisions regarding numbering resources. Any jurisdiction of the FCC to do the same is merely concurrent with the jurisdiction of the Commission. LCTC

believes that the Commission can more quickly address the numbering problem facing STC, and, because time is of the essence, STC believes it is appropriate to pursue this matter in the forum that can most quickly address the issue.

19. Under earlier months-to-exhaust procedures used by NeuStar, waivers or exceptions were granted where customer hardships could be demonstrated or where the service provider's inventory did not have a block of sequential numbers large enough to meet its needs. Under existing procedures, NeuStar looks at the number of months-to-exhaust for the entire rate center without any exceptions. The current process for review is arbitrary and results in decisions contrary to the public interest and decisions that do not necessarily preserve the efficient use of telephone numbers or postpone dates of exhaust. Moreover, the denial of sufficient numbering resources to STC to meet its customers' needs is inconsistent with the FCC's position that "[u]nder no circumstances should consumers be precluded from receiving telecommunications services of their choice from providers of their choice for want of numbering resources." FCC 00-429 at ¶ 61. By refusing to grant numbering resources sufficient to meet STC customers' needs, NeuStar is preventing these customers from obtaining the service of their choice from the carrier of choice, STC

20. Notwithstanding its need for an NNX to make its new MetaSwitch functional and to serve its customers, STC analysis indicates that STC will be unable to meet the months-to-exhaust and utilization threshold at the rate center level in time to obtain adequate numbering resources to serve these customers absent relief from the Authority. This situation will result in STC's inability to utilize the new Metaswitch and provide the services it makes available to STC's customers.

CONCLUSION

For the reasons articulated above, Salem Telephone Company respectfully urges the Commission to direct NeuStar to provide the requested NNX to Salem Telephone Company to enable Salem Telephone Company to obtain the needed functionality and upgraded service of its Metaswitch and meet the requirements of its customers in order that they may receive the service of their choice from the provider of their choice to meet their telecommunications needs.

WHEREFORE, Salem Telephone Company requests:

1. The Commission review the decision of the NeuStar to deny Salem Telephone Company request for additional numbering resources; and
2. The Commission directs NeuStar to provide the NPA/NXX to Salem Telephone Company to establish and assign an LRN to the Metaswitch in the Salem Rate Center.

Respectfully submitted,

James Liebman

Title

Date

¹ Identify type and reason for change(s) in Section 1.4(e).

² A list of the current Code Administrator(s) who can provide assistance in completing this form is available upon request from NANPA.

³ The NXX field is required for any code request in which there is a change or the NXX is being returned.

⁴ Operating Company Number (OCN) assignments must uniquely identify the applicant. Relative to CO Code assignments, NECA-assigned Company Codes may be used as OCNs. Companies with no prior CO Code or Company Code assignments may contact NECA (800-228-8597) to be assigned a Company Code (s). Since multiple OCNs and/or Company Codes may be associated with a given company, companies with prior assignment should direct questions regarding appropriate OCN usage to the Telcordia™ Routing Administration (TRA) on 732-699-6700.

⁵ This is an eleven-character descriptor of the switch provided by the owning entity for the purpose of routing calls. This is the eleven-character Telcordia™ COMMON LANGUAGE CLLI™ Location Identification of the applicant's switch or POI. (Telcordia and CLLI are trademarks and COMMON LANGUAGE is a registered trademarks of Telcordia Technologies, Inc.)

⁶ Rate Center name must be a tariffed Rate Center associated with toll billing.

⁷ Applies to any code applicant connecting to the Public Switched Telephone Network via a tandem owned by a different carrier.

⁸ This is an eleven-character descriptor provided by the owning entity for the purpose of routing calls. This must be the CLLI™ Location Identification Code of the switching entity/POI, and is the same on Part 2, Form 1, Page 2 of 2.

⁹ Code applicants should request an effective date that is at least 66 calendar days from the submission of this form. It should be noted that interconnection arrangements and facilities need to be in place prior to activation of a code. Such arrangements are outside the scope of these guidelines.

- ¹⁰ Requests for code assignment shall not be made more than six months prior to the requested effective date.
- ¹¹ Select if you are the current Code Holder
- ¹² Select if you are not the current Code Holder
- ¹³ The Applicant will indicate "YES" if the NXX being requested will be used for thousands-block number pooling and will leave this field blank if it is not.
- ¹⁴ An incomplete form may result in delays in processing this request.

Administrator 09/18/2012

Title Date

Instructions for filling out each Section of the Part 1A form:

Section 1.1 Contact information requires that Service Providers supply under "Block Applicant" the company name, company headquarters address, a contact within the company, an address where the contact person may be reached, in addition to the correct phone, fax, and e-mail address. The Pooling Administrator section also requires the Service Provider to fill in the Pooling Administrator s name, address, phone, fax and e-mail.

Section 1.2 Service Providers who need a thousands-block assignment or for an Location Routing Number (LRN) are required to fill in this section. If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the TelcordiaTM LERGTM Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by TelcordiaTM Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as

well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLI™ tandem of the facilities based provider ^{xi}. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines. If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied. The thousands-block applicant certifies veracity of this form by signing their name, and providing their title and date.

Foot Notes :

ⁱ Identify the type of change(s) in Section 1.5.

ⁱⁱ The Pool Administrator is available to assist in completing these forms.

ⁱⁱⁱ A CO Code application will also need to be submitted to the PA.

^{iv} Operating Company Number (OCN) assignments must uniquely identify the applicant. Relative to CO Code assignments, NECA-assigned Company Codes may be used as OCNs. Companies with no prior CO Code or Company Code assignments should contact NECA (800 524-1020) to be assigned a Company Code(s). Since multiple OCNs and/or Company Codes may be associated with a given company, companies with prior assignments should direct questions regarding appropriate OCN usage to (TRA) (732-699-6700).

^v This is an eleven-character descriptor of the switch provided by the owning entity for the purpose of routing calls. This is the 11 character CLLI™ code of the switch /POI.

^{vi} Rate Center name must be a tariffed Rate Center.

^{vii} Acknowledgment and indication of disposition of this application will be provided to applicant within seven calendar days from the date of receipt of this application. An incomplete form may result in delays in processing this request.

^{viii} Please ensure that the NPA-NXX of the LRN to be associated with this block(s) is/will be active in the network prior to the effective date of the block(s).

^{ix} Select if you are the current Block Holder.

^x Select if you are not the current Block Holder

^{xi} Telcordia, LERG Routing Guide, and CLLI are trademarks of Telcordia
